# *License Agreement*

---

By using the software included with this agreement you accept the terms of the license with MicroLogic Software. If you do not agree to the terms of this agreement, and you are the original purchaser of this program, promptly return the software together with all accompanying items to the point of purchase for a refund.

## **Copyright**

---

This software is owned by MicroLogic Software, Inc. and is protected by United States copyright laws and international treaty provisions. You must treat the software like any other copyrighted material.

You may not copy the written materials accompanying the program, nor make copies of the program or any part thereof.

## **Single User License**

---

MicroLogic Software, as Licensor, grants only to you, the Licensee, a nonexclusive right to use the enclosed software on one single computer (CPU) at one single location.

You may *not* install this software on networks, sublicense, loan, rent, or otherwise distribute this software for use by others. You may be held legally responsible for any copyright infringement that is caused or encouraged by your failure to abide by the terms of this license.

## **Network License**

---

Network License Agreements are required for the use and support of this software on networks or multiple systems.

For more information concerning *Network License Agreements* or to order a license, please call MicroLogic Software Sales at 1 (800) 888-9078, 8:00 am to 5:00 pm (PST), Monday-Friday.

## **Performance Guarantee**

---

All MicroLogic Software products are guaranteed to perform as advertised. However, MicroLogic's entire liability and your exclusive remedy shall be at MicroLogic's option either (a) return of the product for refund of purchase price or (b) replacement of the software.

This guarantee is void if the failure of the program has resulted from accident, abuse, misapplication, or use of the program with incompatible hardware.

## Customer Service

---

MicroLogic Software offers customer service to all registered users from 8:00 am to 5:00 pm (PST), Monday - Friday.

Customer service often requires you to “step through the solution” on your computer, so please be at your system with the computer on-line and ready *before* calling customer service.

Requests for customer service may also be submitted via fax or mail. To enable our customer service personnel to provide a prompt and accurate response to your request, please include a complete and detailed description of the problem with *step-by-step* instructions of how to reproduce it.

Printed samples often help to illustrate some problems, and it best to provide both positive and negative examples of what your are trying to achieve.

Include the following important information with your service request:

- **Product name:** PrintMaster Gold CD Publishing Suite
- **Serial number:** Located on the inside back cover of this manual and the Registration card.
- **Version number:** Located on the title screen of this application upon start-up.
- **Windows version:** Please indicate whether you are using Windows 3.1x or Windows 95.
- The contents of your **AUTOEXEC.BAT** and **CONFIG.SYS** files located in the root directory.
- The contents of your **WIN.INI** and **SYSTEM.INI** files located in the **WINDOWS** directory.
- **Printer Model**

Customer service requests should be addressed to:

*MicroLogic Software*

1351 Ocean Avenue  
Emeryville, CA. 94608-1128

# Introduction

---

*Welcome to the exciting world of personal publishing!*

The PrintMaster Gold Publishing Suite makes it easy to produce printing projects you'll be proud of! Simply choose from PrintMaster Gold's album of beautiful, ready-to-print designs, make any changes you want, and you're ready to print. It's really that easy!

And if that doesn't sound easy enough, you can let PrintMaster Gold's exclusive Audio Guide literally "talk you through" the selection, personalization and printing process with friendly instructions for every menu and command. Personal publishing has never been more fun!

Besides being exceptionally easy and fun to use, PrintMaster Gold's advanced rendering technology and extensive color support always delivers the *finest output possible* from your printer.

## PrintMaster Gold Publishing Suite — Features

---

**Photo Album Makes Selection Easy.** Choose from hundreds of ready-made projects ideal for both home and business—greeting cards, banners, signs, calendars, certificates, stationery, business cards, labels, and many more! Plus, any design can be quickly personalized with your choice of text and graphics—even your own scanned photos.

**Exclusive Audio Guide Provides Friendly Assistance.** Only PrintMaster Gold includes the amazing *Audio Guide* that literally "talks you through" your projects with helpful verbal instructions for each menu and command. The level of verbal assistance is automatically reduced with use and is easily set to any level or preference. Your computer has never been so helpful.

**Advanced Rendering Technology Provides Optimized Output.** PrintMaster Gold provides full 24-bit rendering that supports over 16 million colors or shades of gray in the highest resolution possible on your printer. Whether you own a black & white or color printer, you'll always get fabulous print-outs that are guaranteed to get noticed!

**Address Book Makes Merging Easy.** Print holiday cards for all your relatives or labels for your customers—all with one easy command! PrintMaster Gold's new Address Book is an easy and powerful way to incorporate the personal information for all your friends, family, clients, or other acquaintances into any PrintMaster Gold printing project.

**6500 Gorgeous Graphics.** Spice up any project with your choice of over 5100 gorgeous graphics including 1200 humorous images created by nationally syndicated cartoonist Phil Frank. And since PrintMaster Gold works with all popular graphic formats, you can use clip art images from any source—even your own scanned images!

**201 Fabulous Fonts.** Communicate clearly and effectively with the most complete library of professional-quality TrueType fonts ever offered! Every font can be stretched and scaled to any size you want—from a miniature greeting card to a gigantic garage door poster. You can also add your choice of special effects to any font selection for unlimited variety!

## Using this Manual

---

The *PrintMaster Gold Publishing Suite User's Guide* is your personal guide to the PrintMaster Gold program. In here you'll find lots of helpful information including:

- Step-by-step instructions for installing and using PrintMaster Gold.
- Simple tutorials and sample projects make it easy for you to learn by example.
- Complete reference information for every PrintMaster Gold menu and command.
- Sample printouts of all the graphics and fonts included in PrintMaster Gold.
- Troubleshooting information just in case something goes wrong.

### Quick Start

Follow the simple installation instructions in the next chapter and then read the section entitled *Using PrintMaster Gold* which describes basic key and mouse commands and provides an easy sample project to get you off to a fast start. After reading this section you'll be ready to start producing your own great-looking Signs, Posters, Banners, Greeting Cards, and more in no time!

### Reference

The remainder of the manual includes complete a reference section that describes all PrintMaster Gold commands and menus. Check out the reference sections when you want to explore more of PrintMaster Gold's capabilities.

### Additional Help

You can get additional information using the online help system—just press the **[F1]** key while PrintMaster Gold is running. The *PrintMaster Audio Guide* will provide you with helpful instructions and prompts as you use the program. To repeat the last instruction, simply click on the “Play” button at the bottom of the current menu or dialog box.

# *Installing PrintMaster Gold*

---

Installing the PrintMaster Gold CD Publishing Suite into Windows is quick and easy! Follow the steps listed below and in a few moments you'll have PrintMaster running smoothly in Windows.

Before installing, check the system requirements listed below to make sure your computer is able to work with the PrintMaster Gold Publishing Suite.

## **System Requirements**

The PrintMaster Gold CD Publishing Suite performs on any computer with the following features:

- IBM PC with a 486 or Pentium processor (or 100% compatible computer)
- Windows 95, Windows 3.1x / Windows for Workgroups (running in *386 Enhanced Mode*)
- 4Mb or more of RAM (*8Mb recommended*)
- 15Mb or more of free hard disk space
- Double-speed or better CD-ROM drive
- Microsoft mouse or 100% compatible
- Sound Blaster or 100% compatible sound card (*recommended*)
- Hayes or 100% compatible modem (*optional*)

**Font Support:** PrintMaster Gold includes a complete library of high quality TrueType fonts and will work with any other TrueType fonts that are installed in Windows.

**Graphics Support:** PrintMaster Gold provides a large selection of spectacular full color .CGM images and works with all other popular graphic formats: .PCX, .TIF, .JPG, .GIF, .WMF, .BMP, and Kodak Photo CD.

**Printer Support:** PrintMaster Gold provides the highest resolution output possible on all black & white or color printers supported by Windows.

## **Starting in Windows 95**

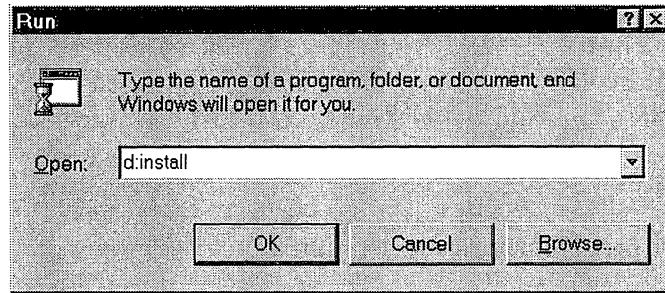

Follow the step-by-step instructions listed below to install PrintMaster Gold onto your hard disk.

When running under Windows 95, the PrintMaster Gold CD provides support for the **autorun** feature as described below:

1. Insert the PrintMaster Gold Publishing Suite CD into your CD-ROM drive and the installation program will automatically start.
2. Proceed to the next section entitled, "*PrintMaster Installation*".

If the Windows 95 **autorun** is not currently enabled on your system, then begin the PrintMaster Gold installation as follows:

1. From the **Start** menu click on the **Run...** item.
2. At the command line specify the drive letter where the PrintMaster Gold CD is located and type **INSTALL** (Example: **D:INSTALL**). Press **ENTER** or click **OK** to proceed.

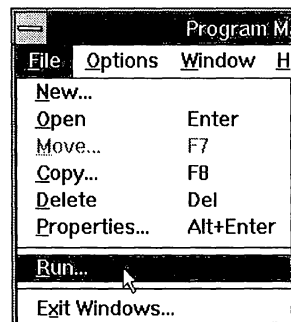

3. Proceed to the next section entitled, *"PrintMaster Installation"*.

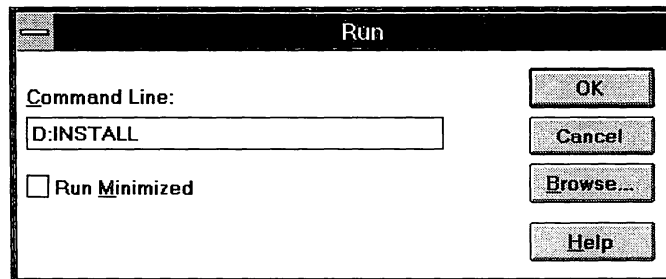

### Starting in Windows 3.1x or Windows for Workgroups

Follow the step-by-step instructions listed below to install PrintMaster Gold onto your hard disk.

1. At a DOS prompt (**C:>**), type **WIN** and press **ENTER** to start Windows.
2. Open the Program Manager's **File** menu and select the **Run...** item.

3. Specify the drive where the CD is located and type **INSTALL** (Example: **D:INSTALL**) for the Command Line and press **ENTER** or click **OK** to proceed.

4. Proceed to the next section entitled: *PrintMaster Installation*.

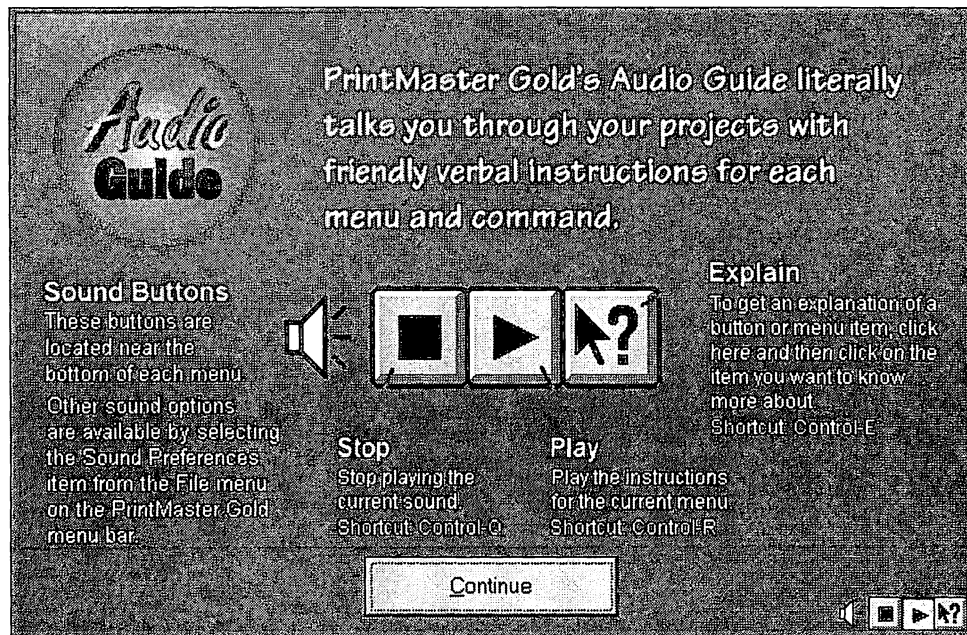

## PrintMaster Installation

---

1. Click the **Start Installation** button or press **[ENTER]** to continue the installation.

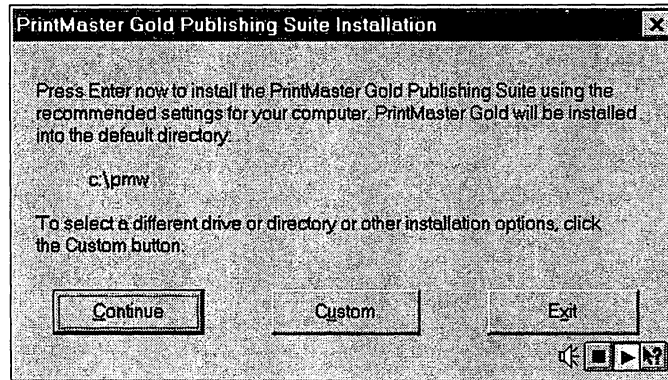

The PrintMaster Gold **Audio Guide** will help you every step of the way with plain language instructions and answers to all your questions. As you get more familiar with the program, PrintMaster will gradually let you work on your own.

2. Click **Continue** or press **[ENTER]** to proceed.

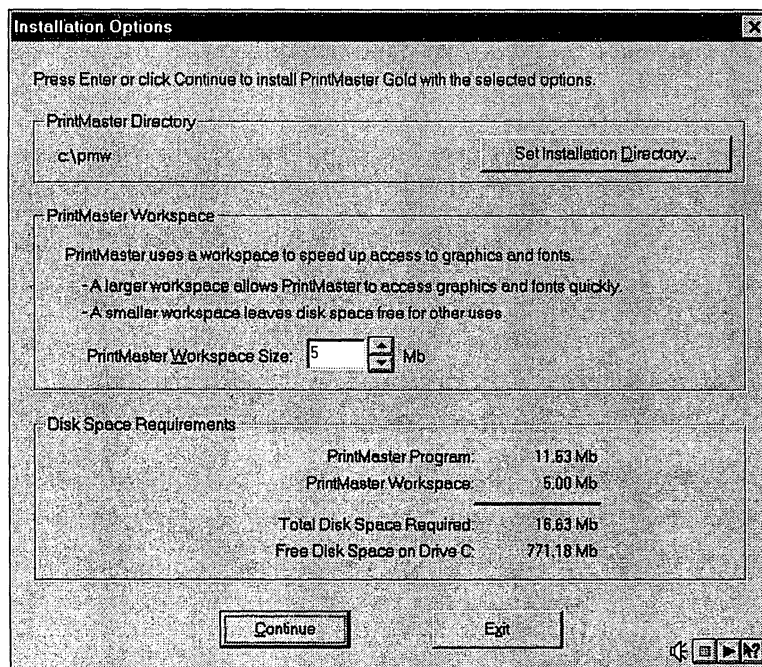

The PrintMaster Gold Publishing Suite Installation screen appears with the default drive and directory which you may change or accept as shown.

3. Click **Continue** or press **ENTER** to install PrintMaster Gold into the default directory, **C:\PMW**.  
or Click the **Custom** button to install PrintMaster Gold into the drive and directory of your choice.

## Installation Options

PrintMaster Gold allows you to customize your installation to fit your systems needs. After any necessary changes click **Continue** to proceed with the installation.

## PrintMaster Directory

This section displays the current destination drive and directory for installing PrintMaster Gold. To change the destination for the installation click the **Set Installation Directory** button and type in a new drive and directory. Press **ENTER** or click **OK** to return to the main screen.

## PrintMaster Workspace

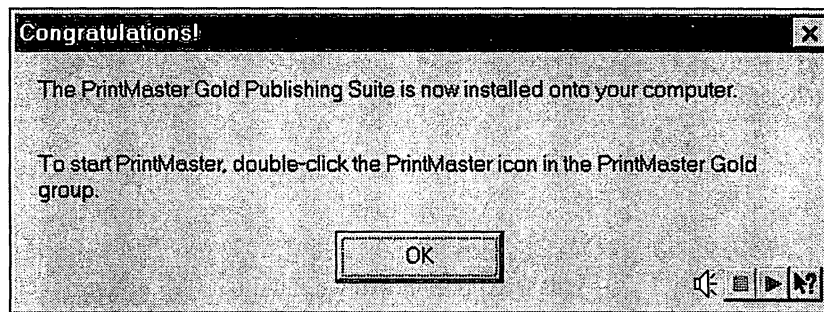

Use this option to change the PrintMaster Gold Workspace. A larger workspace allows PrintMaster to access fonts and graphics quickly. A smaller work space leaves disk space free for other applications. Use your mouse to adjust this value.

## Disk Space Requirements

This section provides information concerning PrintMaster Gold disk space requirements and how much free disk space is available on the selected destination drive.

## Congratulations!

PrintMaster Gold has now been installed. To start-up PrintMaster, click on the **OK** button and then double-click the PrintMaster Gold icon.

## Free Fonts & Graphics!

Register your PrintMaster Gold Publishing Suite you will receive a dazzling collection of 69 designer fonts and 63 color graphics — **FREE!**

This page intentionally left blank.

# Starting PrintMaster Gold

---

After copying the PrintMaster Gold program onto your hard disk, the installation will automatically start PrintMaster Gold. However, the next time you want to start PrintMaster Gold you will need to do the following:

1. Startup Windows in the usual manner.
2. Open the PrintMaster Gold group and click on the PrintMaster Gold icon.

---

**IMPORTANT:** *In order to start PrintMaster Gold, the CD must be inserted into the CD-ROM drive. However, once the program is up and running you may remove the CD for brief periods in order to access graphics from other CD's.*

---

3. Press **ENTER** or click **OK** to proceed past the title screen.

## Register for Bonus Fonts & Graphics

---

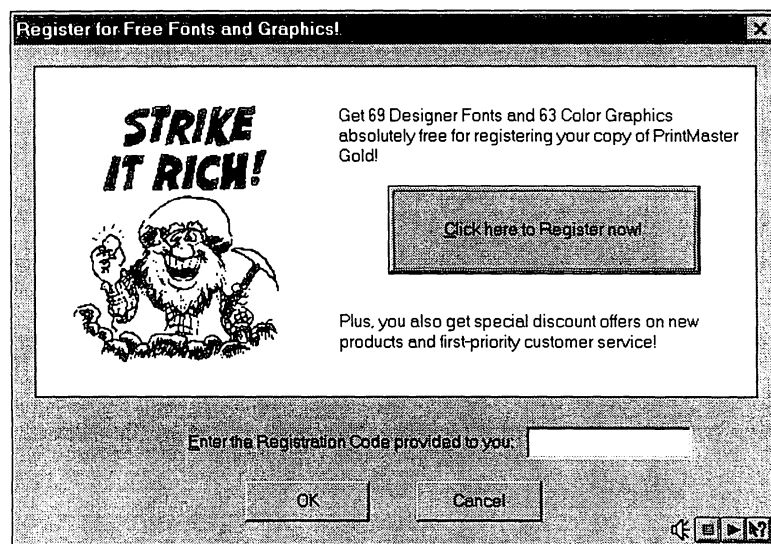

Registering your PrintMaster Gold Publishing Suite now enables us to provide you with the following:

### 3 Great Reasons to Register

**CUSTOMER SERVICE—FREE!** *Access to unlimited customer service.*

**NEW PRODUCT INFORMATION—FREE!** *Advanced notice of new products and upgrades.*

**69 FONTS & 63 GRAPHICS—FREE!** *More exceptional quality fonts and graphics.*

## Installing Bonus Fonts & Graphics

---

The PrintMaster Gold CD Publishing Suite includes 69 designer fonts and 63 color graphics that are easily installed by entering the Registration Code as follows.

1. Open the PrintMaster Gold group and click the *PrintMaster Gold* icon to start the program.

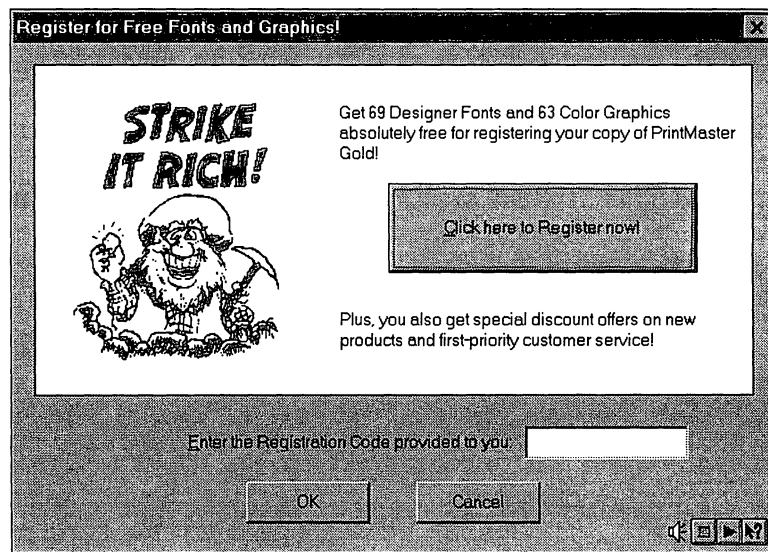

---

**IMPORTANT:** *In order to start PrintMaster Gold, the CD must be inserted into the CD-ROM drive.*

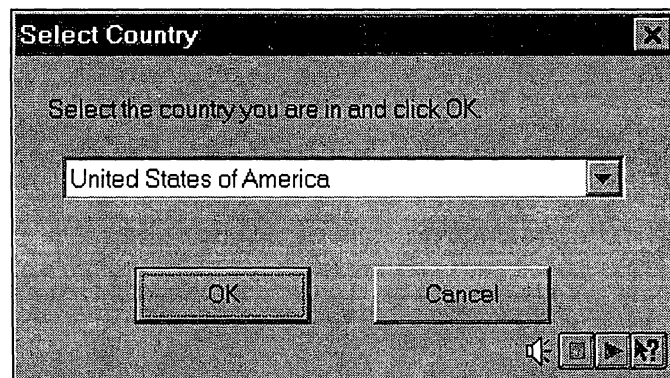

---

2. Click the **Free Fonts and Graphics** button.
3. If you have already registered (*via mail*) and just want to enable your free fonts and graphics, then type in your *Registration Code* in the space provided and press **ENTER** or click **OK**.

Otherwise select the **Click here to Register now!** button.

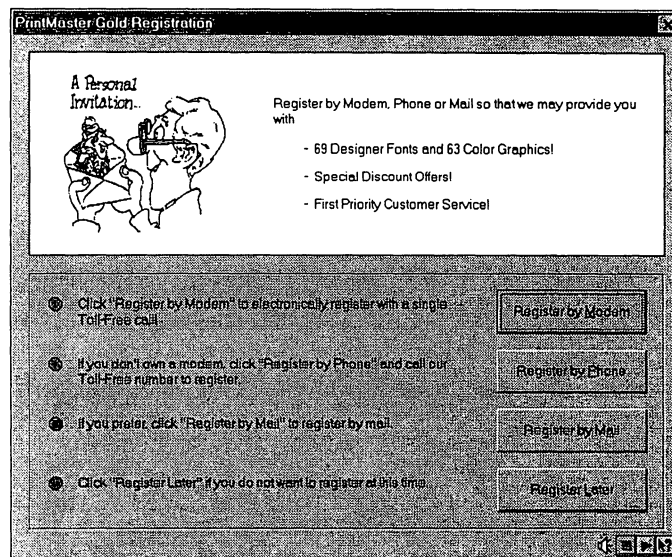

4. Use your mouse to the pull down the menu and choose the country your are registering from.

5. Press **ENTER** or click **OK** to continue.

6. Select a method of registration by clicking the appropriate button:

- **Register by Modem**
- **Register by Phone**
- **Register by Mail**

## Register by Modem

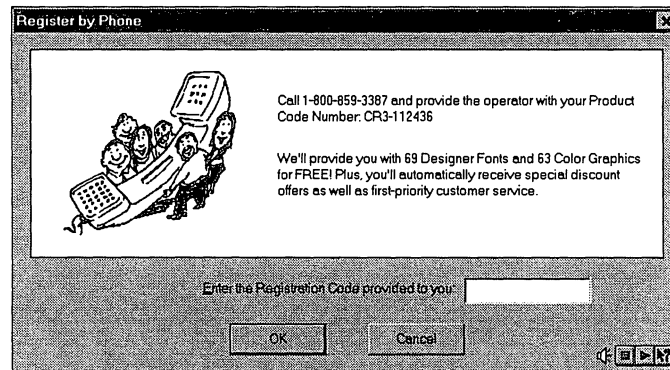

Select this method to register your PrintMaster Gold over a modem. Be sure that your modem is connected before selecting this option. *If you need to dial a number to access an outside phone line, click the **Dial Out Prefix** button and type in the number.*

The screenshot shows the 'Registration Information' window. On the left, there's a cartoon illustration of a person holding a clipboard. To the right, text says 'Enter the information requested below and click OK so that we may provide you with your 69 Designer Fonts and 63 Color Graphics for FREE!' and 'Plus, you'll automatically receive special discount offers as well as first-priority customer service.' Below this, there are several input fields: 'First Name', 'Last/Surname', 'Company', 'Address' (two lines), 'City/Town', 'State/Province', 'Zip/Postal Code', 'Country' (a dropdown menu currently showing 'United States of America'), 'Phone', and 'E-Mail'. At the bottom, there are three buttons: 'OK', 'Cancel', and 'Dial Out Prefix'.

- Type in your user information (Name, Address, etc.) and press **ENTER** or click **OK** to register. Your free fonts and graphics will automatically be enabled.

## Register by Phone

Select this method to register your PrintMaster Gold by phone. Dial the number displayed on your screen and provide the operator with your user information and **Product Code** (also displayed on this screen).

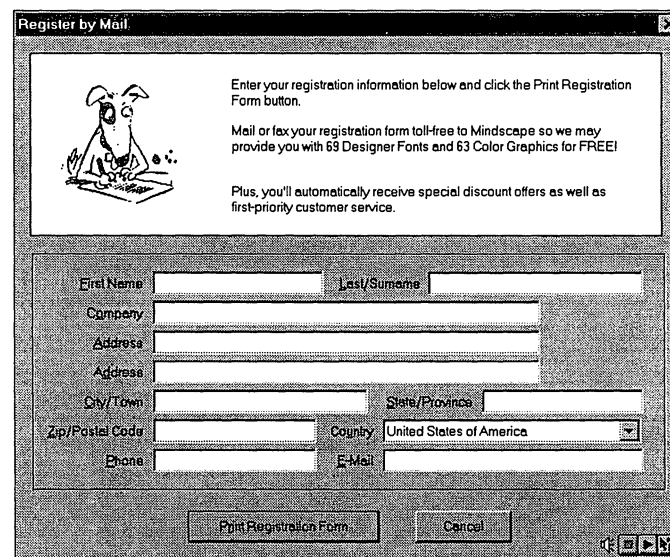

The "Register by Phone" dialog box features a cartoon illustration of a telephone with a face and arms on the left. The text on the right reads: "Call 1-800-859-3387 and provide the operator with your Product Code Number: CR3-112436" and "We'll provide you with 69 Designer Fonts and 63 Color Graphics for FREE! Plus, you'll automatically receive special discount offers as well as first-priority customer service." At the bottom, there is a text input field labeled "Enter the Registration Code provided to you:" followed by "OK" and "Cancel" buttons. A small icon bar is in the bottom right corner.

- Type in the registration code provided to you by the operator and press **ENTER** click **OK** to automatically enable your free fonts and graphics.

## Register by Mail

Select this method to register your PrintMaster Gold by mail. Be sure that your printer is online and ready before selecting this option.

The "Register by Mail" dialog box features a cartoon illustration of a dog sitting at a desk on the left. The text on the right reads: "Enter your registration information below and click the Print Registration Form button." and "Mail or fax your registration form toll-free to Mindscape so we may provide you with 69 Designer Fonts and 63 Color Graphics for FREE! Plus, you'll automatically receive special discount offers as well as first-priority customer service." The form fields include: "First Name", "Last/Surname", "Company", "Address" (two lines), "City/Town", "State/Province", "Zip/Postal Code", "Country" (a dropdown menu currently showing "United States of America"), "Phone", and "E-Mail". At the bottom, there are "Print Registration Form" and "Cancel" buttons. A small icon bar is in the bottom right corner.

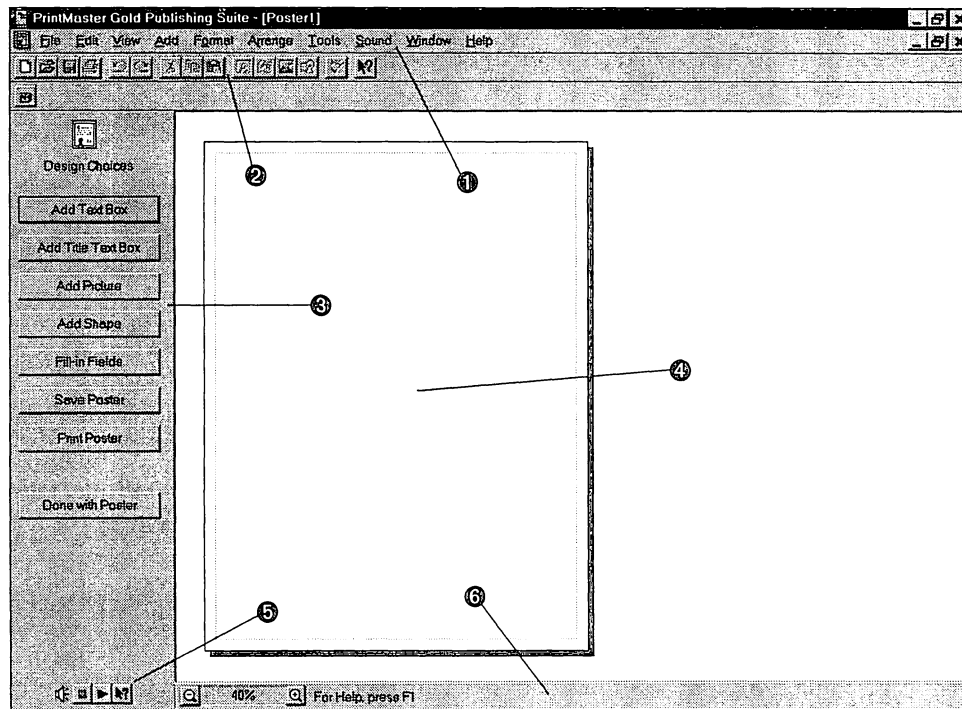

- Type in your user information (Name, Address, etc.) and click the **Print Registration Form**.

# Using PrintMaster Gold

## Screen Layout

The following section is provided to improve your familiarity with the various features and tools of PrintMaster Gold that make it easy for you to modify your choice of printing projects.

Like all Windows applications, PrintMaster Gold has a **Menu bar** ① located just below the title bar at the top of the screen. The Menu bar provides access to all PrintMaster Gold command features.

Use your mouse (or the **[ALT]** key) to pull down these menus in order to gain access to their contents. (See the section entitled: *Mouse and Keyboard Conventions* later on in this chapter for more details)

The **Toolbar** ② which is displayed across the top of the layout area provides quick mouse access to some of the most commonly used PrintMaster Gold commands, such as File Open, Cut, Print, etc. To hide or display the *Toolbar*, click on the Toolbar item in the View menu.

**New** — Click this button to start a new project.

**Open** — Click this button to open a template or saved project.

**Save** — Click this button to save the current project. If you have not already provided a file name for your project, you will be prompted to do so at this point.

**Print** — Click this button to send your project to your printer.

**Undo** — Click this button to quickly reverse changes in editing, formatting, and other actions. To quickly reverse multiple actions, click this button more than once.

**Redo** — Click this button to redo or repeat the last change you made in your project. Use this button to also reverse changes made using the Undo button.

**Cut** — Click this button to remove the selected text and/or graphic to the Clipboard.

**Copy** — Click this button to copy the selected text and/or graphic to the Clipboard.

**Paste** — Click this button to insert a copy of the Clipboard contents into your project.

**Insert Text** — Click this button to add a new text box to your document.

**Insert Title Text** — Click this button to add a new title text box to your document.

**Insert Picture** — Click this button to add a new picture to your document.

**Insert Shape** — Click this button to add a new shape to your document.

**Check Spelling** — Click this button to access the PrintMaster Gold spell checker.

**Help About...** — Click this button to change your mouse pointer into a help pointer. Then click on the menu item or button you wish to obtain help on.

The **Sidebar** ③ is displayed on the left-hand side of the application window and lists project features and design options.

When projects, pictures, page layouts, fonts, and colors are displayed, the *Sidebar* identifies the current activity choices such as *Select a Project*, *Edit Text*, etc. To hide or display the *Sidebar*, click on the *Sidebar* item in the View menu.

The **Layout Area** ④ displays your project as you compose and edit it. Use the arrow keys and your mouse to position text and pictures within the *Layout Area*.

The **Audio Guide** ⑤ buttons allow you to control the PrintMaster Gold audio help system. (*See the chapter entitled: Audio Guide for more information.*)

The **Status Bar** ⑥ is displayed at the bottom of the PrintMaster Gold window. The left area of the *Status Bar* describes actions of menu items as you use the arrow keys to navigate through menus. This area similarly shows messages that describe the actions of toolbar buttons as you depress them.

The right section of the Status Bar indicates which of the following keys are latched down: **CAP** (The Caps Lock key is latched down), **NUM** (The Num Lock key is latched down), **SCRL** (The Scroll Lock key is latched down).

To hide or display the *Status Bar*, click on the Status Bar item in the View menu.

## Mouse and Keyboard Conventions

---

PrintMaster Gold supports the standard Microsoft Windows mouse and keyboard command conventions. Use your mouse and the following keys to select menu items or to confirm commands.

 or 

Use these keys to select (highlight) a desired item within the currently active menu.

Use this key to move to the next menu or command button.

 + 

Use this key combination to move to the previous menu or command button.

Use this key to return to a prior menu.

Use this key to confirm the current selection or command.

Use this key in combination with the highlighted key of any menu name or command button to move directly to the menu or to immediately execute the button command. For example, press + to move to the *File* menu.

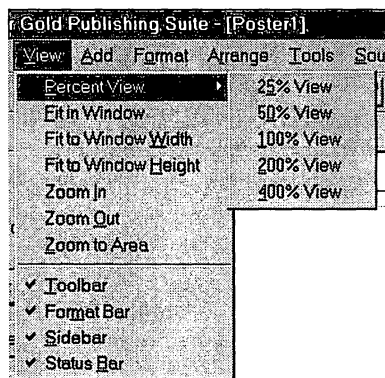

Use this key to display help information about the current menu items.

## Changing the Layout View

PrintMaster Gold makes it easy to alter the layout view to suit your editing needs. By choosing one of the options listed below you can zoom-in to see the smallest details of your project, or zoom-out to see your entire project display on screen.

Layout viewing options can be easily accessed from the **View** menu with your mouse, or by pressing **(ALT)+[V]**. Use **(↑)** or **(↓)** to highlight the appropriate option, and press **(ENTER)** to select.

**Percent View** — This option allows you to increase or decrease the layout view level by fixed percentages. Press **(ALT)+[V], [P]** to choose one of the following view levels: **25%**, **50%**, **100%** (*normal*), **200%**, and **400%**.

**Fit in Window** — This option allows you to adjust the layout view to fit your project page. Press **(ALT)+[V], [F]** to select this option.

**Fit to Window Width** — Choose this option to adjust the layout view to fit the page width of your project. Press **(ALT)+[V], [W]** to select this option.

**Fit to Window Height** — Select this option to adjust the layout view to fit the page height of your project page. Press **(ALT)+[V], [H]** to select this option.

**Zoom In / Zoom Out** — This option allows you to zoom in or out by a defined percentage. This option is also accessible from the status bar.

**Zoom Area** — This option allows you to select the focus to zoom into.

1. Select this option and position the magnifying glass to the left and above of the object you want to magnify.
2. Hold down the left mouse button and drag the magnifying glass across and down the layout screen until the item of focus is enclosed in a box. Then release the mouse button.

## Use Templates For A Fast Start

---

PrintMaster Gold comes with dozens of pre-made templates which you can quickly customize for your particular needs.

Before starting a project, check the list of existing templates and see if one of them is close to what you want. You can save a lot of time by making a few changes to an existing document instead of starting from scratch. As you create projects of your own, those saved documents will also become templates which can be easily changed and used for future occasions.

Working with PrintMaster Gold templates is also a great way to learn some of the advanced techniques such as shadowing and picture overlapping used by the designers at MicroLogic Software.

## A Sample Project

---

The following is a sample of the kind of unique projects you can create with PrintMaster Gold. To begin a project, start PrintMaster Gold as follows.

1. Open the PrintMaster Gold group and click on the PrintMaster Gold icon.
2. Press **[ENTER]** or click **OK** to proceed past the title screen.
3. Click the **Posters** tab located on the right side of the *Project Album*.
4. To create a new project, click the **Make Your Own** tab.
5. Press **[ENTER]** or click **OK** to choose the *Poster Size Tall*.
6. Click the **Add Picture** button located on the sidebar.
7. Click the tab labeled **More** and then click on **Shapes**.
8. Press the **More** arrow button on the bottom-center of the Picture Album until you reach the page with the picture: **SPLAT**.
9. Choose the picture: **SPLAT** and press **[ENTER]** or click **Close** to confirm your selection.
10. To reposition the picture on the page, click the **Position** button located on the *Sidebar*.
11. Click the **More** button on the sidebar.
12. Click the **Size** tab and choose **Width - 3/4 Page** and **Height - 3/4 Page**.
13. Click the **Position** tab and choose **Horizontal - Center** and **Vertical - Middle**.
14. Press **[ENTER]** or click **OK** to confirm your selection.
15. Click the **Attributes** button.
16. To change the picture color click the **Color** button and select **Red**.
17. Press **[ENTER]** or click **OK** to confirm your selection.

18. Click on **Done with Picture**.
19. To add text to your project, click the **Add Text Box** button.
20. Now click the **Type and Edit Text** button.
21. Type in the word: **WET**, press **[ENTER]**, and then type in the word: **PAINT!**.
22. To highlight your text, click the **Select All Text** button.
23. Click the **Font** button and highlight the font name: **Burlesque**. Press **[ENTER]** or click **OK** to confirm your selection.
24. To center your text horizontally, pull down the **Horizontal** menu located on the *Sidebar* and choose **Center Aligned**.
25. To center the text vertically, pull down the **Vertical** menu located on the *Sidebar* and choose **Middle Aligned**.
26. Stretch the text to fit within the text box by clicking on **Stretching** item located on the *Sidebar*.
27. Now, exit this section by clicking the **Done Editing Text** button.
28. Next click the **Done with Text Box** button.
29. To see your new poster on paper, click the **Print Poster** button ,and then click on **Print**.

Below is a sample of the final output.

PrintMaster Gold includes an *Audio Guide* that “talks you through” your projects with friendly verbal instructions for each menu and command. And as you get more familiar with the various choices and commands, PrintMaster gradually lets you work on your own.

### Sound Buttons

---

The sound buttons located on the sidebar and most dialog boxes provide you with manual control of the Audio Guide.

#### Stop

Click this button, or press **CTRL**+**Q**, to stop playing the current sound.

#### Play

Click this button, or press **CTRL**+**R**, to play the instructions for the current menu.

#### Inspect

To get an explanation of a button or menu item, click this button and then click on the item you want to know more about.

### Enable/Disable Sounds

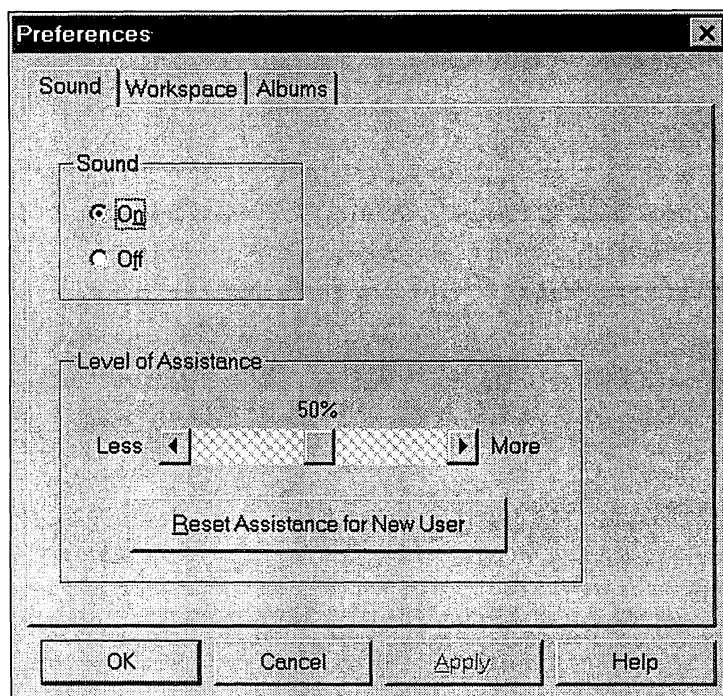

The **Sound** menu located on the PrintMaster Gold menu bar provides the ability to enable or disable the *Audio Guide*. Pull down this menu with your mouse and click either the “**On**” or “**Off**” option.

## Sound Preferences

---

To change the level of assistance offered by the PrintMaster Audio Guide click on the File menu with your mouse, select *Preferences*, and choose **Sound**.

The “**On**” & “**Off**” options enable or disable the Audio Guide.

### Level of Assistance

Most menus in PrintMaster Gold have two audio tracks, a long version and a short version. When you first start using PrintMaster you will hear the long version of each voice track. As you gain more experience with individual features, the Audio Guide will switch over to the short version of the voice track.

The Audio Guide uses the sound preferences level to determine when you are ready for the short version of each learned feature. Use the scroll bar to adjust the level of assistance offered by the PrintMaster Gold Audio Guide, or click the **Reset Assistance for New User** button to return the Audio Guide to its original setting.

# Workspace

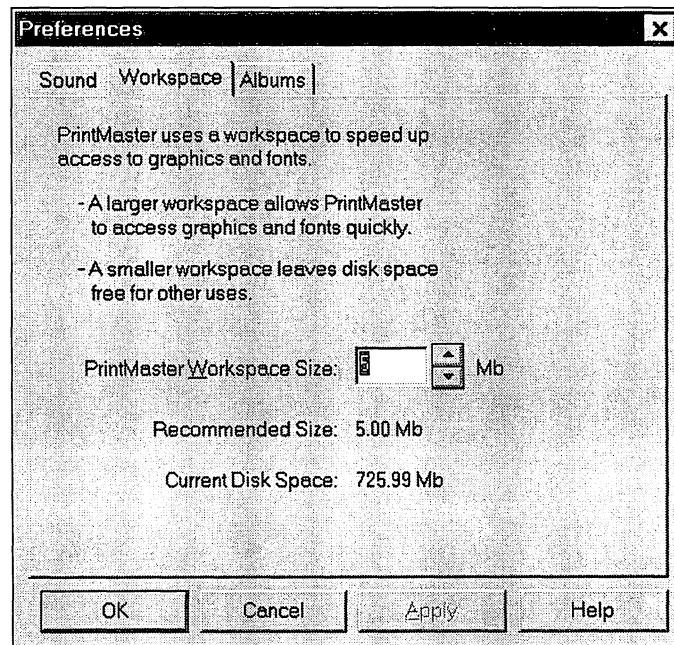

---

Since your hard disk is faster than your CD-ROM player, PrintMaster Gold improves performance by using a file on your hard disk to store the most frequently used information. This hard disk file is called the *workspace file*.

## Workspace Preferences

---

To change the workspace size click on the File menu with your mouse, select *Preferences*, and choose **Workspace**.

Use your mouse to change this value or press **[ALT]+[W]** and type in a new workspace size.

- A **larger** workspace uses more hard disk space but enables you to access fonts and graphics far more quickly.
- A **smaller** workspace uses less hard disk space but takes longer to access the fonts and graphics.

This page intentionally left blank.

## Creating a Card

The Card project is one of PrintMaster Gold's most versatile projects. Create invitations, programs, menus, or similar items.

*All PrintMaster Gold projects are arranged in an onscreen album for easy access. Click the project tab located on the right side of the album to select a project category.*

### Beginning a Card

The following instructions describe how to create a new Card project, open an existing Card project (or template), save a Card project, and print a Card project.

1. Click on the **Cards** tab located on the PrintMaster Gold project album to:
  - a. Start a *new* Card project.
  - b. Open an *existing* Card project (or template).

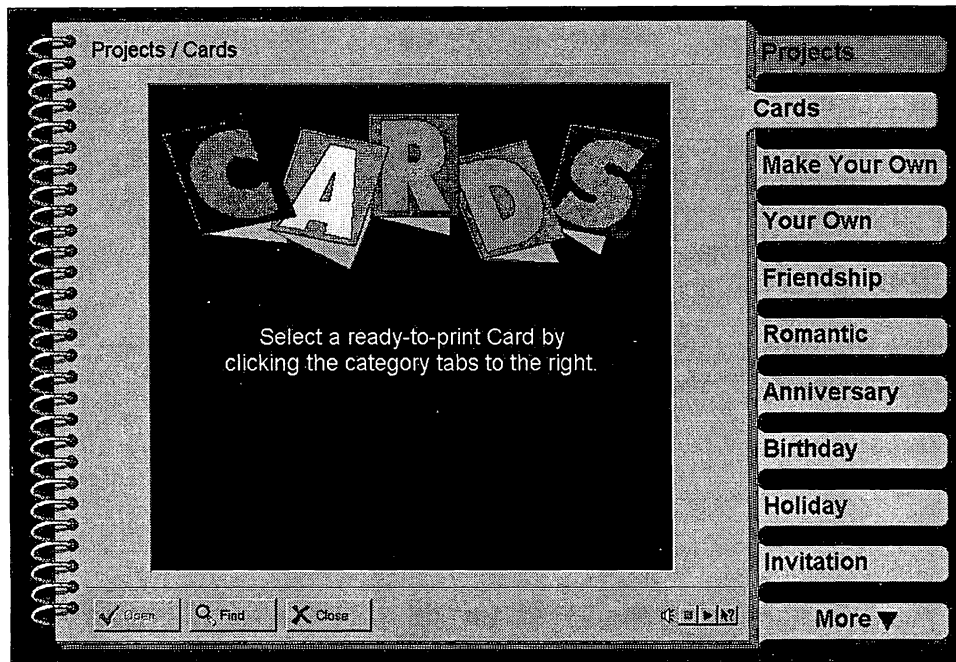

PrintMaster Gold provides many different types of Card categories to choose from. To browse a category, simply click on its tab located on the project album.

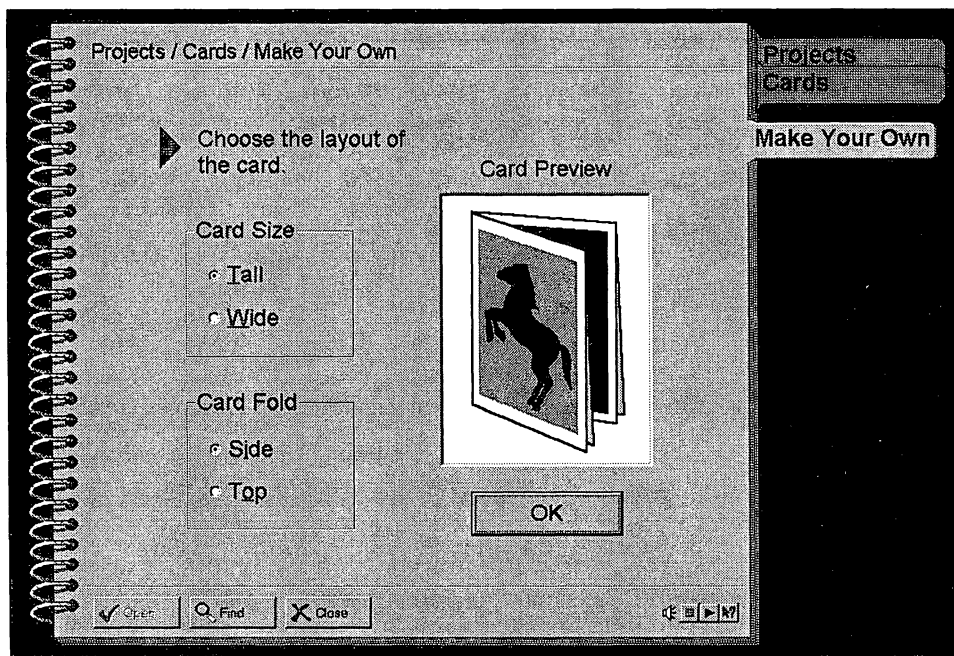

## To create a new Card:

---

1. Click the **Make Your Own** tab to start a new Card project.

2. When creating a new Card, you will be prompted to select a page layout for your new project. Use your mouse to select the **Card Size**.

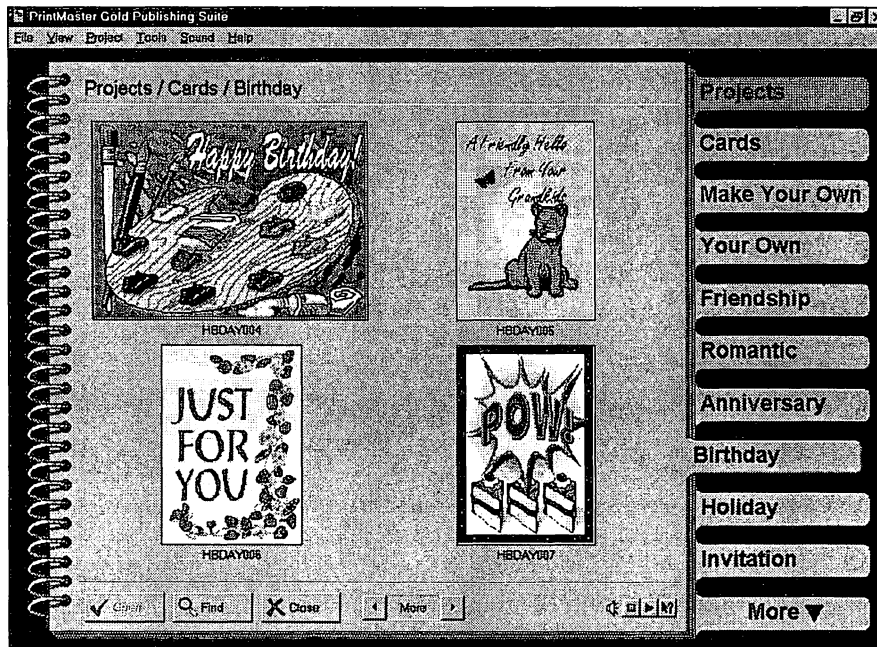

- The Size option **Tall** (or Portrait) prints text across the short width of the page.
- The Size option **Wide** (or Landscape) prints text across the long width of the page.

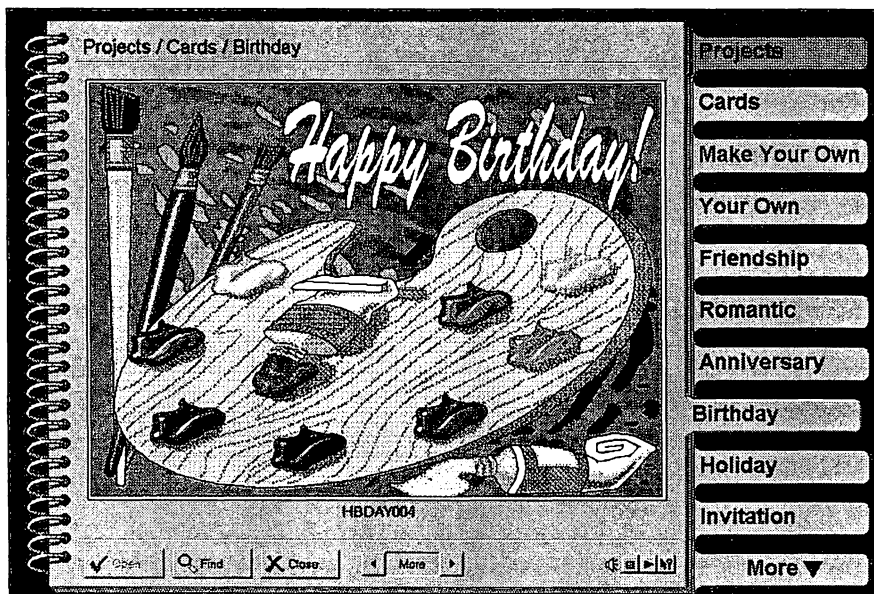

3. Select the location of the **Card Fold**.
  - The Fold option **Side** places the card fold on the left side of the card.
  - The Fold option **Top** places the card fold at the top of the card.
4. Click **OK** or press **ENTER** to begin editing your Card project.

## To open an existing Card:

1. Choose the category to open by clicking on its tab. To open your own previously saved Card projects, choose the tab labeled: **Your Own**.
2. Highlight a Card project by clicking on its preview. To see other Card projects within the same category, click the **More** arrow button on the bottom of the album.

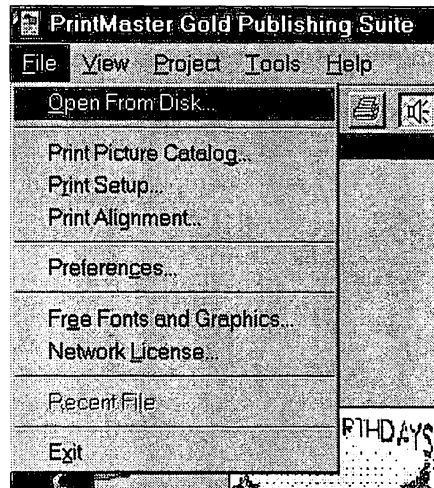

A larger sample can be viewed by opening the **View** menu and selecting the **Full-sized Projects** option. To return to the standard preview open the View menu again and select **Thumbnails**.

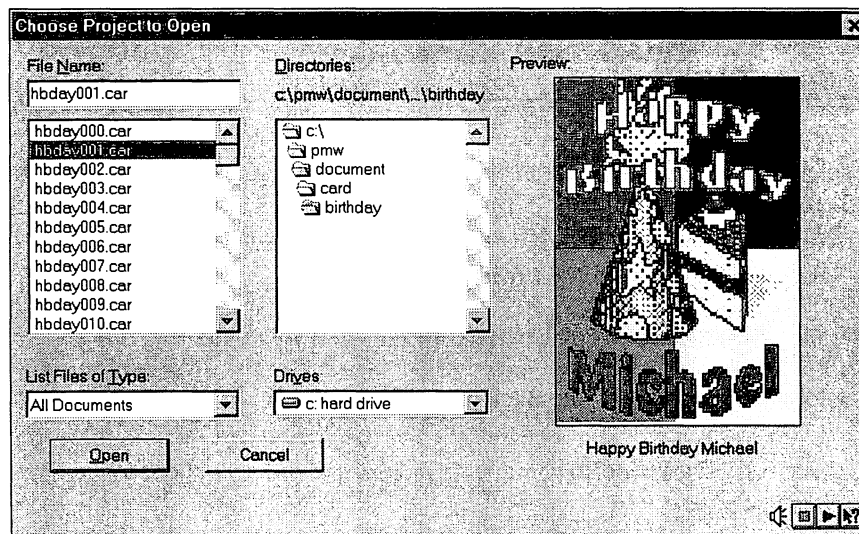

3. Click the **Open** button or press **ENTER** to open the selected Card project.

## Opening projects from another disk

1. To open a project from a floppy disk or another drive, pull down the **File** menu and select the **Open From Disk...** item.

2. Select a Card by clicking on its name in the File Name list—a preview of the highlighted Card will appear to the right.

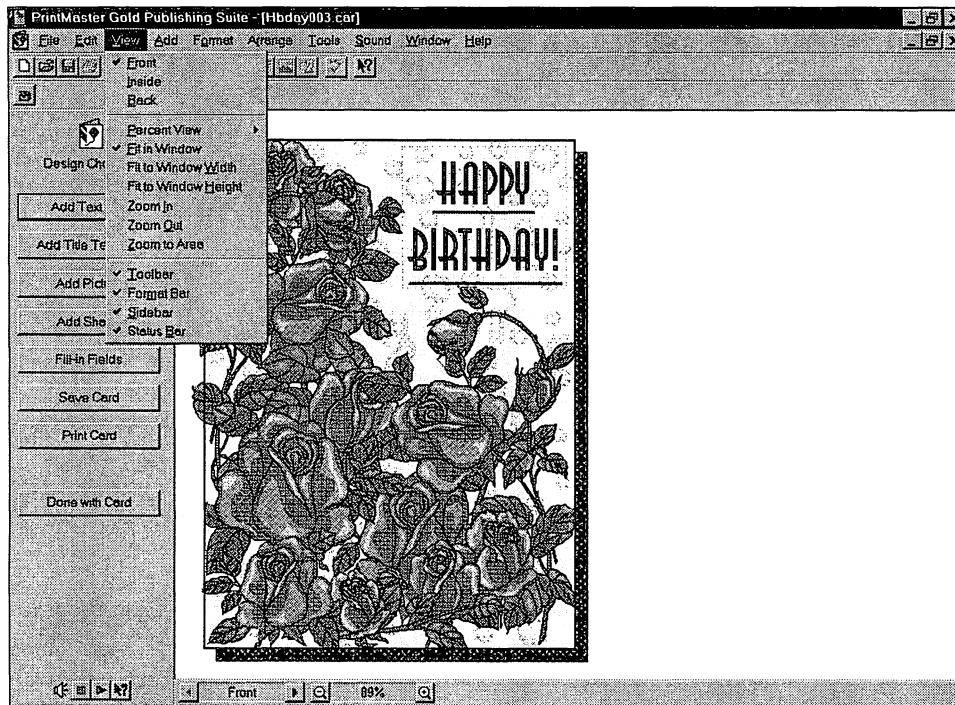

3. Click the **Open** button or press **ENTER** to open the selected Card project.

## Select the Panel to Edit

---

Cards are made up of four separate panels comprising the front, back, and inside surfaces of the Card. Each panel can have its own background, text, and picture elements. You select the Card panel you want to work on by pulling down the **View** menu.

You can also select a Card panel to work on by clicking on the corresponding arrow button located on the bottom of the screen.

**Front** — Select this option to edit the **Front** panel of your Card.

**Inside** — Select this option to edit the two **Inside** panels of your Card.

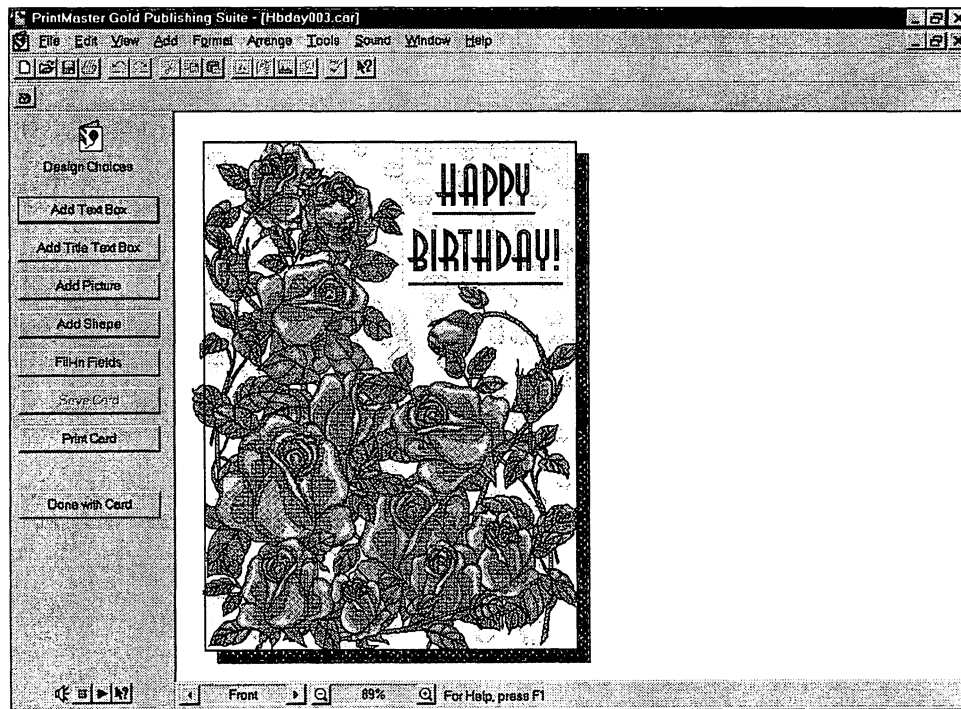

**Back** — Select this option to edit the **Back** panel of your Card.

Once you have selected a Card panel to work on the sidebar will display options for editing the background, text, and pictures in that panel.

## Card Design Choices

---

The Design Choices menu provides a list of key design elements and commands you can work with to create, print, and save your own customized Card projects. Additional commands and editing features may be accessed from the toolbar or menus at the top of the PrintMaster Gold screen.

Choose a design option by clicking on the corresponding sidebar button.

- |   |  |
|---|--|
|  | Click this button to begin working on your Card's <b>Text</b> .        |
|  | Click this button to begin working on <b>Title Text</b> for your Card. |
|  | Click this button to begin working on <b>Pictures</b> for your Card.   |
|  | Click this button to add <b>Shapes</b> to your Card.                   |

After confirming your selection, the sidebar will change to display the design elements available for editing your background, text, or pictures.

See the command reference sections later on in this guide for a complete description of working with backgrounds, text and pictures.

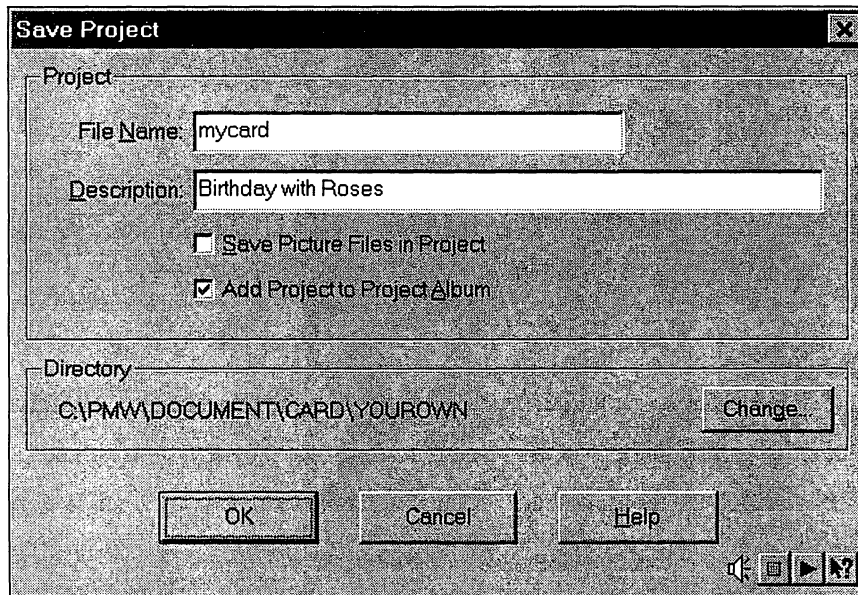

## Save Card

---

This command will enable you to save your Card project with a unique name and description that you provide.

1. Click the **Save Card** button located on the sidebar menu.

To save an existing Card project under a new name and description, select **Save As...** from the **File** menu. PrintMaster Gold will then prompt you to type in a new file name and description.

2. If you are saving a new Card project, PrintMaster Gold will prompt you for a unique file name. Type in the new **File Name** into the box provided.
3. You may also attach a short description to your Card project by typing it into the **Description** box.
4. To change the default drive and/or directory that your project will be saved to click **Change...** and select the new destination.
5. Click **OK** or press **[ENTER]** to save your Card project.

### Save Picture Files in Project

This function embeds a copy of the picture files used in your Card within the document itself so that the original picture file is not required the next time you open your Card.

This feature is particularly useful when using pictures that are selected from a floppy disk or CD. When selected PrintMaster Gold will not require you to insert the floppy disk or CD containing the picture(s) used each time you open your project.

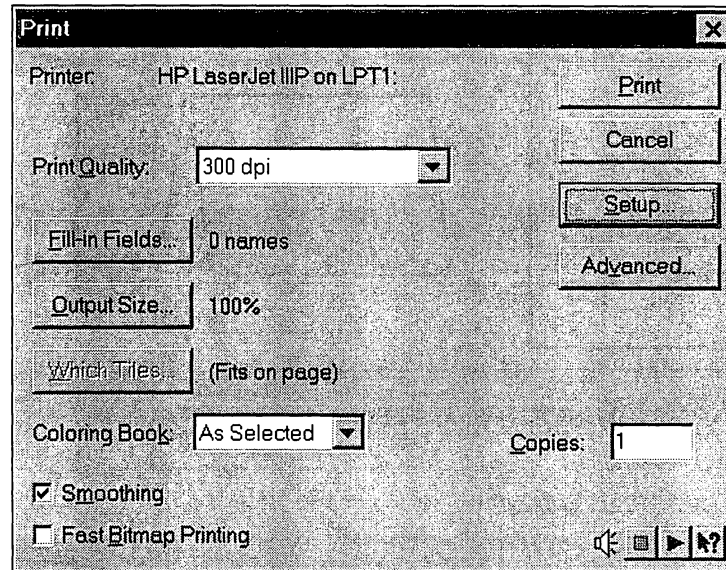

## Print Card

---

This option brings up the Print dialog enabling you to print your Card project. From this dialog you can also choose the number of printed copies, the print quality, and other features. See the chapter entitled: *Printing a Project* for more details.

1. Click the **Print Card** button to display the Print dialog box.
2. Click **Print** to begin printing your project.

## Done with Card

---

This option closes the Card project screen and returns you to the main PrintMaster Gold screen. From the main screen you can select other project types (*i.e., Banner, Calendar, etc.*) or exit the program.

1. Click the **Done with Card** button to exit and return to the main menu. If you have not already saved your Card, you will be prompted to do so at this point.

## How To Fold A Card

---

With the printed side facing down, bring the top and bottom edges together and crease the fold. With the inside of the card facing you, bring the left edge to the right edge (so that the card front is now on top) and crease the fold.

### Tall

### Wide

## Creating a Banner

Nothing grabs attention like a PrintMaster Gold Banner! You can celebrate special occasions in style. Your message will get across in a big way.

---

*All PrintMaster Gold projects are arranged in an onscreen album for easy access. Click the project tab located on the right side of the album to select a project category.*

---

### Beginning a Banner

The following instructions describe how to create a new Banner project, open an existing Banner project (or template), save a Banner project, and print a Banner project.

1. Click on the **Banners** tab located on the PrintMaster Gold project album to:
  - a. Start a *new* Banner project.
  - b. Open an *existing* Banner project (or template).

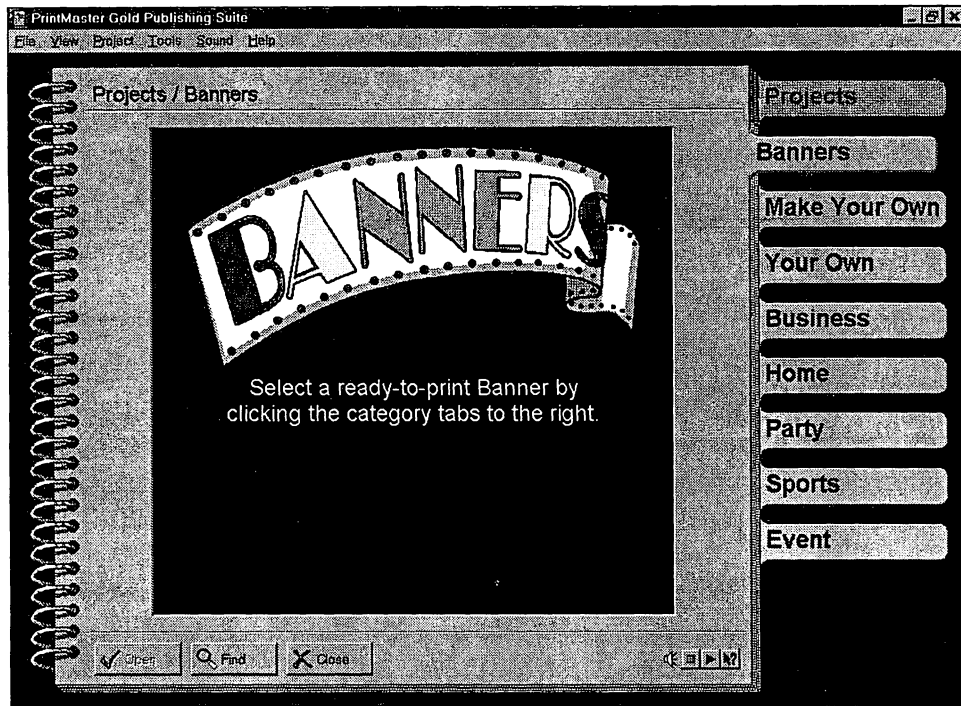

PrintMaster Gold provides many different categories of Banners from which you may choose from. To browse a category, simply click on its tab located on the project album.

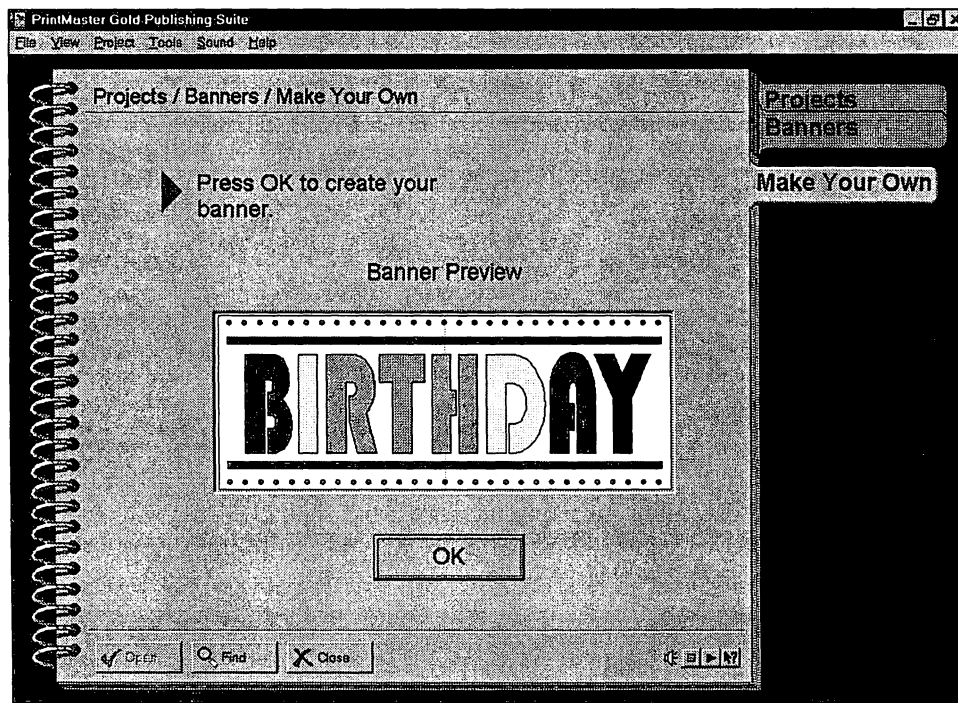

## To create a new Banner:

---

1. Click the **Make Your Own** tab to start a new Banner project.

2. Click **OK** or press **[ENTER]** to start editing your Banner.

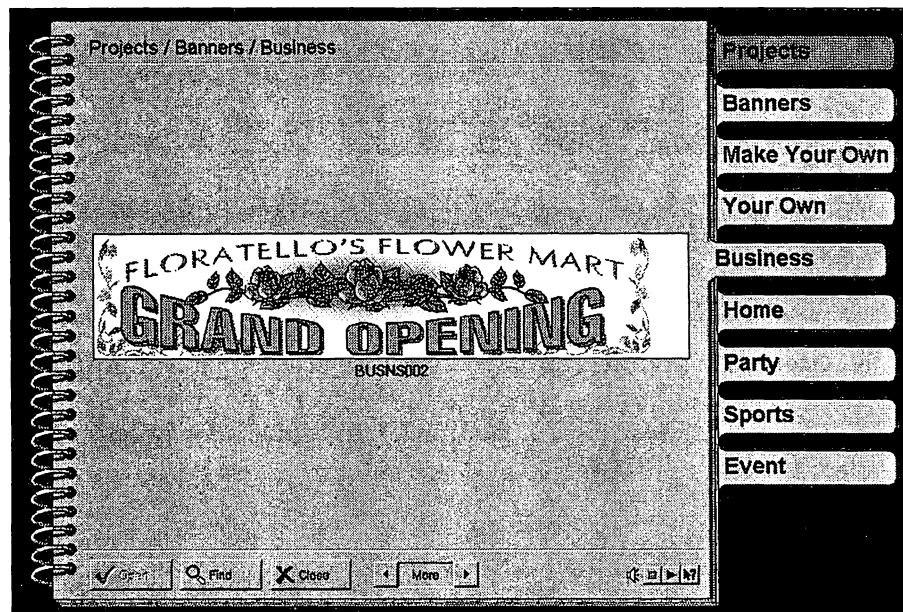

## To open an existing Banner:

---

1. Choose the category to open by clicking on its tab. To open your own previously saved Banner projects, choose the tab labeled: **Your Own**.
2. Highlight a Banner project by clicking on its preview. To see other Banner projects within the same category, click the **More** arrow button on the bottom of the album.

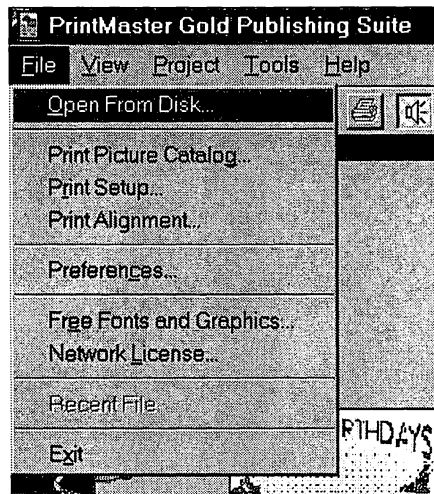

A larger sample can be viewed by opening the **View** menu and selecting the **Full-sized Projects** option. To return to the standard preview open the View menu again and select **Thumbnails**.

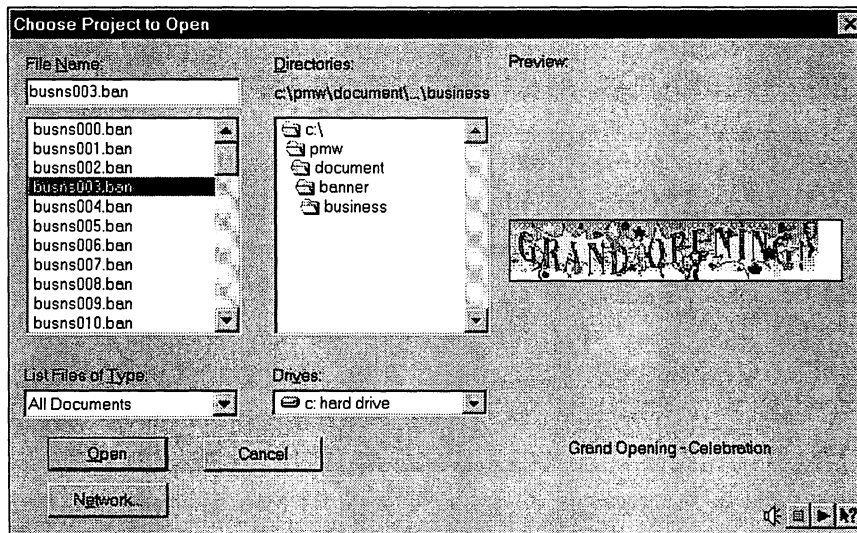

3. Click the **Open** button or press **[ENTER]** to open the selected Banner project.

## Opening projects from another disk

1. To open a project from a floppy disk, pull down the **File** menu and select the **Open From Disk...** item.

2. Select a Banner by clicking on its name in the File Name list—a preview of the highlighted Banner will appear to the right.

3. Click the **Open** button or press **[ENTER]** to open the selected Banner project.

## Banner Design Choices

---

The Design Choices menu provides a list of key design elements and commands you can work with to create, print, and save your own customized Banner projects. Additional commands and editing features may be accessed from the toolbar or menus at the top of the PrintMaster Gold screen.

Choose a design option by clicking on the corresponding sidebar button.

**Add Text Box**

Click this button to begin working on your Banner's **Text**.

**Add Title Text Box**

Click this button to begin working on **Title Text** for your Banner.

**Add Picture**

Click this button to begin working on **Pictures** for your Banner.

**Add Shape**

Click this button to add **Shapes** to your Banner.

After confirming your selection, the sidebar will change to display the design elements available for editing your background, text, or pictures.

See the command reference sections later on in this guide for a complete description of working with backgrounds, text and pictures.

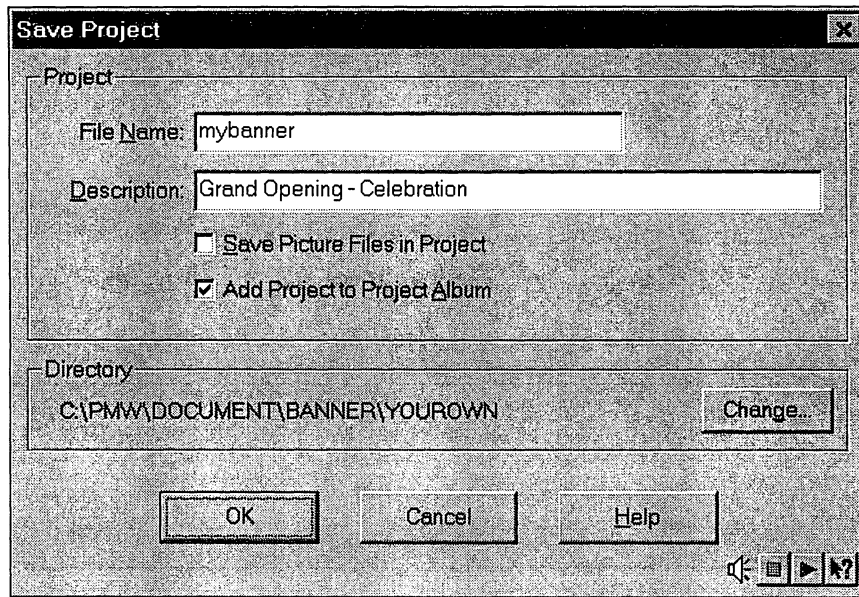

## Save Banner

---

This command will enable you to save your Banner project with a unique name and description that you provide.

1. Click the **Save Banner** button located on the sidebar menu.

To save an existing Banner project under a new name and description, select **Save As...** from the **File** menu. PrintMaster Gold will then prompt you to type in a new file name and description.

2. If you are saving a new Banner project, PrintMaster Gold will prompt you for a unique file name. Type in the new **File Name** into the box provided.
3. You may also attach a short description to your Banner project by typing it into the **Description** box.
4. To change the default drive and/or directory that your project will be saved to click **Change...** and select the new destination.
5. Click **OK** or press **ENTER** to save your Banner project.

### Save Picture Files in Project

This function embeds a copy of the picture files used in your Banner within the document itself so that the original picture file is not required the next time you open your Banner.

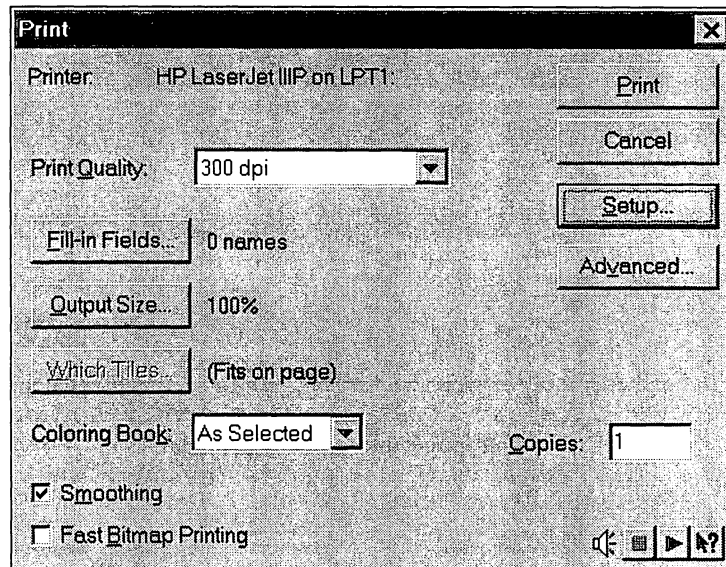

This feature is particularly useful when using pictures that are selected from a floppy disk or CD. When selected PrintMaster Gold will not require you to insert the floppy disk or CD containing the picture(s) used each time you open your project.

## Print Banner

---

This option brings up the Print dialog enabling you to print your Banner project. From this dialog you can also choose the number of printed copies, the print quality, and other features. See the chapter entitled: *Printing a Project* for more details.

1. Click the **Print Banner** button to display the Print dialog box.
2. Click **Print** to begin printing your project.

## Done with Banner

---

This option closes the Banner project screen and returns you to the main PrintMaster Gold screen. From the main screen you can select other project types (*i.e.*, *Banner*, *Calendar*, *etc.*) or exit the program.

1. Click the **Done with Banner** button to exit and return to the main menu. If you have not already saved your Banner, you will be prompted to do so at this point.

This page intentionally left blank.

# Creating a Poster

The Poster project can be used to create page-size Posters, Fliers, Bulletins, and Certificates—or Signs that cover an entire wall!

*All PrintMaster Gold projects are arranged in an on screen album for easy access. Click the project tab located on the right side of the album to select a project category.*

## Beginning a Poster

The following instructions describe how to create a new Poster project, open an existing Poster project (or template), save a Poster project, and print a Poster project.

1. Click on the **Posters** tab located on the PrintMaster Gold project album to:

  - a. Start a *new* Poster project.
  - b. Open an *existing* Poster project (or template).

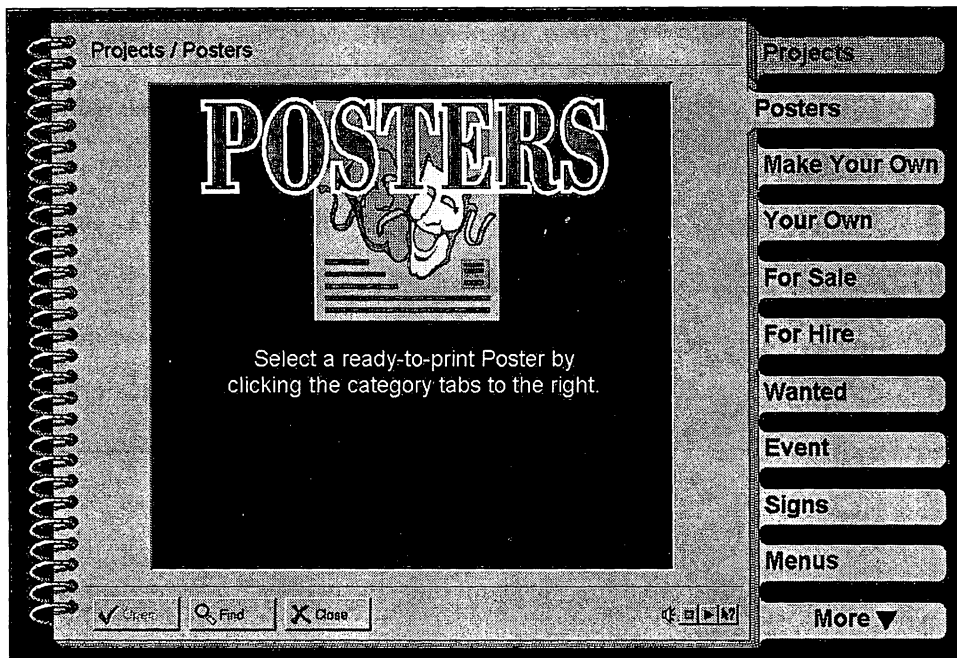

PrintMaster Gold provides many different categories of Posters from which you may choose from. To browse a category, simply click on its tab located on the project album.

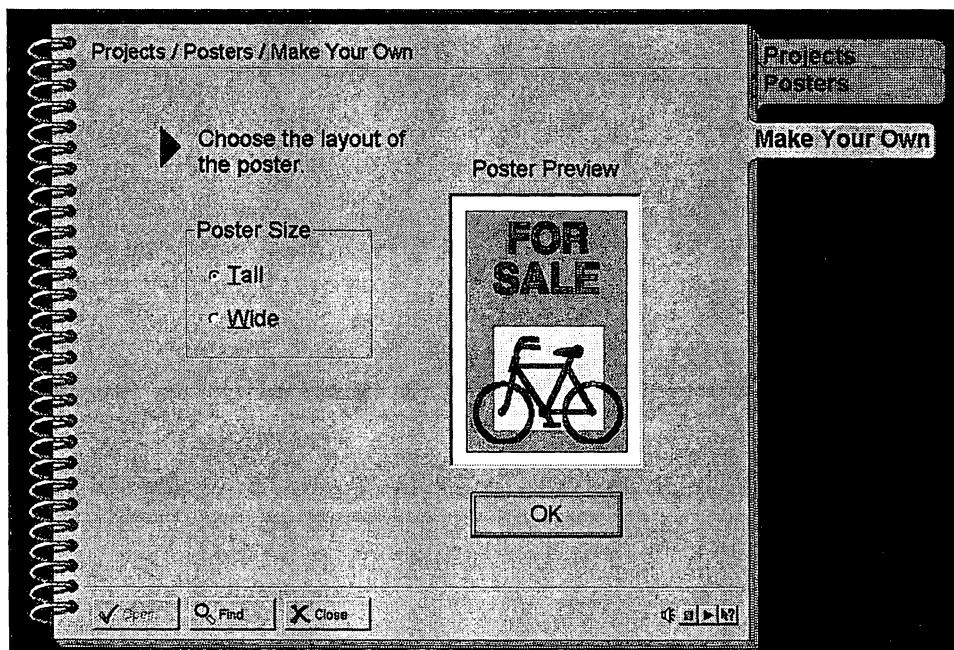

## To create a new Poster:

---

1. Click the **Make Your Own** tab to start a new Poster project.

2. When creating a new Poster, you will be prompted to select a page layout for your new project. Use your mouse to select the **Poster Size**.

- The Size option **Tall** (or Portrait) prints text across the short width of the paper.
- The Size option **Wide** (or Landscape) prints text across the long width of the paper.

## To open an existing Poster:

1. Choose the category to open by clicking on its tab. To open your own saved Poster projects, click the **More** tab and choose the tab labeled: **Your Own**.
2. Highlight a Poster project by clicking on its preview. To see other Poster projects within the same category click the **More** arrow button on the bottom section of the album.

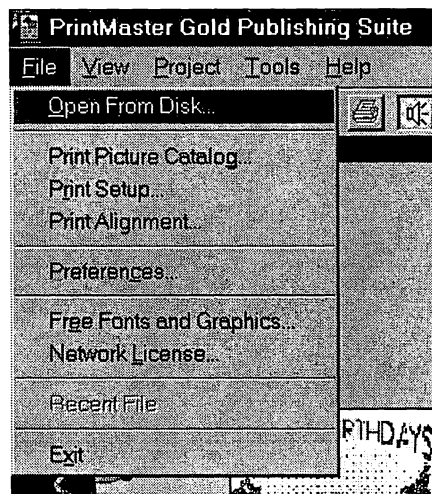

A larger sample can be viewed by opening the **View** menu and selecting the **Full-sized Projects** option. To return to the standard preview open the View menu again and select **Thumbnails**.

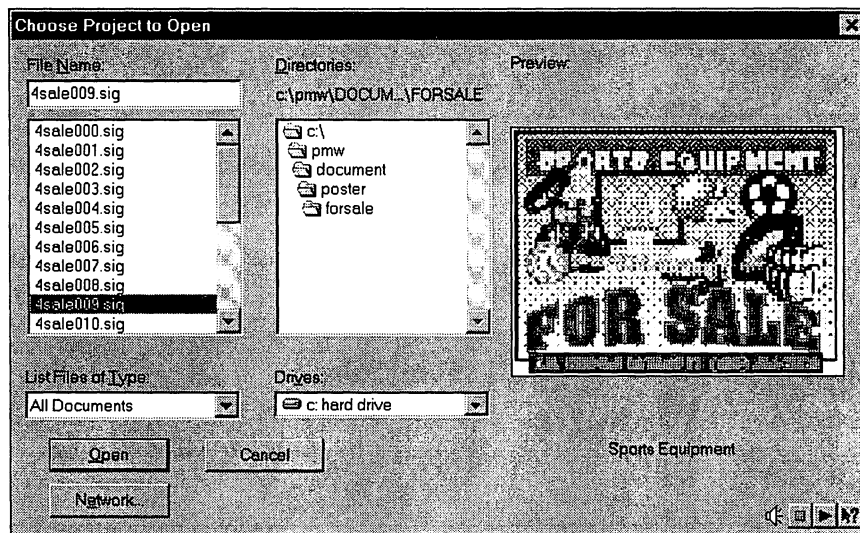

3. Click the **Open** button or press **ENTER** to open the selected Poster project.

## Opening projects from another disk

1. To open a project from a floppy disk, pull down the **File** menu and select the **Open From Disk...** item.

2. Select a Poster by clicking on its name in the File Name list—a preview of the highlighted Poster will appear to the right.

3. Click the **Open** button or press **(ENTER)** to open the selected Poster project.

## Poster Design Choices

---

The Design Choices menu provides a list of key design elements and commands you can work with to create, print, and save your own customized Poster projects. Additional commands and editing features may be accessed from the toolbar or menus at the top of the PrintMaster Gold screen.

Choose a design option by clicking on the corresponding sidebar button.

Click this button to begin working on your Poster's **Text**.

Click this button to begin working on **Title Text** for your Poster.

Click this button to begin working on **Pictures** for your Poster.

Click this button to add **Shapes** to your Poster.

After confirming your selection, the sidebar will change to display the design elements available for editing your background, text, or pictures.

See the command reference sections later on in this guide for a complete description of working with backgrounds, text and pictures.

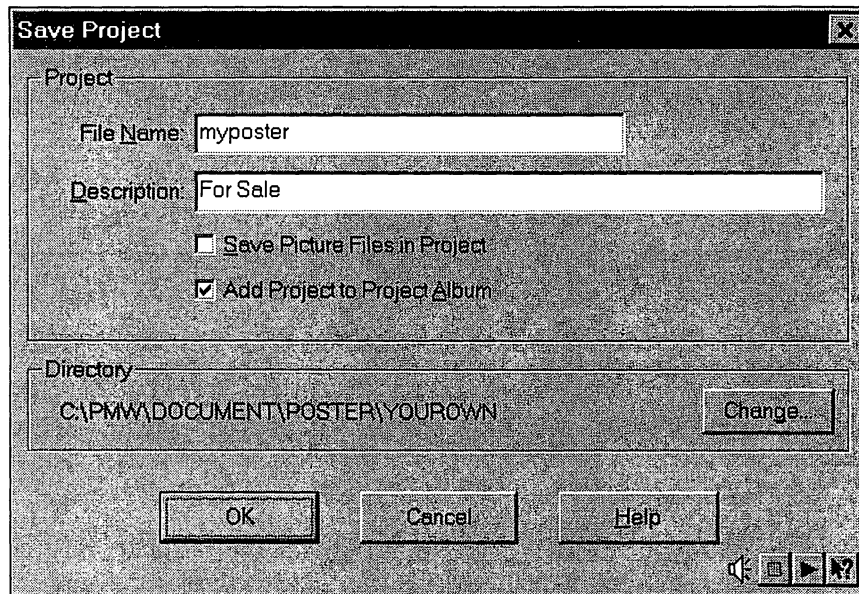

## Save Poster

---

This command will enable you to save your Poster project with a unique name and description that you provide.

1. Click the **Save Poster** button located on the sidebar menu.

To save an existing Poster project under a new name and description, select **Save As...** from the **File** menu. PrintMaster Gold will then prompt you to type in a new file name and description.

2. If you are saving a new Poster project, PrintMaster Gold will prompt you for a unique file name. Type in the new **File Name** into the box provided.
3. You may also attach a short description to your Poster project by typing it into the **Description** box.
4. To change the default drive and/or directory that your project will be saved to click **Change...** and select the new destination.
5. Click **OK** or press **ENTER** to save your Poster project.

### Save Picture Files in Project

This function embeds a copy of the picture files used in your Poster within the document itself so that the original picture file is not required the next time you open your Poster.

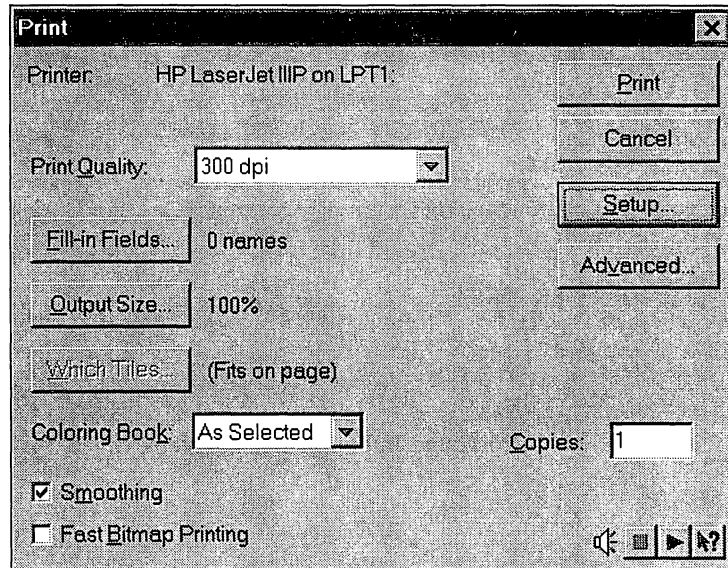

This feature is particularly useful when using pictures that are selected from a floppy disk or CD. When selected PrintMaster Gold will not require you to insert the floppy disk or CD containing the picture(s) used each time you open your project.

## Print Poster

---

This option brings up the Print dialog enabling you to print your Poster project. From this dialog you can also choose the number of printed copies, the print quality, and other features. See the chapter entitled: *Printing a Project* for more details.

1. Click the **Print Poster** button to display the Print dialog box.
2. Click **Print** to begin printing your project.

## Done with Poster

---

This option closes the Poster project screen and returns you to the main PrintMaster Gold screen. From the main screen you can select other project types (*i.e.*, *Banner*, *Calendar*, *etc.*) or exit the program.

1. Click the **Done with Poster** button to exit and return to the main menu. If you have not already saved your Poster, you will be prompted to do so at this point.

This page intentionally left blank.

# Creating a Newsletter

The Newsletter project can be used to create Newsletters, Bulletins, Newspapers, and other multi-page documents.

---

*All PrintMaster Gold projects are arranged in an on screen album for easy access. Click the project tab located on the right side of the album to select a project category.*

---

## Beginning a Newsletter

The following instructions describe how to create a new Newsletter project, open an existing Newsletter project (or template), save a Newsletter project, and print a Newsletter project.

1. Click on the **Newsletters** tab located on the PrintMaster Gold project album to:
  - a. Start a *new* Newsletter project.
  - b. Open an *existing* Newsletter project (or template).

PrintMaster Gold provides many different categories of Newsletters from which you may choose from. To browse a category, simply click on its tab located on the project album.

## To create a new Newsletter:

---

1. Click the **Make Your Own** tab to start a new Newsletter project.
2. When creating a new Newsletter, you will be prompted to select a page layout for your new project. Use your mouse to select the **Newsletter Size**.
  - The Size option **Tall** (or Portrait) prints text across the short width of the paper.
  - The Size option **Wide** (or Landscape) prints text across the long width of the paper.

## To open an existing Newsletter:

---

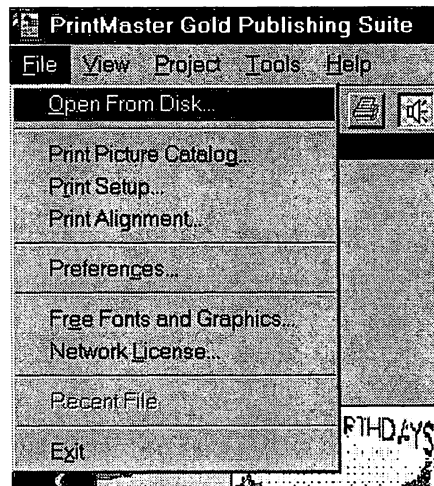

1. Choose the category to open by clicking on its tab. To open your own saved Newsletter projects, click the **More** tab and choose the tab labeled: **Your Own**.
2. Highlight a Newsletter project by clicking on its preview. To see other Newsletter projects within the same category click the **More** arrow button on the bottom right section of the album.

A larger sample can be viewed by opening the **View** menu and selecting the **Full-sized Projects** option. To return to the standard preview open the View menu again and select **Thumbnails**.

3. Click the **Open** button or press **[ENTER]** to open the selected Newsletter project.

### Opening projects from another disk

1. To open a project from a floppy disk, pull down the **File** menu and select the **Open From Disk...** item.

2. Select a Newsletter by clicking on its name in the File Name list—a preview of the highlighted Newsletter will appear to the right.
3. Click the **Open** button or press **[ENTER]** to open the selected Newsletter project.

## Newsletter Design Choices

---

The Design Choices menu provides a list of key design elements and commands you can work with to create, print, and save your own customized Newsletter projects. Additional commands and editing features may be accessed from the toolbar or menus at the top of the PrintMaster Gold screen.

Choose a design option by clicking on the corresponding sidebar button.

Click this button to begin working on your Newsletter's **Text**.

Click this button to begin working on **Title Text** for your Newsletter.

Click this button to begin working on **Pictures** for your Newsletter.

Click this button to add **Shapes** to your Newsletter.

After confirming your selection, the sidebar will change to display the design elements available for editing your background, text, or pictures.

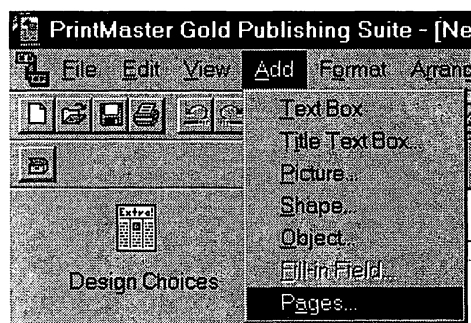

See the command reference sections later on in this guide for a complete description of working with backgrounds, text and pictures.

## Inserting Additional Pages

---

One of the unique features of a Newsletter project is the ability to work with multiple pages. To insert additional pages to your Newsletter proceed as follows:

1. Pull down the **Add** menu with your mouse and select **Pages**, or press **[ALT]+[A]+[A]** on your keyboard.

2. In the dialog displayed, type in the number of pages to add.

**Where** — Use this option to determine the placement of additional pages. Choose either:

- **Before Current Page**
- **After Current Page**

**Contents** — Use this option what type of pages to add to your Newsletter. Choose either:

- **Add Blank Pages**
- **Add Copies of Page** — Use this option to duplicate existing pages by typing in the page number of section to duplicate.

3. Press **[ENTER]** or click **OK** to add your new pages.

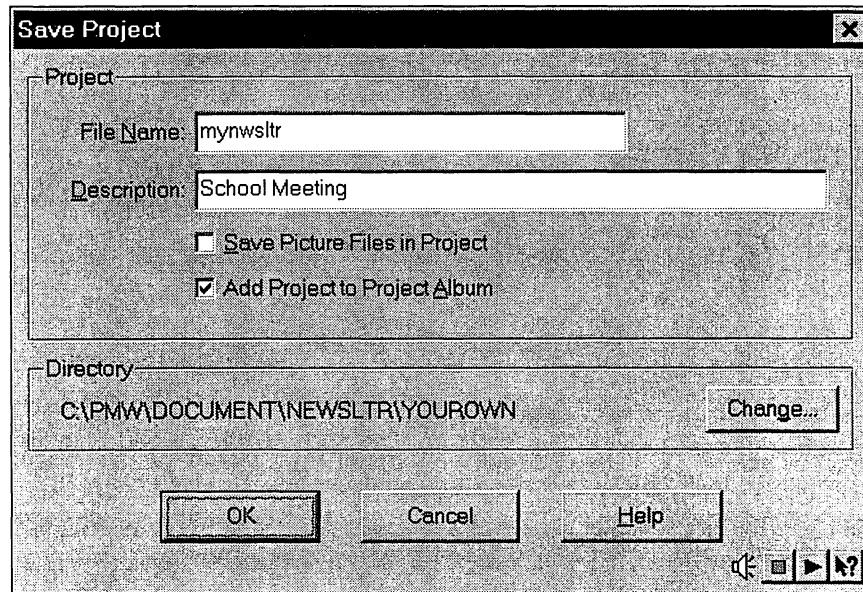

## Save Newsletter

---

This command will enable you to save your Newsletter project with a unique name and description that you provide.

1. Click the **Save Newsletter** button located on the sidebar menu.

To save an existing Newsletter project under a new name and description, select **Save As...** from the **File** menu. PrintMaster Gold will then prompt you to type in a new file name and description.

2. If you are saving a new Newsletter project, PrintMaster Gold will prompt you for a unique file name. Type in the new **File Name** into the box provided.
3. You may also attach a short description to your Newsletter project by typing it into the **Description** box.
4. To change the default drive and/or directory that your project will be saved to click **Change...** and select the new destination.
5. Click **OK** or press **ENTER** to save your Newsletter project.

### Save Picture Files in Project

This function embeds a copy of the picture files used in your Newsletter within the document itself so that the original picture file is not required the next time you open your Newsletter.

This feature is particularly useful when using pictures that are selected from a floppy disk or CD. When selected PrintMaster Gold will not require you to insert the floppy disk or CD containing the picture(s) used each time you open your project.

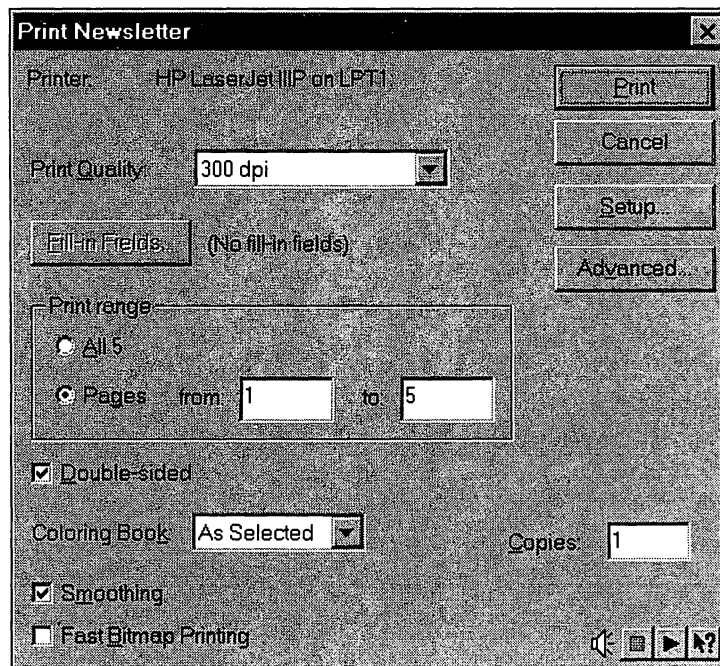

## Print Newsletter

---

This option brings up the Print dialog enabling you to print your Newsletter project. From this dialog you can also choose the number of printed copies, the print quality, and other features. See the chapter entitled: *Printing a Project* for more details.

1. Click the **Print Newsletter** button to display the Print dialog box.
2. Click **Print** to begin printing your project.

**Print Range** — Use this option to select what pages of your multi-page document to print.

## Done with Newsletter

---

This option closes the Newsletter project screen and returns you to the main PrintMaster Gold screen. From the main screen you can select other project types (*i.e.*, *Banner*, *Calendar*, *etc.*) or exit the program.

1. Click the **Done with Newsletter** button to exit and return to the main menu. If you have not already saved your Newsletter, you will be prompted to do so at this point.

# Creating a Brochure

The Brochure project can be used to create Fliers, Pamphlets, Mailers and other types of advertisement or informative literature.

---

*All PrintMaster Gold projects are arranged in an on screen album for easy access. Click the project tab located on the right side of the album to select a project category.*

---

## Beginning a Brochure

The following instructions describe how to create a new Brochure project, open an existing Brochure project, save a Brochure project, and print a Brochure project.

1. Click on the **Brochures** tab located on the PrintMaster Gold project album to:

  - a. Start a *new* Brochure project.
  - b. Open an *existing* Brochure project (or template).

PrintMaster Gold provides many different categories of Brochures from which you may choose from. To browse a category, simply click on its tab located on the project album.

## To create a new Brochure:

---

1. Click the **Make Your Own** tab to start a new Brochure project.
2. When creating a new Brochure, you will be prompted to select a page layout for your new project. Use your mouse to select the **Brochure Size**.
  - The Size option **Tall** (or Portrait) prints text across the short width of the paper.
  - The Size option **Wide** (or Landscape) prints text across the long width of the paper.

## To open an existing Brochure:

---

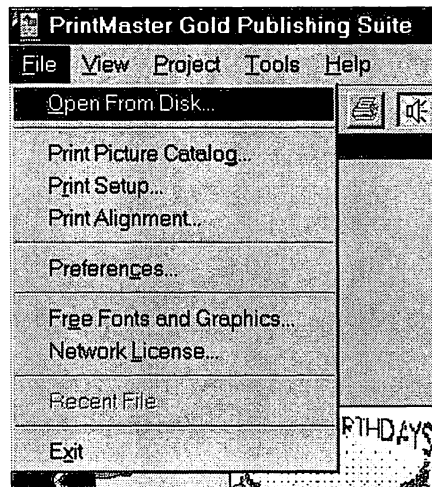

1. Choose the category to open by clicking on its tab. To open your own saved Brochure projects, click the **More** tab and choose the tab labeled: **Your Own**.
2. Highlight a Brochure project by clicking on its preview. To see other Brochure projects within the same category click the **More** arrow button on the bottom section of the album.

A larger sample can be viewed by opening the **View** menu and selecting the **Full-sized Projects** option. To return to the standard preview open the View menu again and select **Thumbnails**.

3. Click the **Open** button or press **[ENTER]** to open the selected Brochure project.

### Opening projects from another disk

1. To open a project from a floppy disk, pull down the **File** menu and select the **Open From Disk...** item.

2. Select a Brochure by clicking on its name in the File Name list—a preview of the highlighted Brochure will appear to the right.
3. Click the **Open** button or press **[ENTER]** to open the selected Brochure project.

## Select a Side to Edit

---

Brochures are made up of two separate sides comprising the front and back surfaces of the Brochure. Each side can have its own background, text, and picture elements. You select the Brochure side you want to work on by pulling down the **View** menu.

You can also select a Brochure side to work on by clicking on the corresponding arrow button located on the bottom of the screen.

**Front** — Select this option to edit the **Front** side of your Brochure.

**Back** — Select this option to edit the **Back** panel of your Brochure.

Once you have selected a Brochure side to work on the sidebar will display options for editing the background, text, and pictures in that panel.

## Brochure Design Choices

---

The Design Choices menu provides a list of key design elements and commands you can work with to create, print, and save your own customized Brochure projects. Additional commands and editing features may be accessed from the toolbar or menus at the top of the PrintMaster Gold screen.

Choose a design option by clicking on the corresponding sidebar button.

**Add Text Box**

Click this button to begin working on your Brochure's **Text**.

**Add Title Text Box**

Click this button to begin working on **Title Text** for your Brochure.

**Add Picture**

Click this button to begin working on **Pictures** for your Brochure.

**Add Shape**

Click this button to add **Shapes** to your Brochure.

After confirming your selection, the sidebar will change to display the design elements available for editing your background, text, or pictures.

See the command reference sections later on in this guide for a complete description of working with backgrounds, text and pictures.

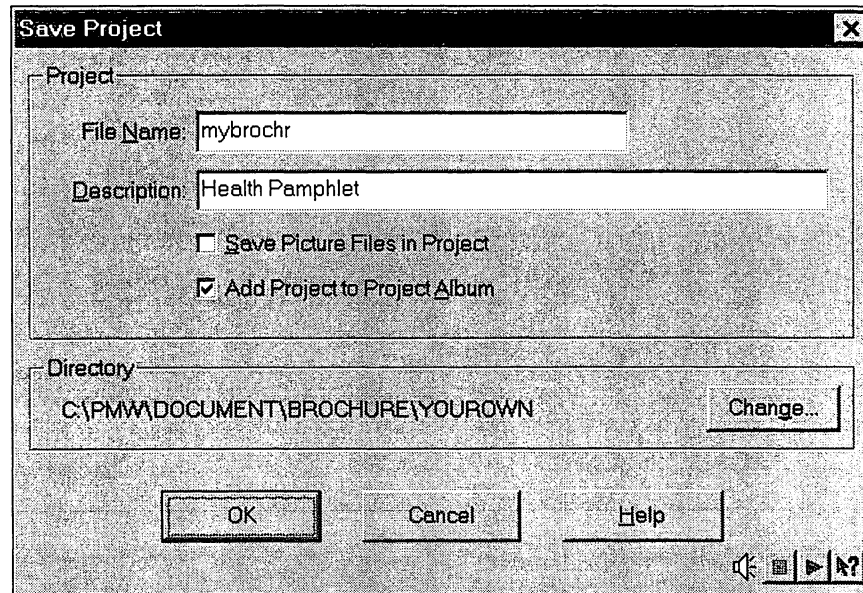

## Save Brochure

---

This command will enable you to save your Brochure project with a unique name and description that you provide.

1. Click the **Save Brochure** button located on the sidebar menu.

To save an existing Brochure project under a new name and description, select **Save As...** from the **File** menu. PrintMaster Gold will then prompt you to type in a new file name and description.

2. If you are saving a new Brochure project, PrintMaster Gold will prompt you for a unique file name. Type in the new **File Name** into the box provided.
3. You may also attach a short description to your Brochure project by typing it into the **Description** box.
4. To change the default drive and/or directory that your project will be saved to click **Change...** and select the new destination.
5. Click **OK** or press **[ENTER]** to save your Brochure project.

### Save Picture Files in Project

This function embeds a copy of the picture files used in your Brochure within the document itself so that the original picture file is not required the next time you open your Brochure.

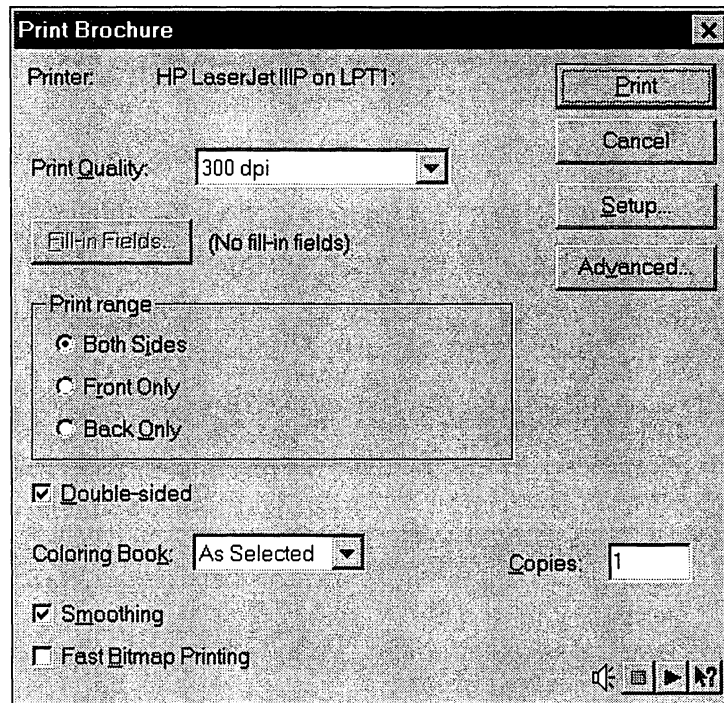

This feature is particularly useful when using pictures that are selected from a floppy disk or CD. When selected PrintMaster Gold will not require you to insert the floppy disk or CD containing the picture(s) used each time you open your project.

## Print Brochure

---

This option brings up the Print dialog enabling you to print your Brochure project. From this dialog you can also choose the number of printed copies, the print quality, and other features. See the chapter entitled: *Printing a Project* for more details.

1. Click the **Print Brochure** button to display the Print dialog box.
2. Click **Print** to begin printing your project.

**Print Range** — Use this option to select what side (Front, Back, or Both) of your Brochure to send to the printer.

## Done with Brochure

---

This option closes the Brochure project screen and returns you to the main PrintMaster Gold screen. From the main screen you can select other project types (*i.e.*, *Banner*, *Calendar*, *etc.*) or exit the program.

1. Click the **Done with Brochure** button to exit and return to the main menu. If you have not already saved your Brochure, you will be prompted to do so at this point.

# Creating a Calendar

With PrintMaster Gold you can design a Calendar to fit in your wallet or fill a bulletin board. Monthly and weekly calendar styles are available and any day can be enhanced with both text and pictures.

---

*All PrintMaster Gold projects are arranged in an on screen album for easy access. Click the project tab located on the right side of the album to select a project category.*

---

## Beginning a Calendar

The following instructions describe how to create a new Calendar project, open an existing Calendar project (or template), save a Calendar project, and print a Calendar project.

1. Click on the **Calendars** tab located on the PrintMaster Gold project album to:

  - a. Start a *new* Calendar project.
  - b. Open an *existing* Calendar project (or template).

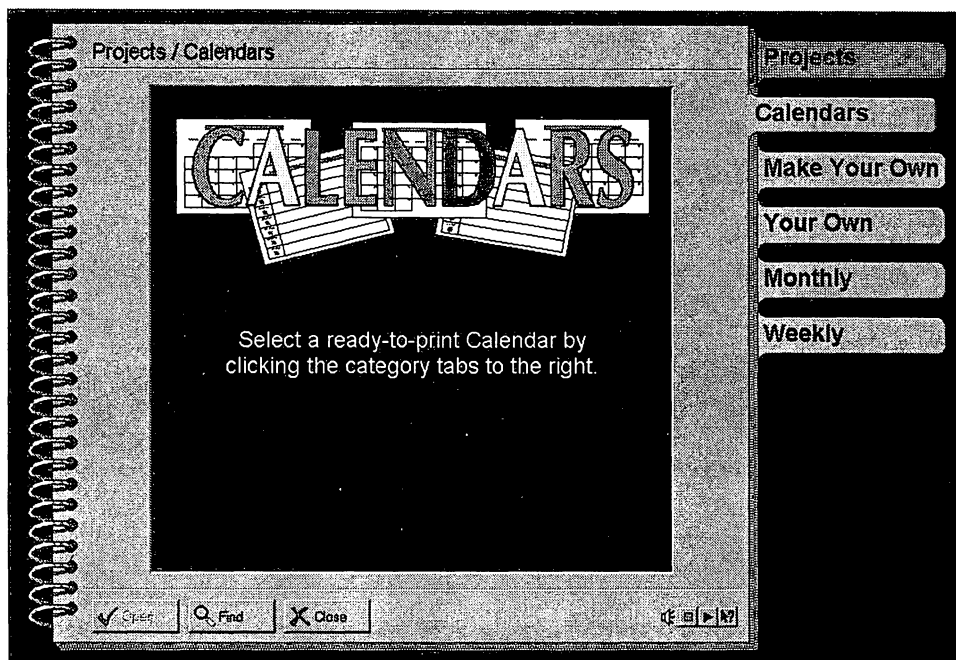

PrintMaster Gold provides many different categories of Calendars from which you may choose from. To browse a category, simply click on its tab located on the project album.

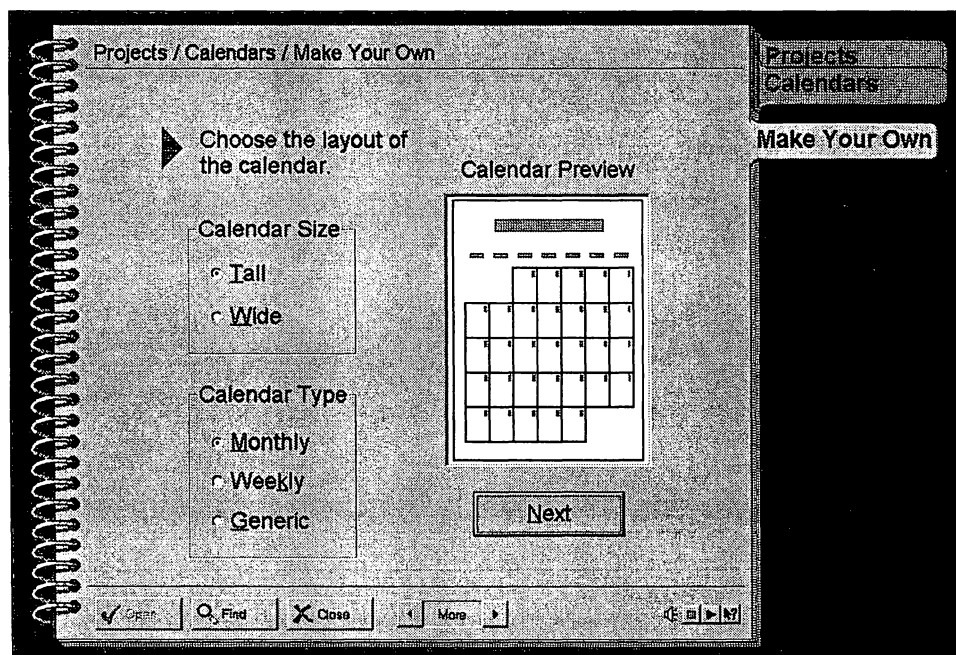

## To create a new Calendar:

---

1. Click the **Make Your Own** tab to start a new Calendar project.

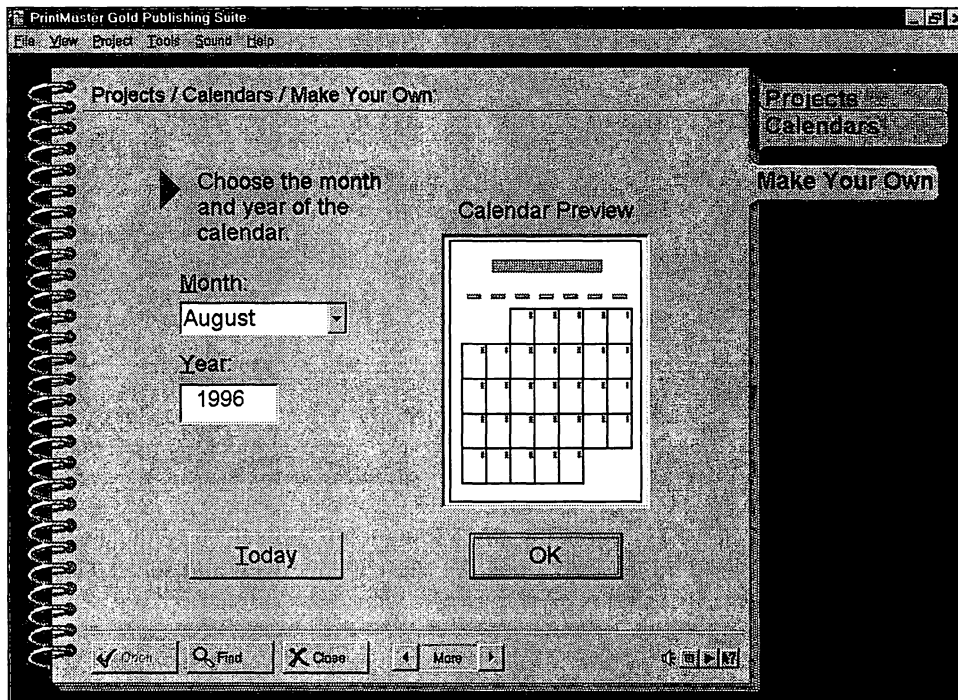

2. When creating a new Calendar, you will be prompted to select a page layout for your new project. First, use your mouse to select the **Calendar Size**.

- The Size option **Tall** (or Portrait) prints text across the short width of the paper.
- The Size option **Wide** (or Landscape) prints text across the long width of the paper.

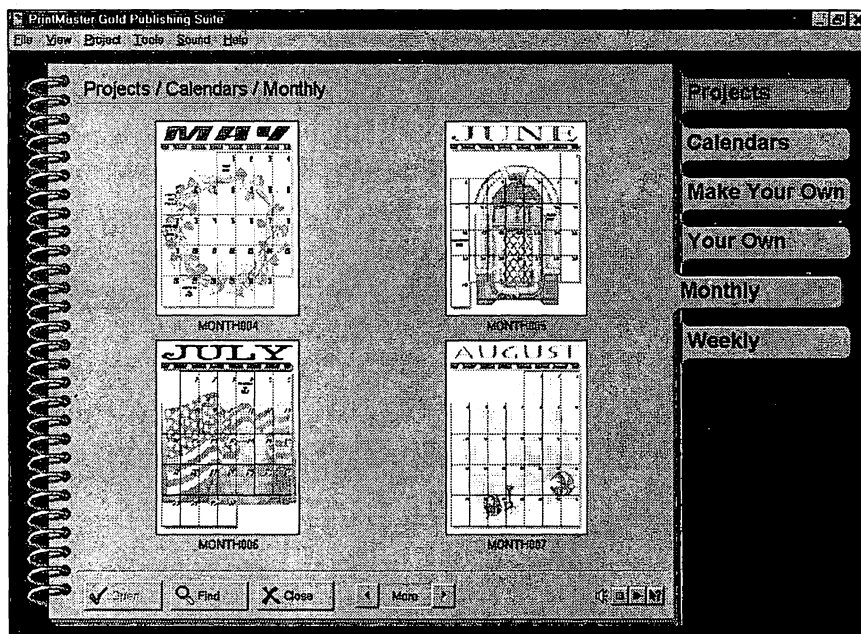

3. PrintMaster Gold supports three **Calendar Types**. Choose the desired type and click **Next** or press **ENTER**.
  - **Monthly** Calendars show a full month of dates.
  - **Weekly** Calendars show a single week of dates.
  - **Generic** Calendars are weekly Calendars without any specific date numbers.
4. Select the Calendar date (Month and Year. Also choose the Week for Weekly Calendars) Click the **Today** button to select today's date. PrintMaster Gold will automatically label each day of Monthly and Weekly Calendars with the proper numbers based on the selected date.

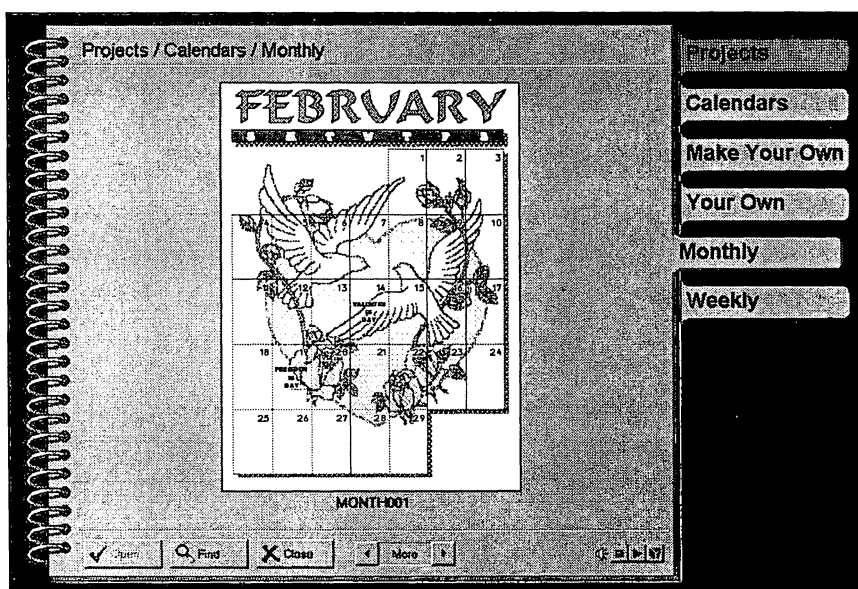

5. Click **OK** or press **ENTER** to begin editing your Calendar project.

## To open an existing Calendar:

1. Choose the category to open by clicking on its tab. To open your own saved Calendar projects, click the tab labeled: **Your Own**.
2. Highlight a Calendar project by clicking on its preview. To see other Calendar projects within the same category click the **More** arrow button on the bottom section of the album.

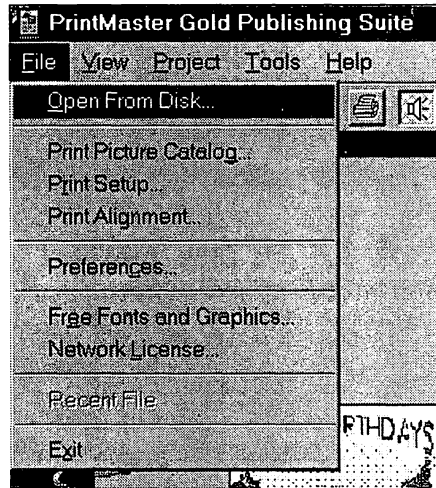

A larger sample can be viewed by opening the **View** menu and selecting the **Full-sized Projects** option. To return to the standard preview open the View menu again and select **Thumbnails**.

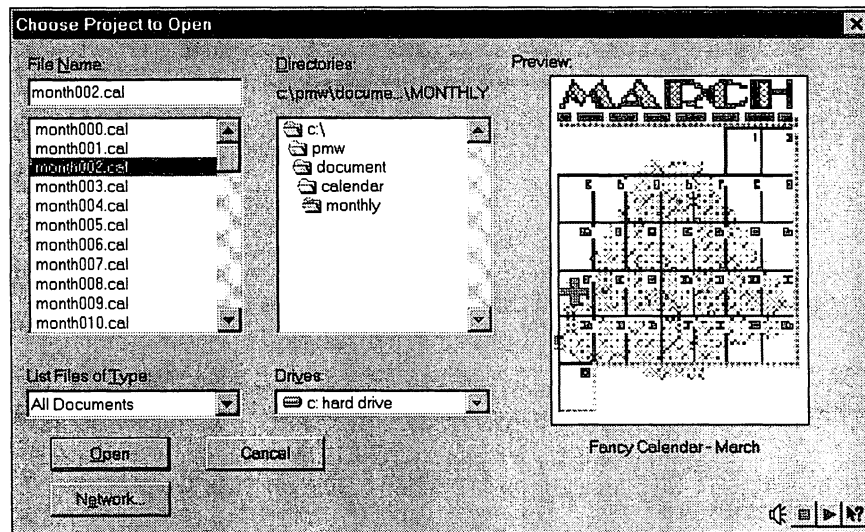

3. Click the **Open** button or press **[ENTER]** to open the selected Calendar project.

## Opening projects from another disk

1. To open a project from a floppy disk, pull down the **File** menu and select the **Open From Disk...** item.

2. Select a Calendar by clicking on its name in the File Name list—a preview of the highlighted Calendar will appear to the right.

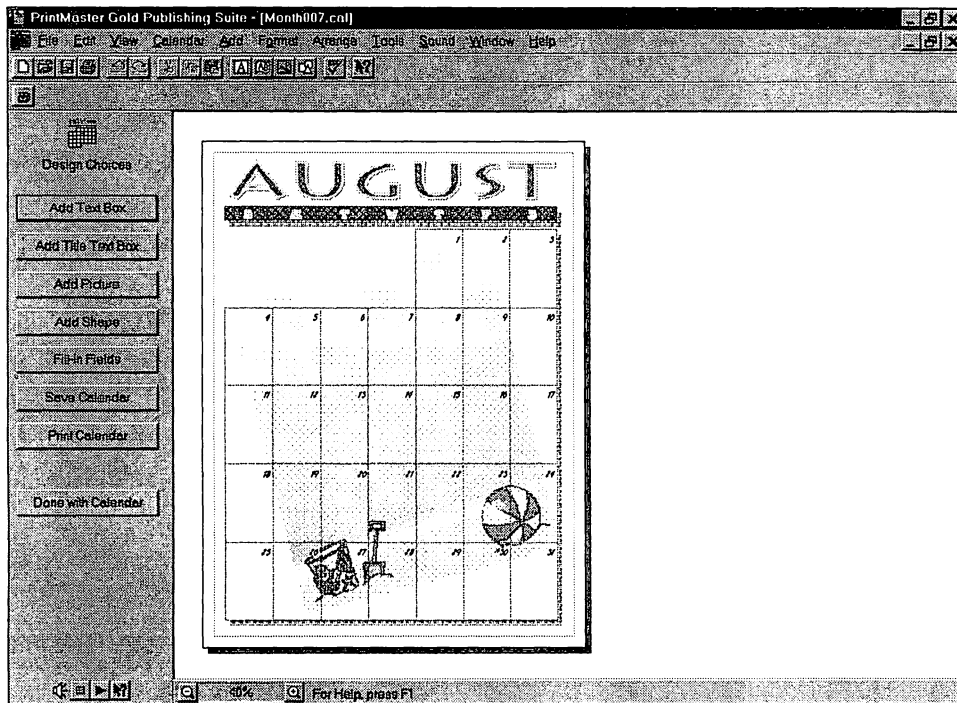

3. Click the **Open** button or press **ENTER** to open the selected Calendar project.

## Calendar Design Choices

---

The Design Choices menu provides a list of key design elements and commands you can work with to create, print, and save your own customized Calendar projects. Additional commands and editing features may be accessed from the toolbar or menus at the top of the PrintMaster Gold screen.

Choose a design option by clicking on the corresponding sidebar button.

Click these buttons to place independent text and picture frames onto your Calendar project. These elements are not tied to a particular date, but can be sized and positioned freely.

Click this button to begin working on your Calendar's **Text**.

Click this button to begin working on **Title Text** for your Calendar.

Click this button to begin working on **Pictures** for your Calendar.

Click this button to add **Shapes** to your Calendar.

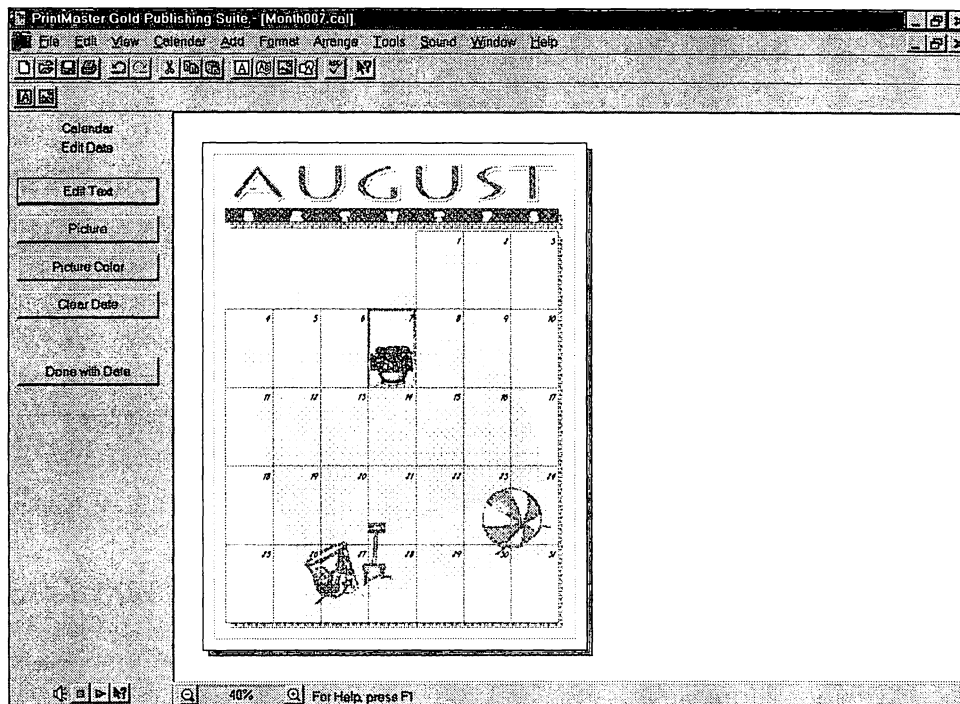

After confirming your selection, the sidebar will change to display the design elements available for editing your background, text, or pictures.

See the command reference sections later on in this guide for a complete description of working with backgrounds, text and pictures.

## Editing a Date

---

Text and pictures can be added to a particular date by simply clicking on the date box with your mouse. The sidebar will change to the **Edit Date** menu shown below. Use the options shown in the sidebar to edit the text and pictures in the box.

### Edit Text

This option enables you to edit the text inside of a date box. See the command reference sections later on in this guide for a complete description of editing text in PrintMaster Gold.

### Picture

This option enables you to attach a picture to a date box. Only a single picture is allowed per date and the picture is always sized to fit the box.

### Picture Color

This features enables you to change the color shading of a picture attached to a date box.

### Done with Date

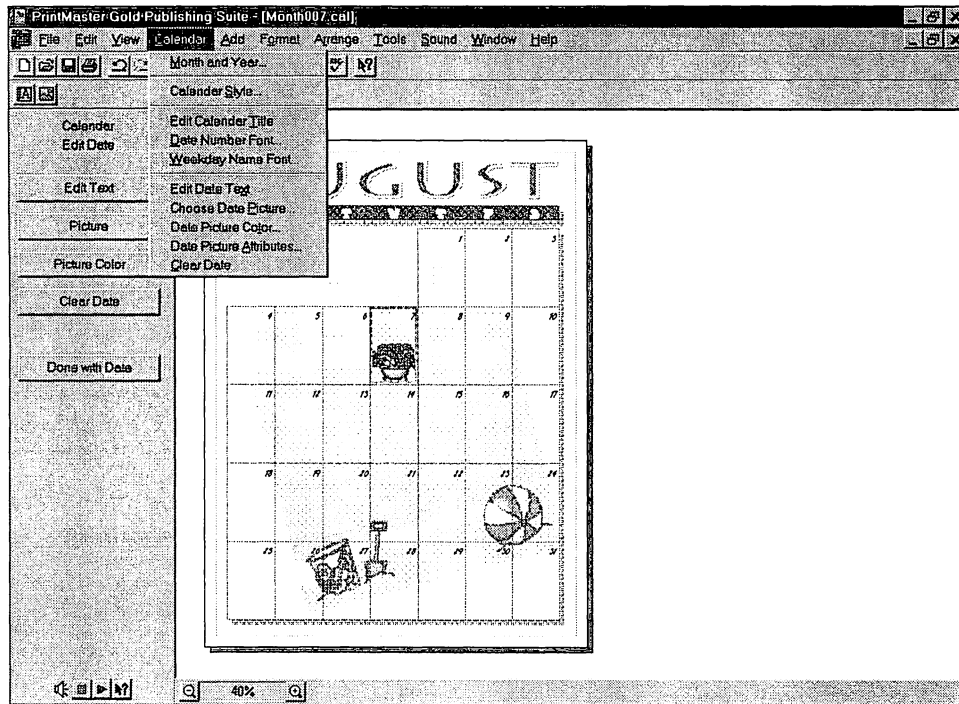

This option returns you to the Calendar Design Choices menu.

---

*To copy the contents of one date box to another, click on the date box you want to copy and while holding down the left mouse button, drag the date box to the new destination. When you release the mouse button, the text and pictures will be copied.*

---

Additional features for editing your calendars are available on the **Calendar** menu located at the top of the project screen. Open this menu by click on its name or by pressing **[ALT]+[C]**.

## Change Month and Year...

Use this option to change the Month and Year of your Calendar project. For Weekly Calendar projects you can use this option to change the week. PrintMaster Gold will automatically number the days for the date your choose.

## Calendar Style...

(See the section entitled: **Calendar Style** later on in this chapter.)

## Edit Calendar Title Text

Use this option to edit the contents and style of the Calendar title. You can also edit the title by clicking the on the project layout area with your mouse.

## Date Number Font...

This option enables you to change the font style of the date numbers on your calendar.

## Weekday Name Font...

Use this option to change the font style of the weekday names (*Mon., Tues. Wed., etc.*).

## Edit Date Text

This option enables you to edit the text inside of a date box. (See the chapter entitled: **Working with Text** later on in this guide for more detail.)

### **Choose Date Picture...**

This option enables you to attach a picture to a date box. Only a single picture is allowed per date and the picture is always sized to fit the box.

### **Date Picture Color...**

This features enables you to change the color shading of a picture attached to a date box.

### **Date Picture Attributes...**

This option enables you to adjust attributes (color, render method, etc.) of the selected picture. (See the chapter entitled: **Working with Pictures** later on in this guide for more detail.)

### **Clear Date**

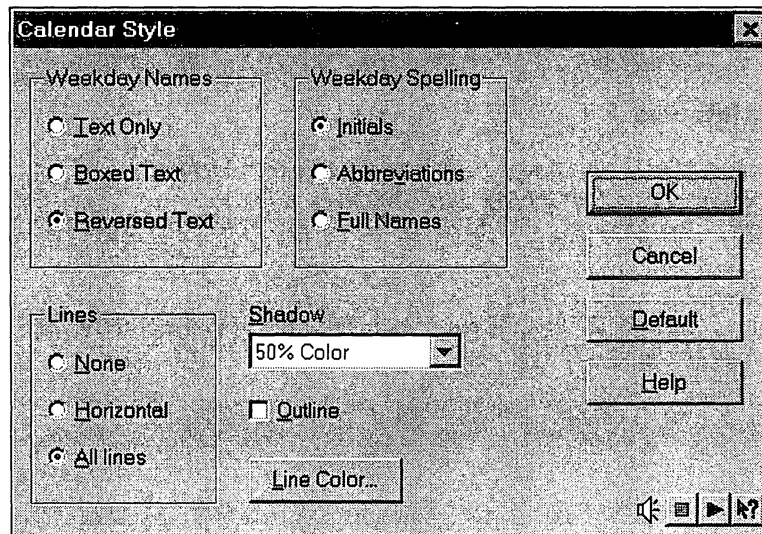

Use this option to remove text and picture elements only from the currently selected date. Other dates will remain unchanged.

## Calendar Style

---

Use these options to customize the look of your Calendar project. Click the **Default** button to reset all items to their original values.

### Weekday Names

Use this option to edit the style of weekday names. Three variations of weekday names are offered:

- **Text only** displays only the weekday names.
- **Boxed Text** displays the weekday names in boxes.
- **Reversed Text** displays the weekday names on a black background.

### Weekday Spelling

Use this option to specify the spelling of the weekday names. Three variations are supported:

- **Initials** displays the weekday names as S, M, T, W, T, F, S.
- **Abbreviations** displays the names as Sun, Mon, Tue, Wed, Thu, Fri, Sat.
- **Full Names** displays the weekday names as Sunday, Monday, Tuesday, Wednesday, Thursday, Friday, Saturday.

### Lines

This option controls what lines are drawn around the Calendar date boxes. Lines does not effect any box drawn around weekday names.

- **None** displays no Calendar lines.
- **Horizontal** displays only horizontal lines.

- **All Lines** displays all Calendar lines.

### **Line Color**

Click this button to choose the color for the lines drawn around the Calendar date boxes, the box drawn around the weekday names, and a color shadow.

### **Shadow**

This option is used to add a shadow effect to your Calendar.

- **None** turns off any shadow effect.
- **Black** adds a black shadow to the Calendar.
- **Gray** adds a gray shadow to your Calendar.
- **Light Gray** adds a light gray shadow to your Calendar.
- **100%, 50%, 25% Color** adds a shadow of the chosen **Line Color** (see above) to your Calendar. The color is rendered at the selected percentage.

### **Outline**

Select this option to add an outline around the entire calendar.

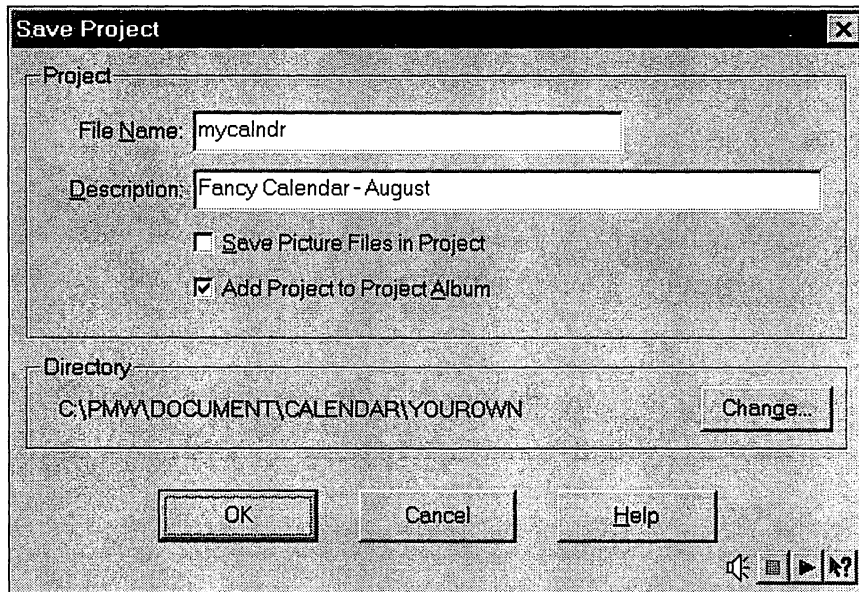

## Save Calendar

---

This command will enable you to save your Calendar project with a unique name and description that you provide.

1. Click the **Save Calendar** button located on the sidebar menu.

To save an existing Calendar project under a new name and description, select **Save As...** from the **File** menu. PrintMaster Gold will then prompt you to type in a new file name and description.

2. If you are saving a new Calendar project, PrintMaster Gold will prompt you for a unique file name. Type in the new **File Name** into the box provided.
3. You may also attach a short description to your Calendar project by typing it into the **Description** box.
4. To change the default drive and/or directory that your project will be saved to click **Change...** and select the new destination.
5. Click **OK** or press **ENTER** to save your Calendar project.

### Save Picture Files in Project

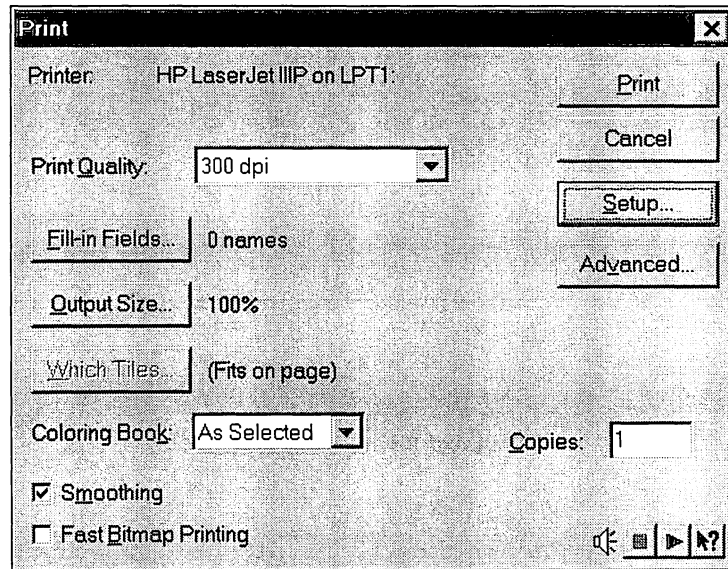

This function embeds a copy of the picture files used in your Calendar within the document itself so that the original picture file is not required the next time you open your Calendar.

This feature is particularly useful when using pictures that are selected from a floppy disk or CD. When selected PrintMaster Gold will not require you to insert the floppy disk or CD containing the picture(s) used each time you open your project.

## Print Calendar

This option brings up the Print dialog enabling you to print your Calendar project. From this dialog you can also choose the number of printed copies, the print quality, and other features. See the chapter entitled: *Printing a Project* for more details.

1. Click the **Print Calendar** button to display the Print dialog box.
2. Click **Print** to begin printing your project.

## Done with Calendar

This option closes the Calendar project screen and returns you to the main PrintMaster Gold screen. From the main screen you can select other project types (*i.e.*, *Banner*, *Calendar*, *etc.*) or exit the program.

1. Click the **Done with Calendar** button to exit and return to the main menu. If you have not already saved your Calendar, you will be prompted to do so at this point.

This page intentionally left blank.

# Creating a Certificate

The Certificate project can be used to create your own official looking awards and it is great fun for creating gift certificates.

*All PrintMaster Gold projects are arranged in an on screen album for easy access. Click the project tab located on the right side of the album to select a project category.*

## Beginning a Certificate

The following instructions describe how to create a new Certificate project, open an existing Certificate project (or template), save a Certificate project, and print a Certificate project.

1. Click on the **Certificates** tab located on the PrintMaster Gold project album to:
  - a. Start a *new* Certificate project.
  - b. Open an *existing* Certificate project (or template).

PrintMaster Gold provides many different categories of Certificates from which you may choose from. To browse a category, simply click on its tab located on the project album.

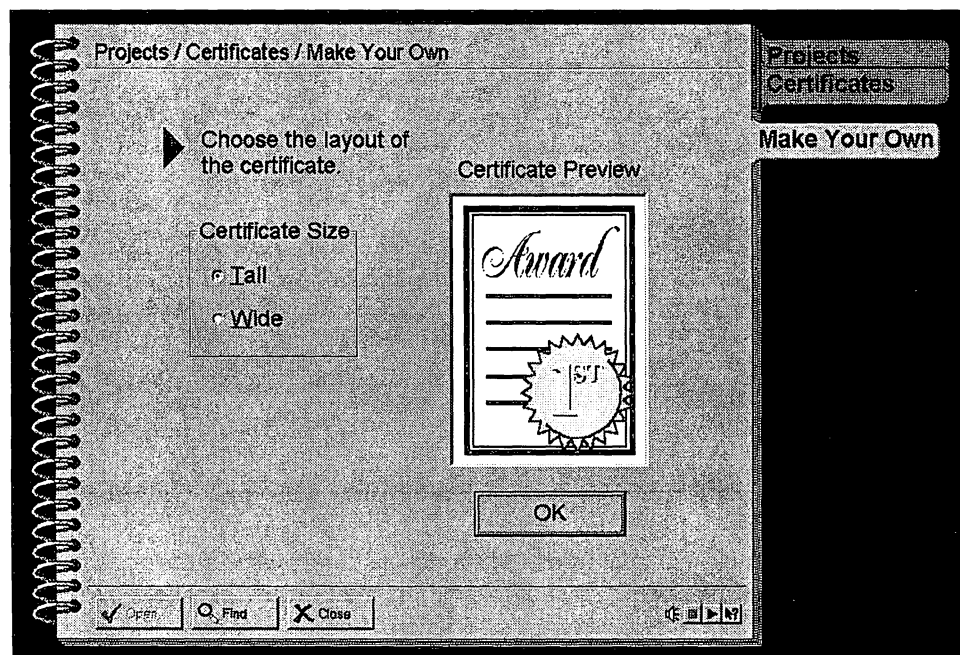

## To create a new Certificate:

---

1. Click the **Make Your Own** tab to start a new Certificate project.

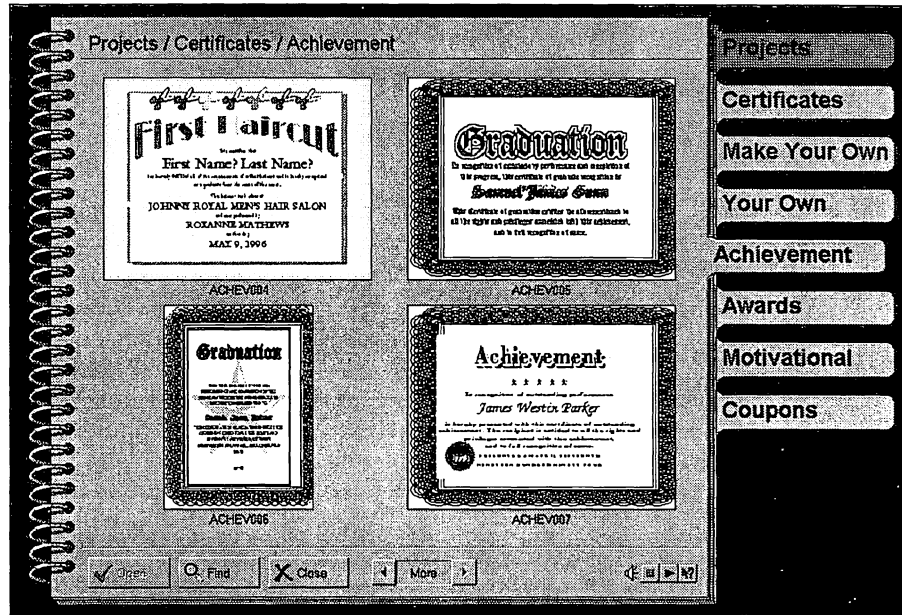

2. When creating a new Certificate, you will be prompted to select a page layout for your new project. Use your mouse to select the **Certificate Size**.

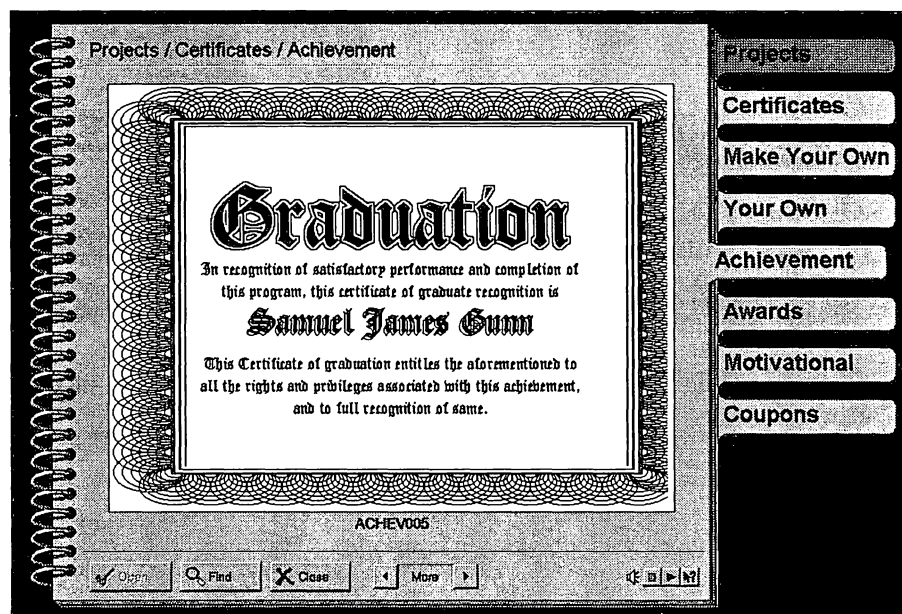

- The Size option **Tall** (or Portrait) prints text across the short width of the paper.
- The Size option **Wide** (or Landscape) prints text across the long width of the paper.

## To open an existing Certificate:

1. Choose the category to open by clicking on its tab. To open your own saved Certificate projects, click the tab labeled: **Your Own**.
2. Highlight a Certificate project by clicking on its preview. To see other Certificate projects within the same category click the **More** arrow button on the bottom section of the album.

A larger sample can be viewed by opening the **View** menu and selecting the **Full-sized Projects** option. To return to the standard preview open the View menu again and select **Thumbnails**.

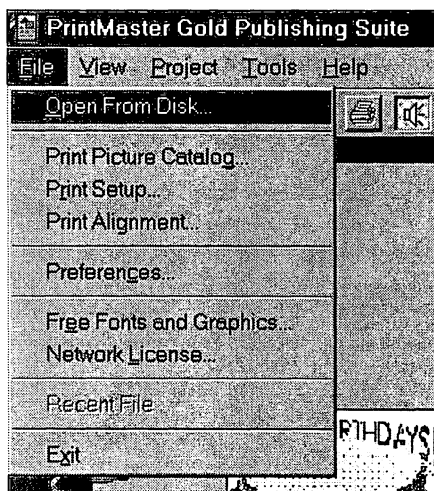

3. Click the **Open** button or press **ENTER** to open the selected Certificate project.

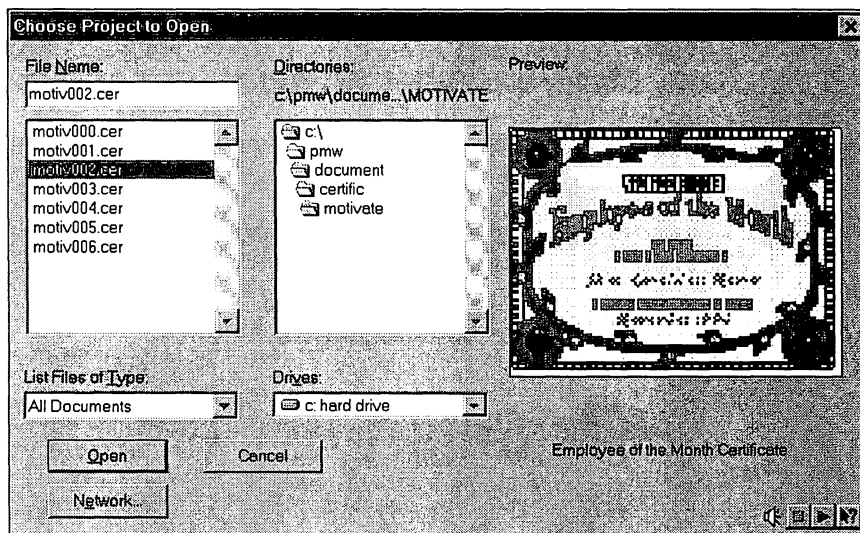

## Opening projects from another disk

1. To open a project from a floppy disk, pull down the **File** menu and select the **Open From Disk...** item.

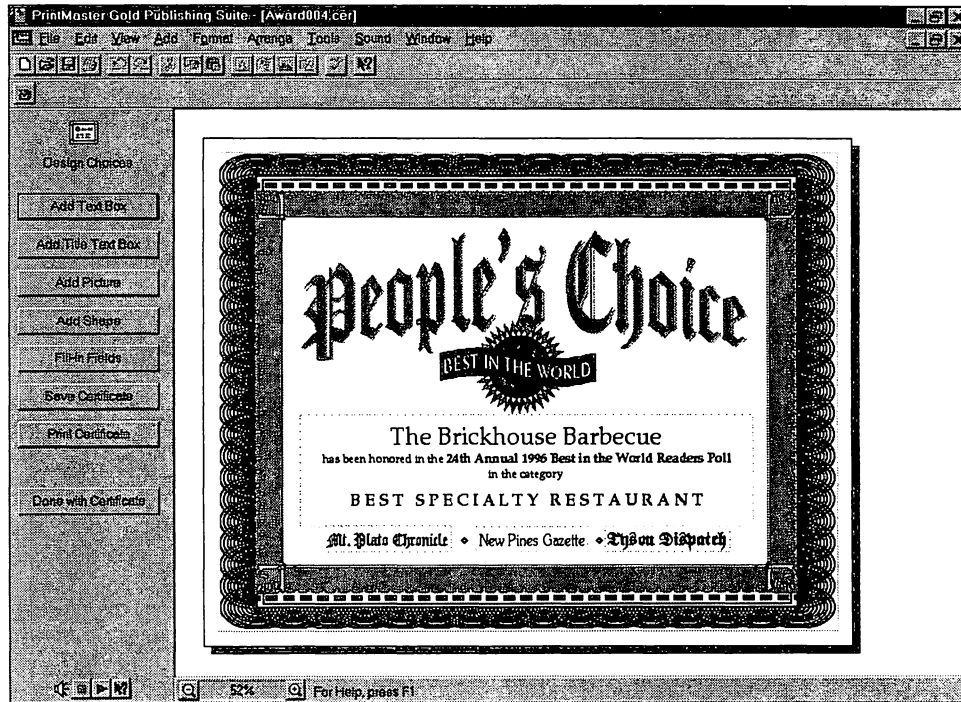

2. Select a Certificate by clicking on its name in the File Name list—a preview of the highlighted Certificate will appear to the right.

3. Click the **Open** button or press **ENTER** to open the selected Certificate project.

## Certificate Design Choices

The Design Choices menu provides a list of key design elements and commands you can work with to create, print, and save your own customized Certificate projects. Additional commands and editing features may be accessed from the toolbar or menus at the top of the PrintMaster Gold screen.

Choose a design option by clicking on the corresponding sidebar button.

**Add Text Box**

Click this button to begin working on your Certificate's **Text**.

**Add Title Text Box**

Click this button to begin working on **Title Text** for your Certificate.

**Add Picture**

Click this button to begin working on **Pictures** for your Certificate.

**Add Shape**

Click this button to add **Shapes** to your Certificate.

After confirming your selection, the sidebar will change to display the design elements available for editing your background, text, or pictures.

See the command reference sections later on in this guide for a complete description of working with backgrounds, text and pictures.

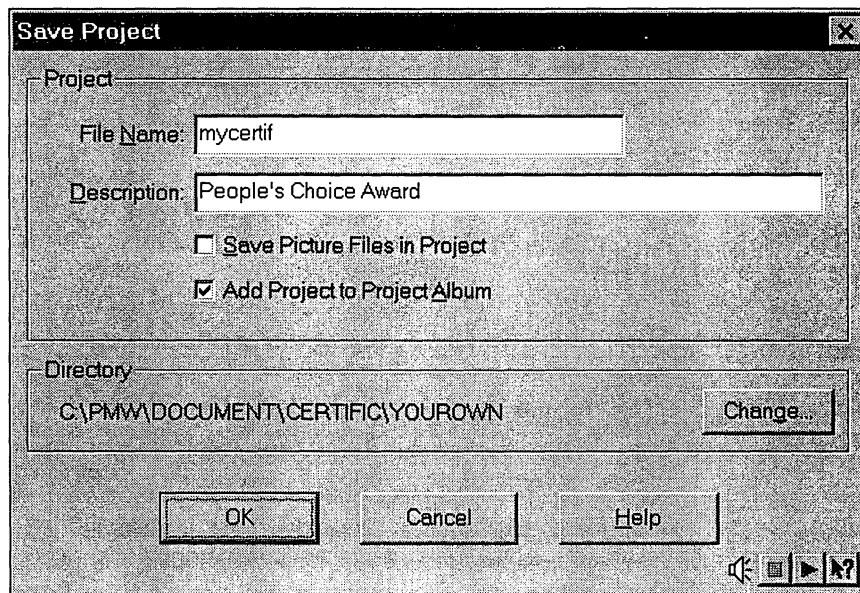

## Save Certificate

---

This command will enable you to save your Certificate project with a unique name and description that you provide.

1. Click the **Save Certificate** button located on the sidebar menu.

To save an existing Certificate project under a new name and description, select **Save As...** from the **File** menu. PrintMaster Gold will then prompt you to type in a new file name and description.

2. If you are saving a new Certificate project, PrintMaster Gold will prompt you for a unique file name. Type in the new **File Name** into the box provided.
3. You may also attach a short description to your Certificate project by typing it into the **Description** box.
4. To change the default drive and/or directory that your project will be saved to click **Change...** and select the new destination.
5. Click **OK** or press **(ENTER)** to save your Certificate project.

### Save Picture Files in Project

This function embeds a copy of the picture files used in your Certificate within the document itself so that the original picture file is not required the next time you open your Certificate.

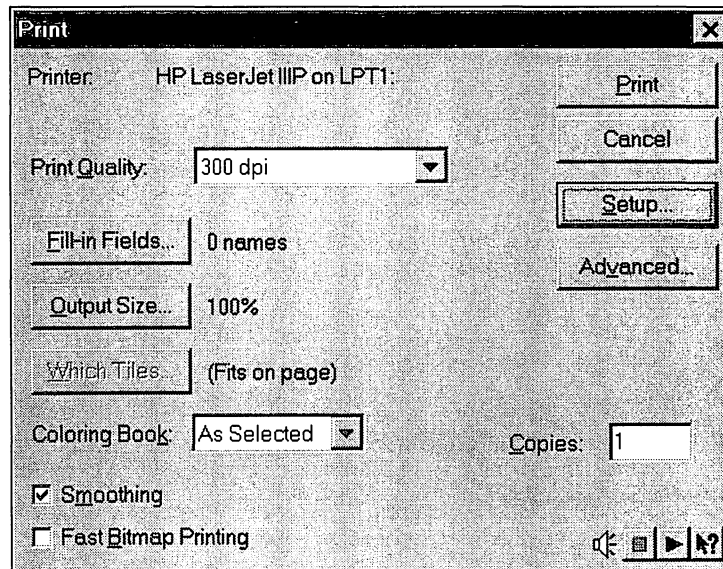

This feature is particularly useful when using pictures that are selected from a floppy disk or CD. When selected PrintMaster Gold will not require you to insert the floppy disk or CD containing the picture(s) used each time you open your project.

## Print Certificate

---

This option brings up the Print dialog enabling you to print your Certificate project. From this dialog you can also choose the number of printed copies, the print quality, and other features. See the chapter entitled: *Printing a Project* for more details.

1. Click the **Print Certificate** button to display the Print dialog box.
2. Click **Print** to begin printing your project.

## Done with Certificate

---

This option closes the Certificate project screen and returns you to the main PrintMaster Gold screen. From the main screen you can select other project types (*i.e., Banner, Calendar, etc.*) or exit the program.

1. Click the **Done with Certificate** button to exit and return to the main menu. If you have not already saved your Certificate, you will be prompted to do so at this point.

This page intentionally left blank.

## Creating a Label

PrintMaster Gold makes it easy to create dozens of different types of labels. Create mailing labels or labels for floppy disks or video cassettes.

*All PrintMaster Gold projects are arranged in an on screen album for easy access. Click the project tab located on the right side of the album to select a project category.*

### Beginning a Label

The following instructions describe how to create a new Label project, open an existing Label project, save a Label project, and print a Label project.

1. Click on the **Labels** tab located on the PrintMaster Gold project album to:

  - a. Start a *new* Label project.
  - b. Open an *existing* Label project (or template).

PrintMaster Gold provides many different categories of Labels from which you may choose from. To browse a category, simply click on its tab located on the project album.

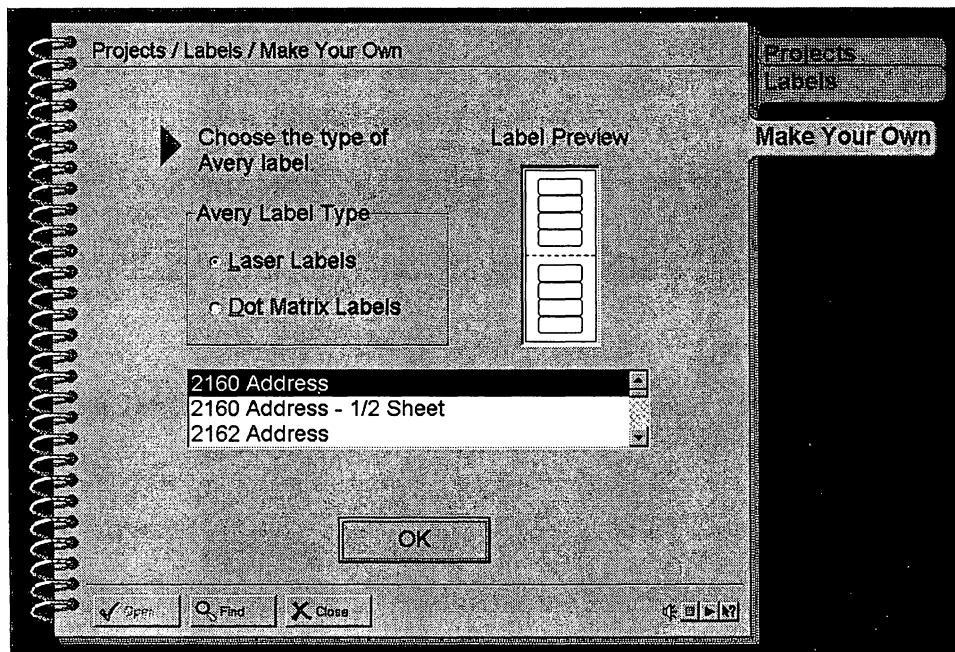

## To create a new Label:

---

1. Click the **Make Your Own** tab to start a new Label project.

2. When creating a new Label, you will be prompted to choose a **Label Type**.

- Select **Laser Labels** if you will be printing your labels on a laserjet, inkjet, or bubblejet printer.
  - Select **Dot Matrix Labels** if you will be printing your labels on a dot matrix printer.
3. From the provided list, pick the specific type of labels to be used. Click **OK** to begin editing.

## To open an existing Label:

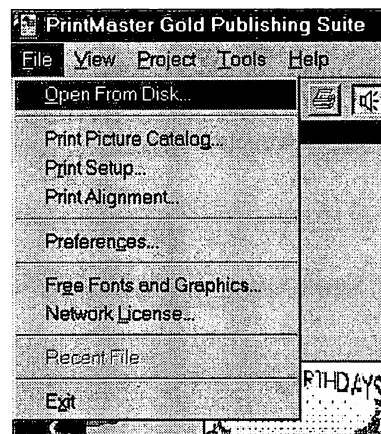

1. Choose the category to open by clicking on its tab. To open your own saved Label projects, click the tab labeled: **Your Own**.
2. Highlight a Label project by clicking on its preview. To see other Label projects within the same category click the **More** arrow button on the bottom section of the album.

A larger sample can be viewed by opening the **View** menu and selecting the **Full-sized Projects** option. To return to the standard preview open the View menu again and select **Thumbnails**.

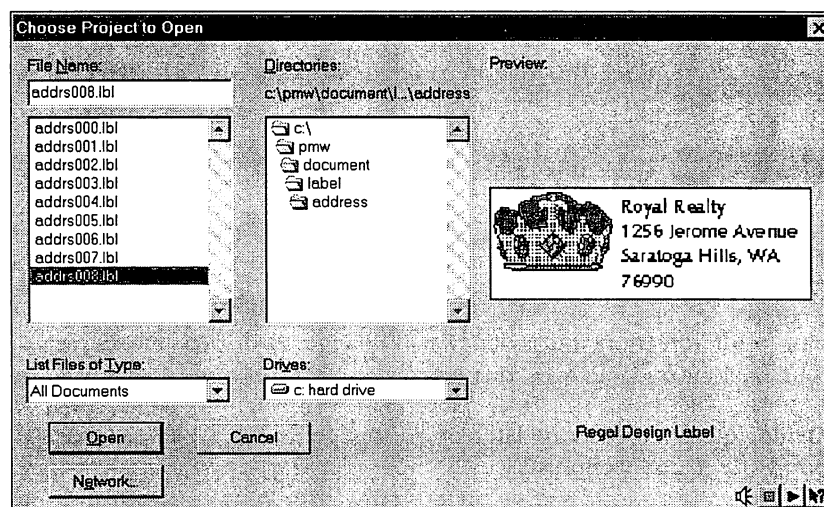

3. Click the **Open** button or press **[ENTER]** to open the selected Label project.

### Opening projects from another disk

1. To open a project from a disk, pull down the **File** menu and select the **Open From Disk...** item.

2. Select a Label by clicking on its name in the File Name list—a preview of the highlighted Label will appear to the right.

3. Click the **Open** button or press **[ENTER]** to open the selected Label project.

## Label Design Choices

---

The Design Choices menu provides a list of key design elements and commands you can work with to create, print, and save your own customized Label projects. Additional commands and editing features may be accessed from the toolbar or menus at the top of the PrintMaster Gold screen.

Choose a design option by clicking on the corresponding sidebar button.

Click this button to begin working on your Label's **Text**.

Click this button to begin working on **Title Text** for your Label.

Click this button to begin working on **Pictures** for your Label.

Click this button to add **Shapes** to your Label.

After confirming your selection, the sidebar will change to display the design elements available for editing your background, text, or pictures.

See the command reference sections later on in this guide for a complete description of working with backgrounds, text and pictures.

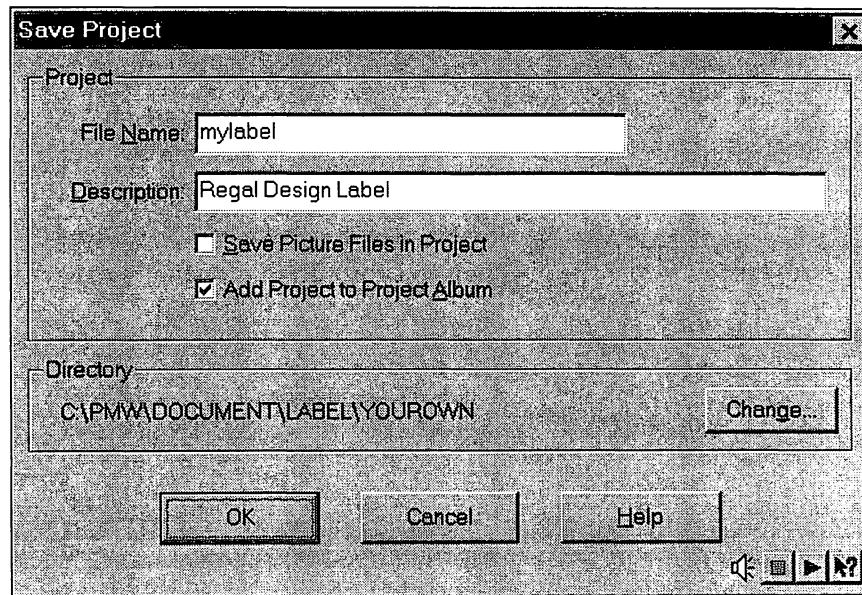

## Save Label

---

This command will enable you to save your Label project with a unique name and description that you provide.

1. Click the **Save Label** button located on the sidebar menu.

To save an existing Label project under a new name and description, select **Save As...** from the **File** menu. PrintMaster Gold will then prompt you to type in a new file name and description.

2. If you are saving a new Label project, PrintMaster Gold will prompt you for a unique file name. Type in the new **File Name** into the box provided.
3. You may also attach a short description to your Label project by typing it into the **Description** box.
4. To change the default drive and/or directory that your project will be saved to click **Change...** and select the new destination.
5. Click **OK** or press **(ENTER)** to save your Label project.

### Save Picture Files in Project

This function embeds a copy of the picture files used in your Label within the document itself so that the original picture file is not required the next time you open your Label.

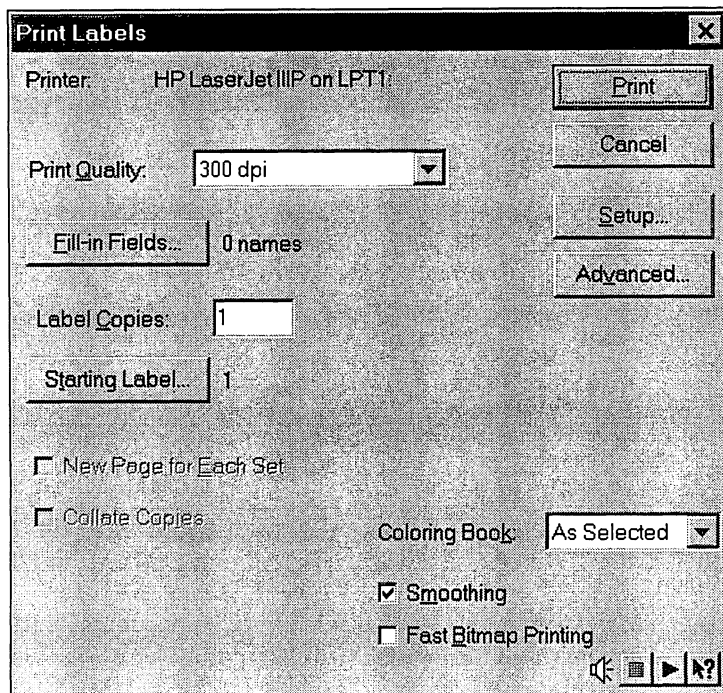

This feature is particularly useful when using pictures that are selected from a floppy disk or CD. When selected PrintMaster Gold will not require you to insert the floppy disk or CD containing the picture(s) used each time you open your project.

## Print Label

---

This option brings up the Print dialog enabling you to print your Label project. From this dialog you can also choose the number of printed copies, the print quality, and other features. See the chapter entitled: *Printing a Project* for more details.

1. Click the **Print Label** button to display the Print dialog box.
2. Click **Print** to begin printing your project.

## Done with Label

---

This option closes the Label project screen and returns you to the main PrintMaster Gold screen. From the main screen you can select other project types (*i.e.*, *Banner*, *Calendar*, *etc.*) or exit the program.

1. Click **Done with Label** to exit and return to the main menu. If you have not already saved your Label project, you will be prompted to do so at this point.

# Creating a Business Card

---

PrintMaster Gold makes it easy for you to create professional-looking business cards that will impress your friends and business associates.

---

*All PrintMaster Gold projects are arranged in an on screen album for easy access. Click the project tab located on the right side of the album to select a project category.*

---

## Beginning a Business Card

---

The following instructions describe how to create a new Business Card project, open an existing Business Card project (or template), save a Business Card project, and print a Business Card project.

1. Click on the **Business Cards** tab located on the PrintMaster Gold project album to:

  - a. Start a *new* Business Card project.
  - b. Open an *existing* Business Card project (or template).

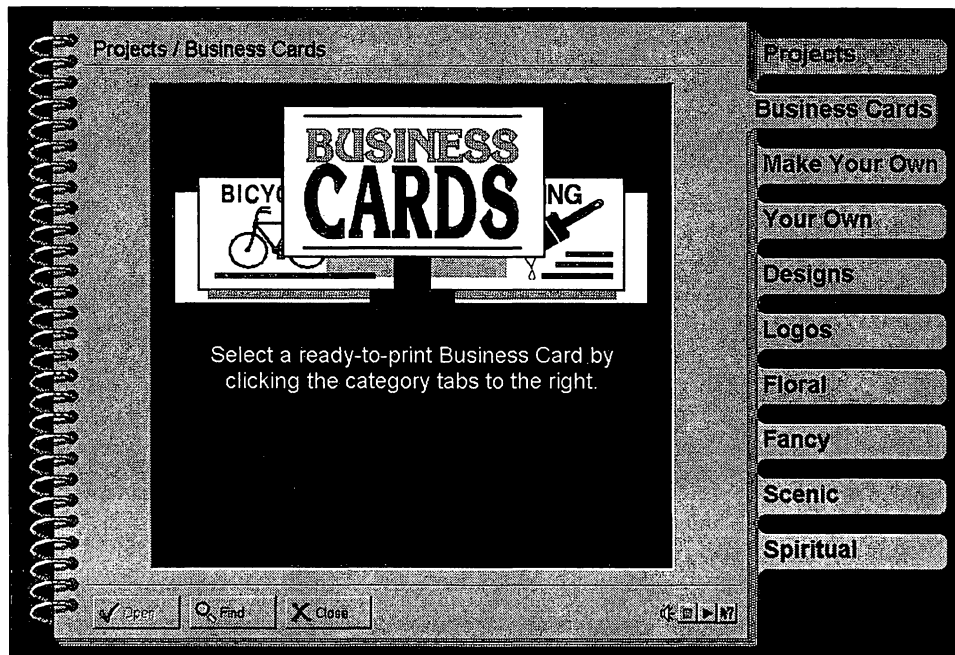

PrintMaster Gold provides many different categories of Business Cards from which you may choose from. To browse a category, simply click on its tab located on the project album.

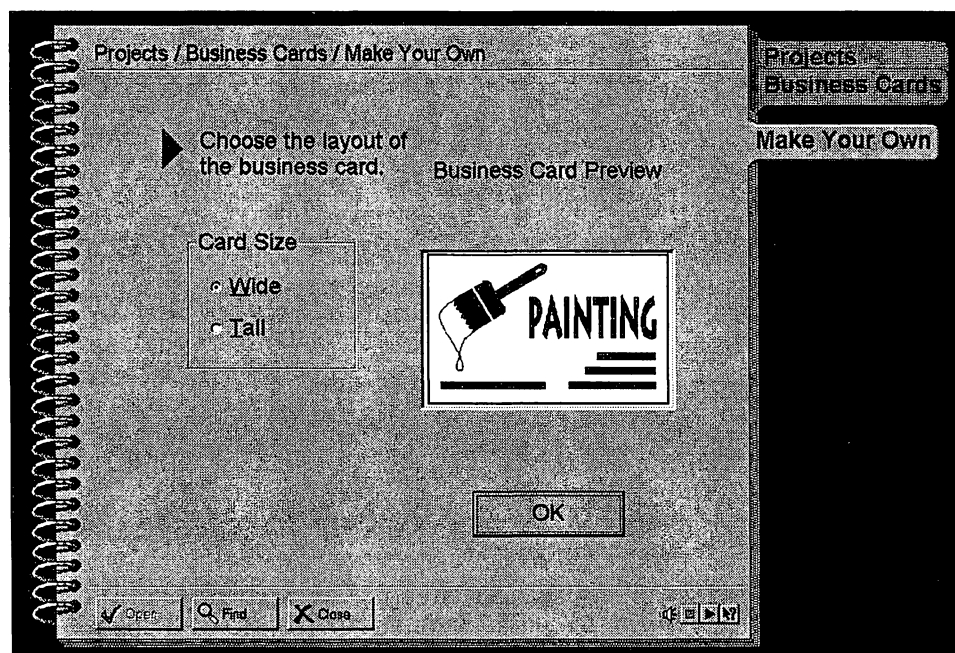

## To create a new Business Card:

---

1. Click the **Make Your Own** tab to start a new Business Card project.

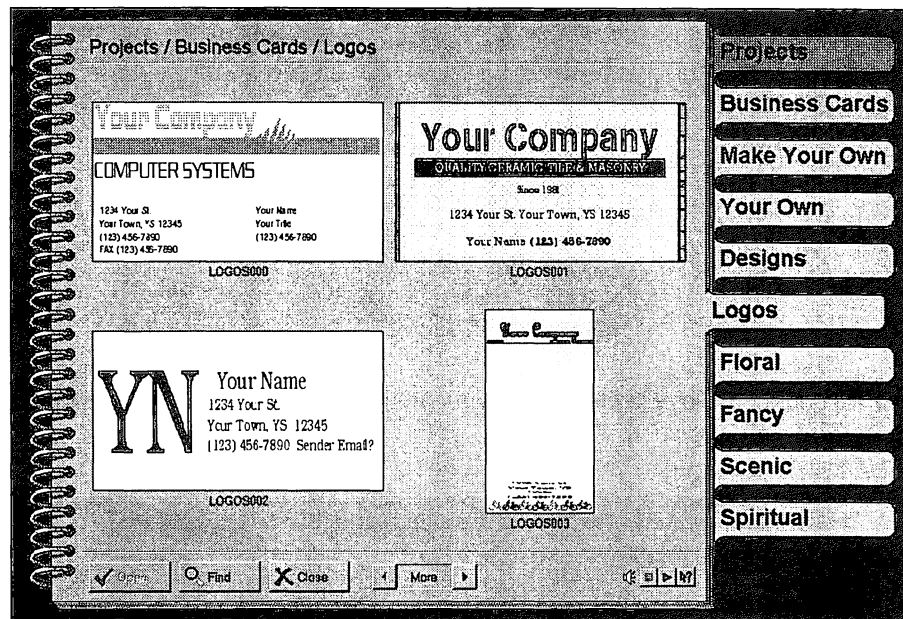

2. When creating a new Business Card, you will be prompted to select a page layout for your new project. Use your mouse to select the **Card Size**.

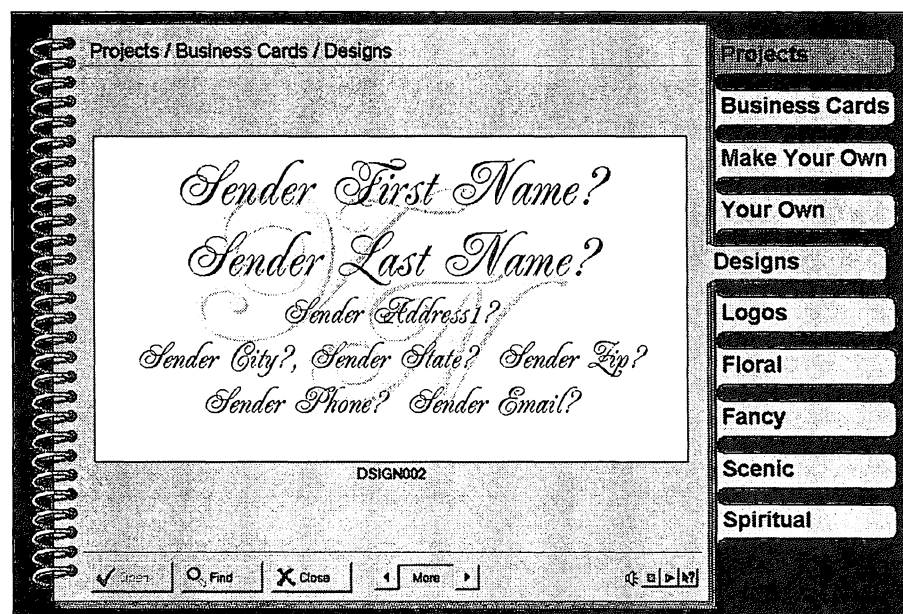

- The Size option **Tall** (or Portrait) prints text across the short width of the paper.
- The Size option **Wide** (or Landscape) prints text across the long width of the paper.

## To open an existing Business Card:

1. Choose the category to open by clicking on its tab. To open your own saved Business Card projects, click the tab Business Card: **Your Own**.
2. Highlight a Business Card project by clicking on its preview. To see other Business Card projects within the same category click the **More** arrow button on the bottom section of the album.

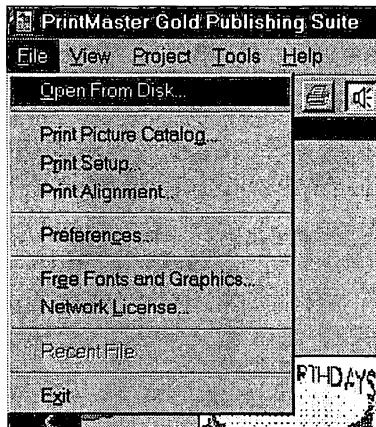

A larger sample can be viewed by opening the **View** menu and selecting the **Full-sized Projects** option. To return to the standard preview open the View menu again and select **Thumbnails**.

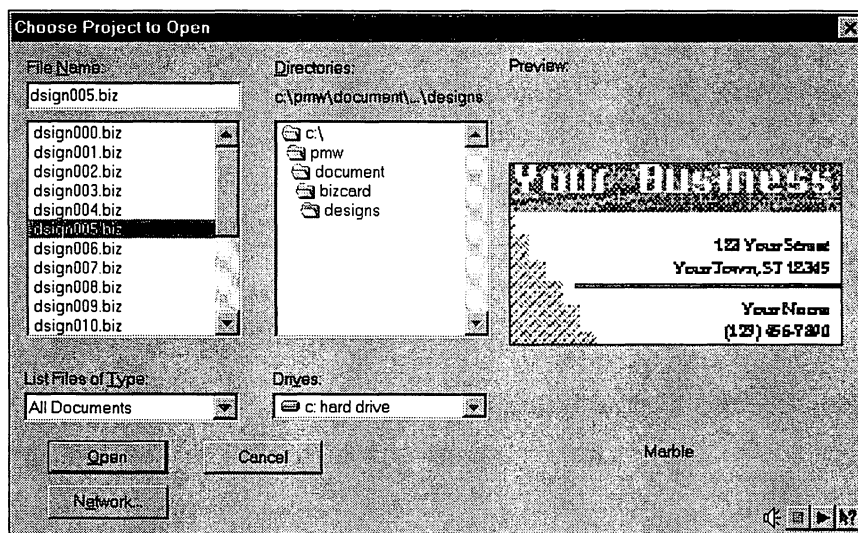

3. Click the **Open** button or press **[ENTER]** to open the selected Business Card project.

## Opening projects from another disk

1. To open a project from a floppy disk, pull down the **File** menu and select the **Open From Disk...** item.

2. Select a Business Card by clicking on its name in the File Name list—a preview of the highlighted Business Card will appear to the right.

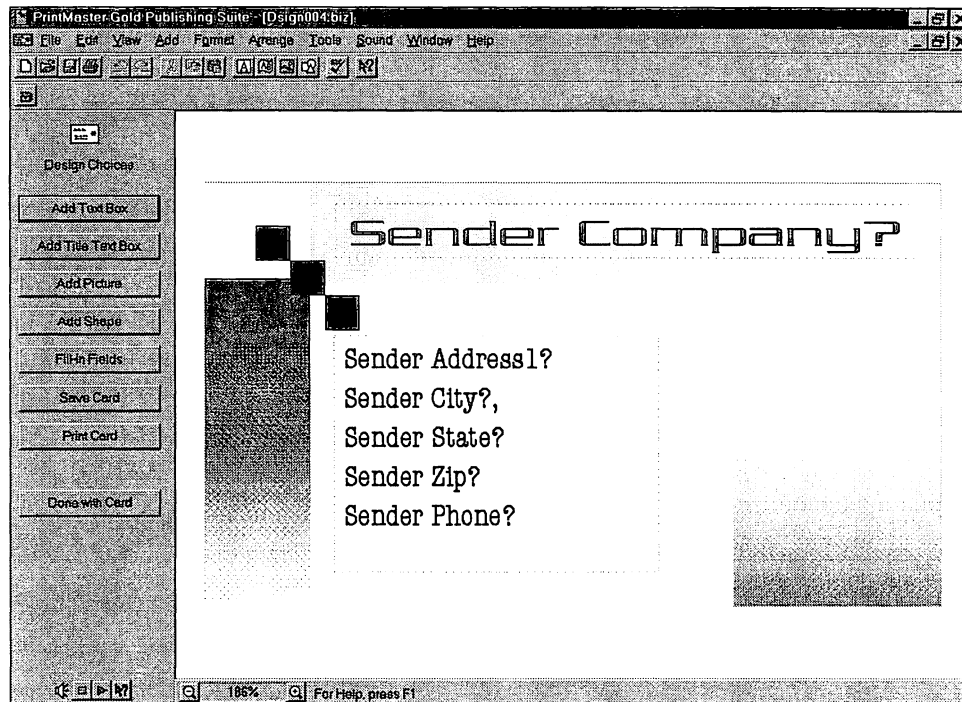

3. Click the **Open** button or press **ENTER** to open the selected Business Card project.

## Business Card Design Choices

---

The Design Choices menu provides a list of key design elements and commands you can work with to create, print, and save your own customized Business Card projects. Additional commands and editing features may be accessed from the toolbar or menus at the top of the PrintMaster Gold screen.

Choose a design option by clicking on the corresponding sidebar button.

- |   |   |
|---|---|
|  | Click this button to begin working on your Business Card's <b>Text</b> .        |
|  | Click this button to begin working on <b>Title Text</b> for your Business Card. |
|  | Click this button to begin working on <b>Pictures</b> for your Business Card.   |
|  | Click this button to add <b>Shapes</b> to your Business Card.                   |

After confirming your selection, the sidebar will change to display the design elements available for editing your background, text, or pictures.

See the command reference sections later on in this guide for a complete description of working with backgrounds, text and pictures.

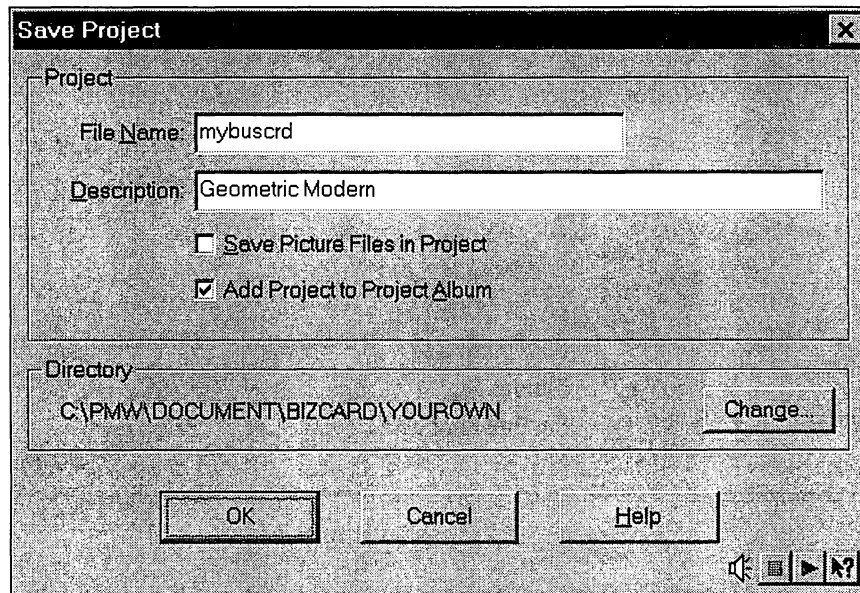

## Save Business Card

---

This command will enable you to save your Business Card project with a unique name and description that you provide.

1. Click the **Save Card** button located on the sidebar menu.

To save an existing Business Card project under a new name and description, select **Save As...** from the **File** menu. PrintMaster Gold will then prompt you to type in a new file name and description.

2. If you are saving a new Business Card project, PrintMaster Gold will prompt you for a unique file name. Type in the new **File Name** into the box provided.
3. You may also attach a short description to your Business Card project by typing it into the **Description** box.
4. To change the default drive and/or directory that your project will be saved to click **Change...** and select the new destination.
5. Click **OK** or press **[ENTER]** to save your Business Card project.

### Save Picture Files in Project

This function embeds a copy of the picture files used in your Business Card within the document itself so that the original picture file is not required the next time you open your Business Card.

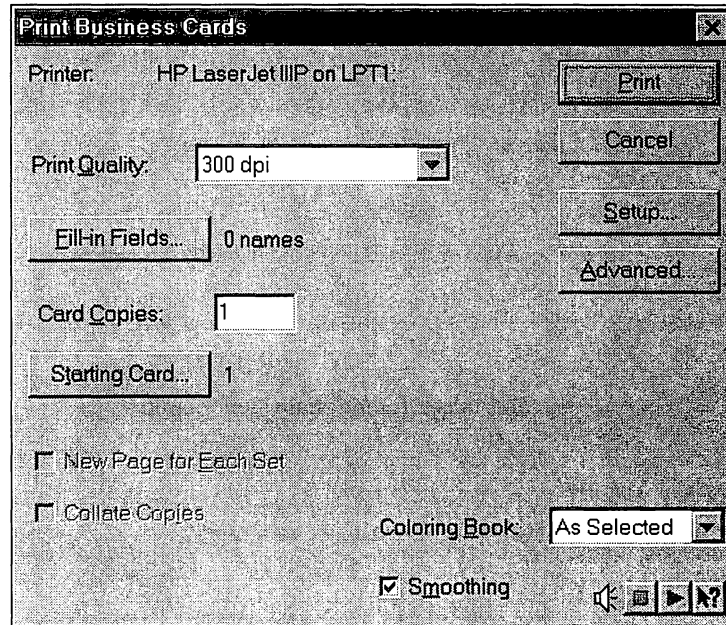

This feature is particularly useful when using pictures that are selected from a floppy disk or CD. When selected PrintMaster Gold will not require you to insert the floppy disk or CD containing the picture(s) used each time you open your project.

## Print Business Card

---

This option brings up the Print dialog enabling you to print your Business Card project. From this dialog you can also choose the number of printed copies, the print quality, and other features. See the chapter entitled: *Printing a Project* for more details.

1. Click the **Print Card** button to display the Print dialog box.
2. Click **Print** to begin printing your project.

## Done with Business Card

---

This option closes the Business Card project screen and returns you to the main PrintMaster Gold screen. From the main screen you can select other project types (*i.e., Banner, Calendar, etc.*) or exit the program.

1. Click **Done with Card** to exit and return to the main menu. If you have not already saved your Business Card project, you will be prompted to do so at this point.

This page intentionally left blank.

# Creating a Letterhead

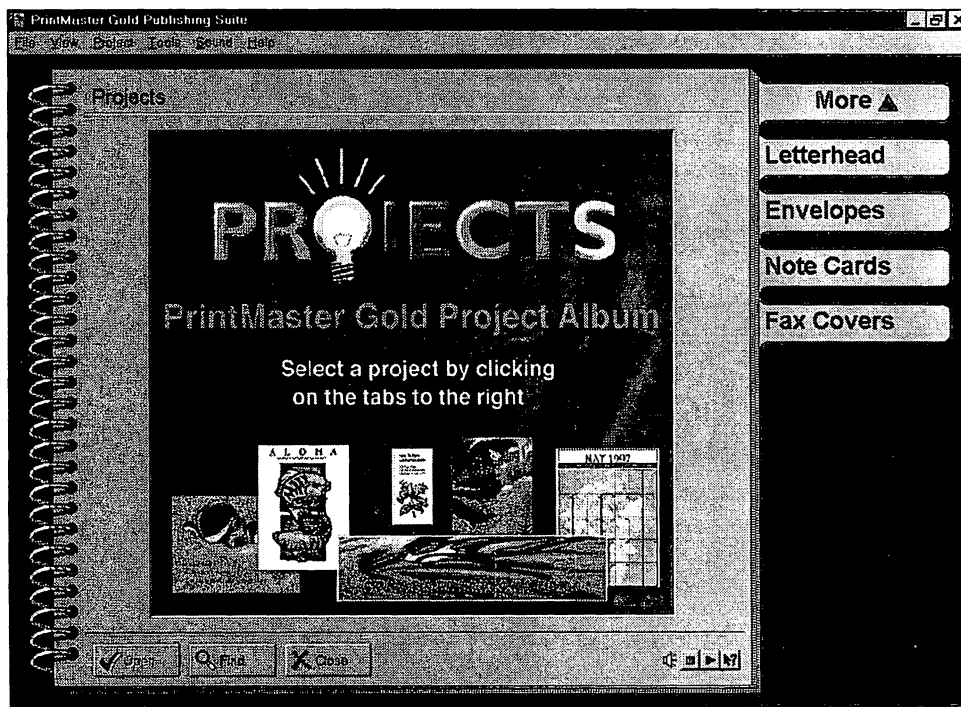

The Letterhead project can add style and a professional flair to all your business letters and personal documents.

*All PrintMaster Gold projects are arranged in an on screen album for easy access. Click the project tab located on the right side of the album to select a project category.*

## Beginning a Letterhead

The following instructions describe how to create a new Letterhead project, open an existing Letterhead project (or template), save a Letterhead project, and print a Letterhead project.

1. Click on the **Letterhead** tab located on the PrintMaster Gold project album to:
  - a. Start a *new* Letterhead project.
  - b. Open an *existing* Letterhead project (or template).

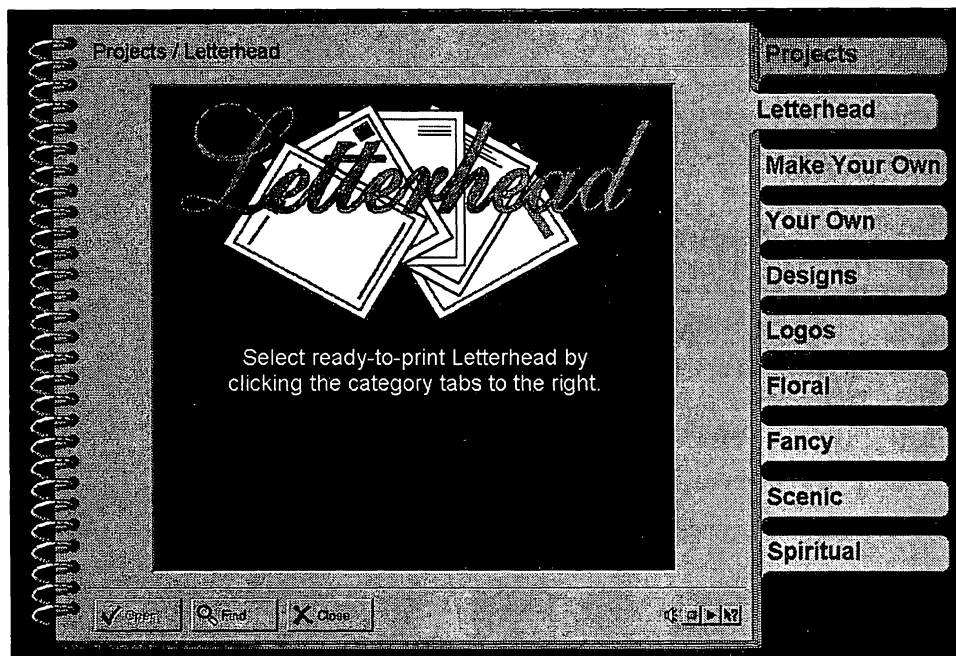

PrintMaster Gold provides many different categories of Letterheads from which you may choose from. To browse a category, simply click on its tab located on the project album.

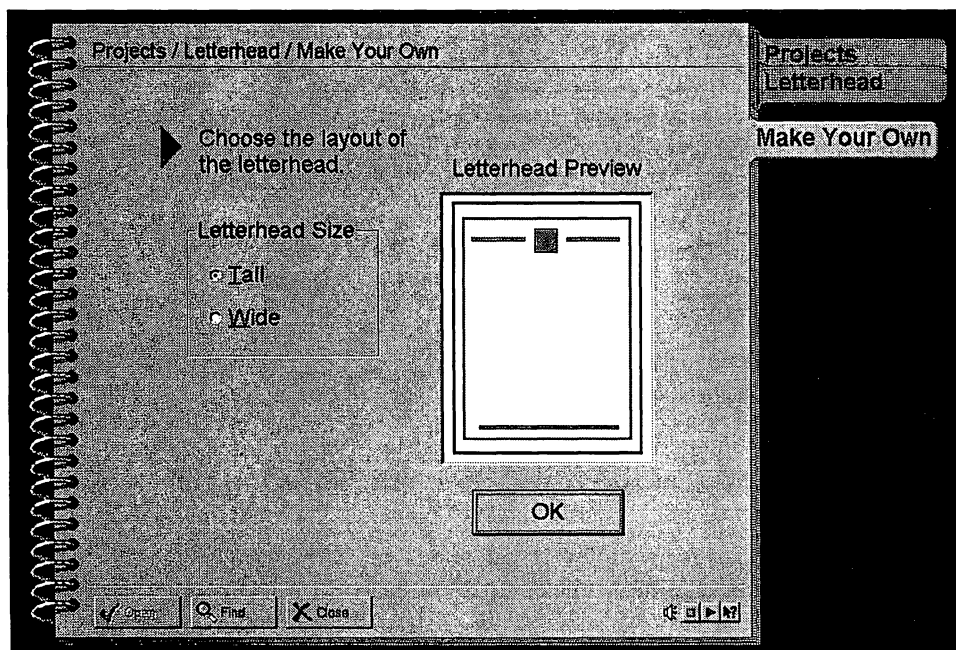

## To create a new Letterhead:

---

1. Click the **Make Your Own** tab to start a new Letterhead project.

2. When creating a new Letterhead, you will be prompted to select a page layout for your new project. Use your mouse to select the **Letterhead Size**.

- The Size option **Tall** (or Portrait) prints text across the short width of the paper.
- The Size option **Wide** (or Landscape) prints text across the long width of the paper.

## To open an existing Letterhead:

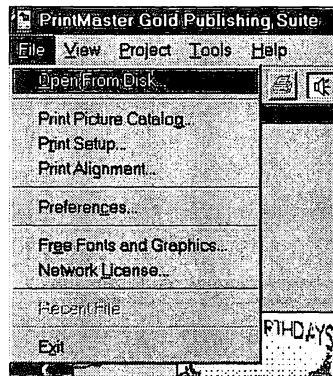

1. Choose the category to open by clicking on its tab. To open your own saved Letterhead projects, click the tab labeled: **Your Own**.
2. Highlight a Letterhead project by clicking on its preview. To see other Letterhead projects within the same category click the **More** arrow button on the bottom section of the album.

A larger sample can be viewed by opening the **View** menu and selecting the **Full-sized Projects** option. To return to the standard preview open the View menu again and select **Thumbnails**.

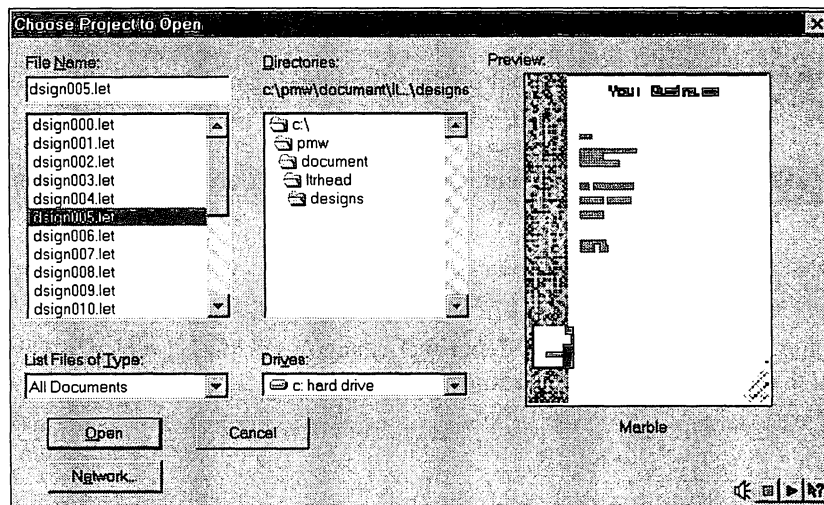

3. Click the **Open** button or press **ENTER** to open the selected Letterhead project.

### Opening projects from another disk

1. To open a project from a floppy disk, pull down the **File** menu and select the **Open From Disk...** item.

2. Select a Letterhead by clicking on its name in the File Name list—a preview of the highlighted Letterhead will appear to the right.

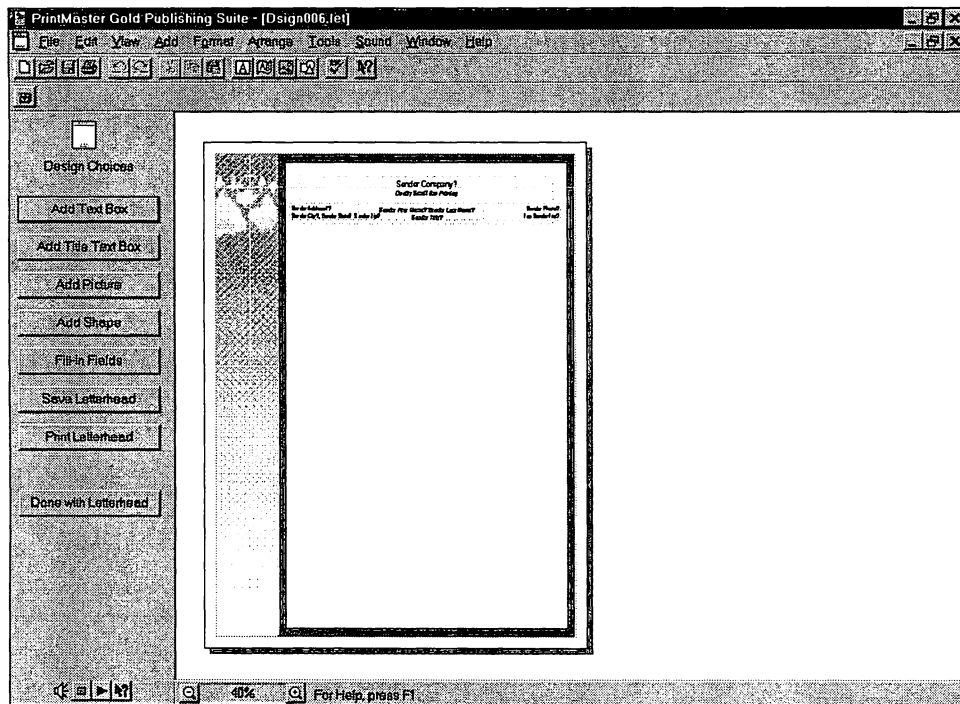

3. Click the **Open** button or press **ENTER** to open the selected Letterhead project.

## Letterhead Design Choices

---

The Design Choices menu provides a list of key design elements and commands you can work with to create, print, and save your own customized Letterhead projects. Additional commands and editing features may be accessed from the toolbar or menus at the top of the PrintMaster Gold screen.

Choose a design option by clicking on the corresponding sidebar button.

Click this button to begin working on your Letterhead's **Text**.

Click this button to begin working on **Title Text** for your Letterhead.

Click this button to begin working on **Pictures** for your Letterhead.

Click this button to add **Shapes** to your Letterhead.

After confirming your selection, the sidebar will change to display the design elements available for editing your background, text, or pictures.

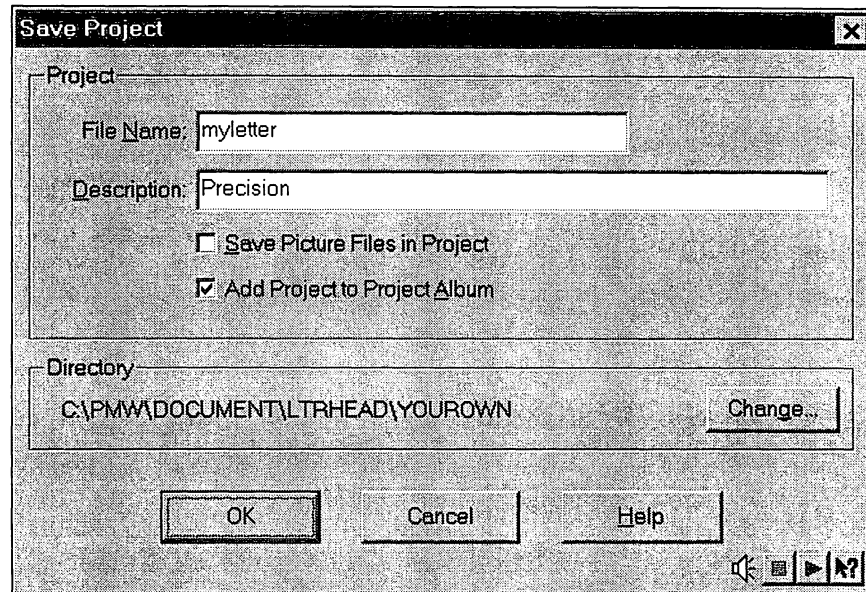

## Save Letterhead

---

This command will enable you to save your Letterhead project with a unique name and description that you provide.

1. Click the **Save Letterhead** button located on the sidebar menu.

To save an existing Letterhead project under a new name and description, select **Save As...** from the **File** menu. PrintMaster Gold will then prompt you to type in a new file name and description.

2. If you are saving a new Letterhead project, PrintMaster Gold will prompt you for a unique file name. Type in the new **File Name** into the box provided.
3. You may also attach a short description to your Letterhead project by typing it into the **Description** box.
4. To change the default drive and/or directory that your project will be saved to click **Change...** and select the new destination.
5. Click **OK** or press **[ENTER]** to save your Letterhead project.

### Save Picture Files in Project

This function embeds a copy of the picture files used in your Letterhead within the document itself so that the original picture file is not required the next time you open your Letterhead.

This feature is particularly useful when using pictures that are selected from a floppy disk or CD. When selected PrintMaster Gold will not require you to insert the floppy disk or CD containing the picture(s) used each time you open your project.

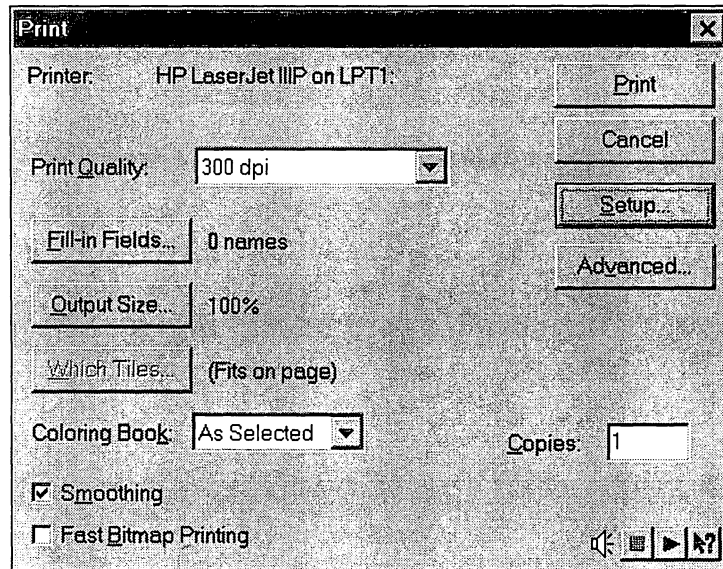

## Print Letterhead

---

This option brings up the Print dialog enabling you to print your Letterhead project. From this dialog you can also choose the number of printed copies, the print quality, and other features. See the chapter entitled: *Printing a Project* for more details.

1. Click the **Print Letterhead** button to display the Print dialog box.
2. Click **Print** to begin printing your project.

## Done with Letterhead

---

This option closes the Letterhead project screen and returns you to the main PrintMaster Gold screen. From the main screen you can select other project types (*i.e.*, *Banner*, *Calendar*, *etc.*) or exit the program.

1. Click the **Done with Letterhead** button to exit and return to the main menu. If you have not already saved your Letterhead, you will be prompted to do so at this point.

# Creating an Envelope

The Envelope project can add style and a professional flair to all your business letters and personal documents.

---

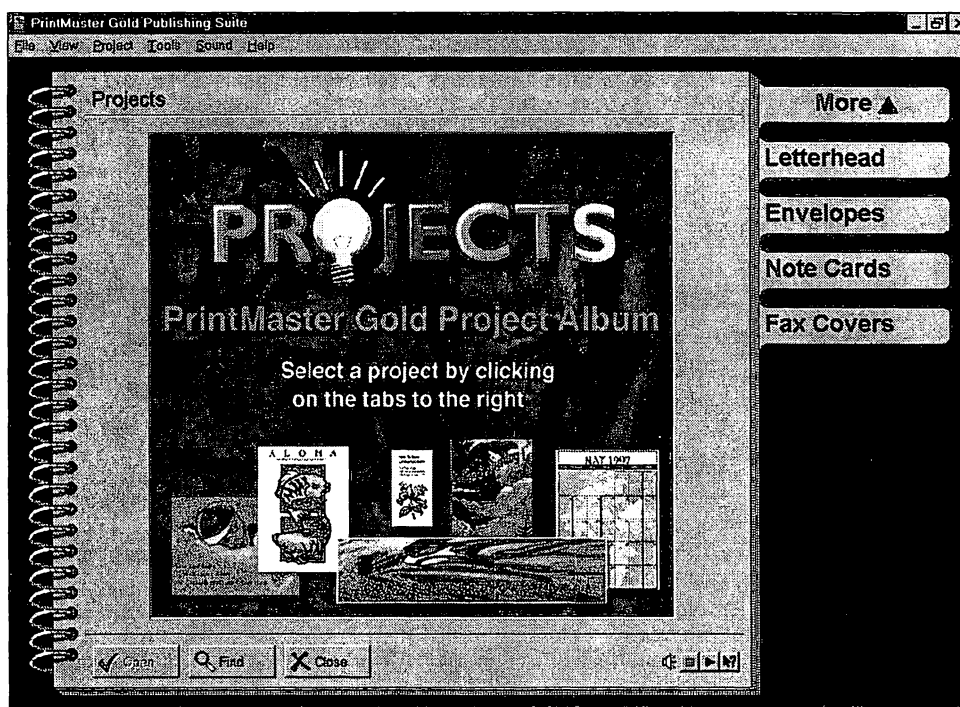

*All PrintMaster Gold projects are arranged in an on screen album for easy access. Click the project tab located on the right side of the album to select a project category.*

---

## Beginning an Envelope

The following instructions describe how to create a new Envelope project, open an existing Envelope project (or template), save an Envelope project, and print an Envelope project.

1. Click on the **Envelopes** tab located on the PrintMaster Gold project album to:
  - a. Start a *new* Envelope project.
  - b. Open an *existing* Envelope project (or template).

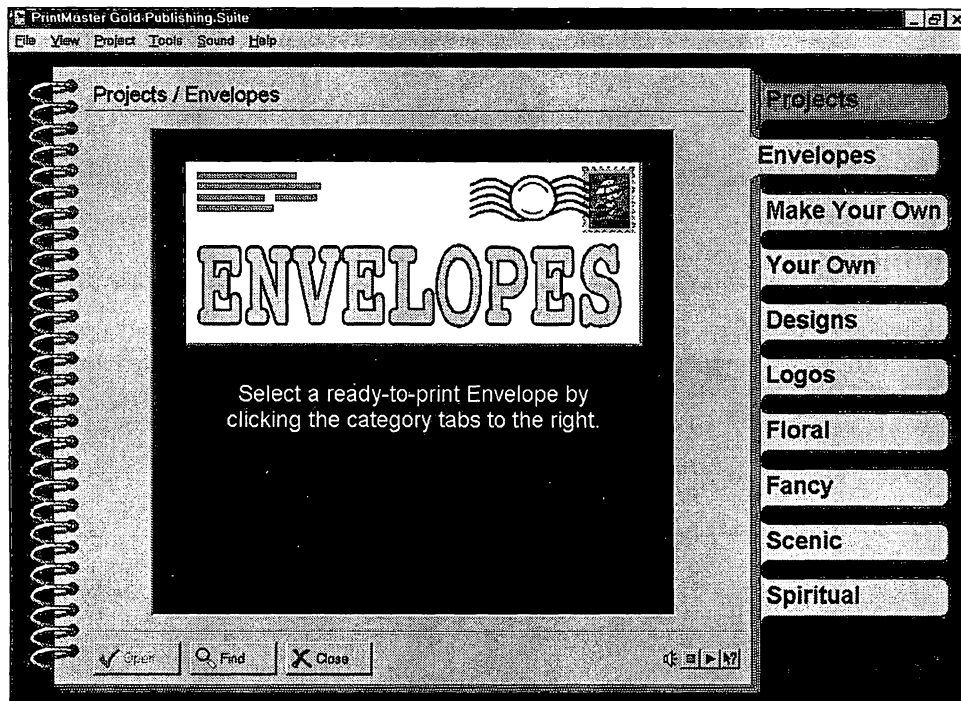

PrintMaster Gold provides many different categories of Envelopes from which you may choose from. To browse a category, simply click on its tab located on the project album.

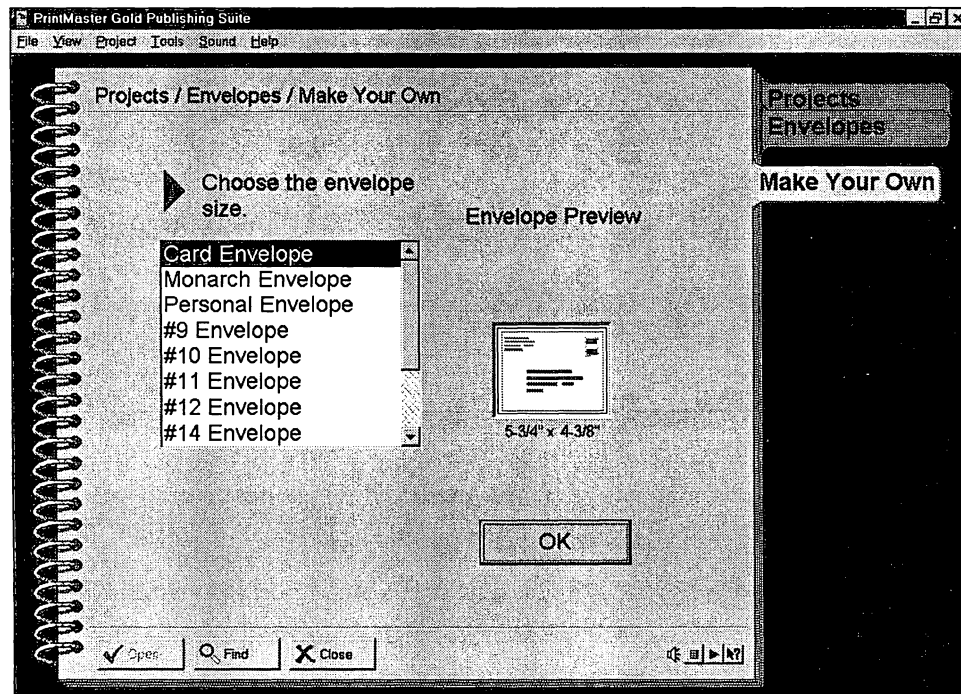

## To create a new Envelope:

---

1. Click the **Make Your Own** tab to start a new Envelope project.

2. When creating a new Envelope, you will be prompted to select a specific **Envelope Size**. From the list provided, choose an envelope size and click **OK** to begin editing.

## To open an existing Envelope:

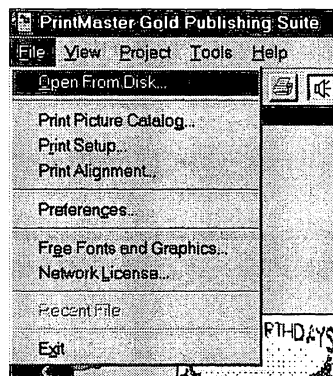

1. Choose the category to open by clicking on its tab. To open your own saved Envelope projects, click the tab labeled: **Your Own**.
2. Highlight an Envelope project by clicking on its preview. To see other Envelope projects within the same category click the **More** arrow button on the bottom section of the album.

A larger sample can be viewed by opening the **View** menu and selecting the **Full-sized Projects** option. To return to the standard preview open the View menu again and select **Thumbnails**.

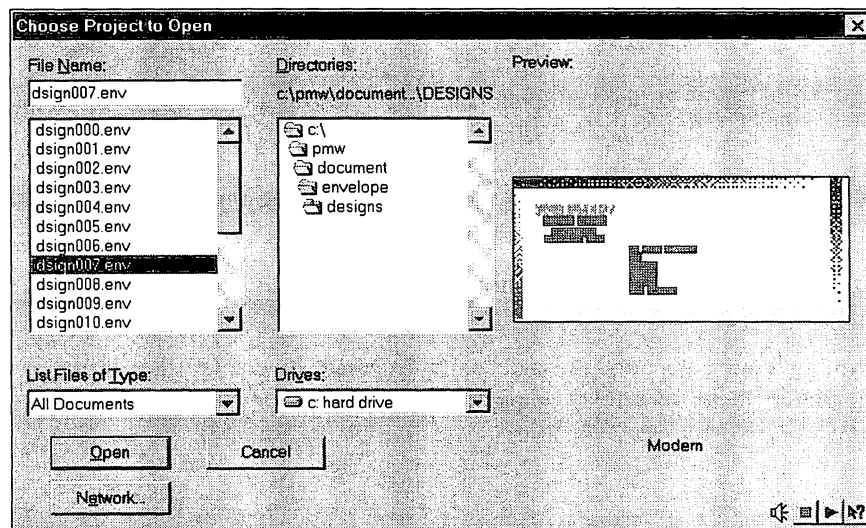

3. Click the **Open** button or press **[ENTER]** to open the selected Envelope project.

### Opening projects from another disk

1. To open a project from a floppy disk, pull down the **File** menu and select the **Open From Disk...** item.

2. Select an Envelope by clicking on its name in the File Name list—a preview of the highlighted Envelope will appear to the right.

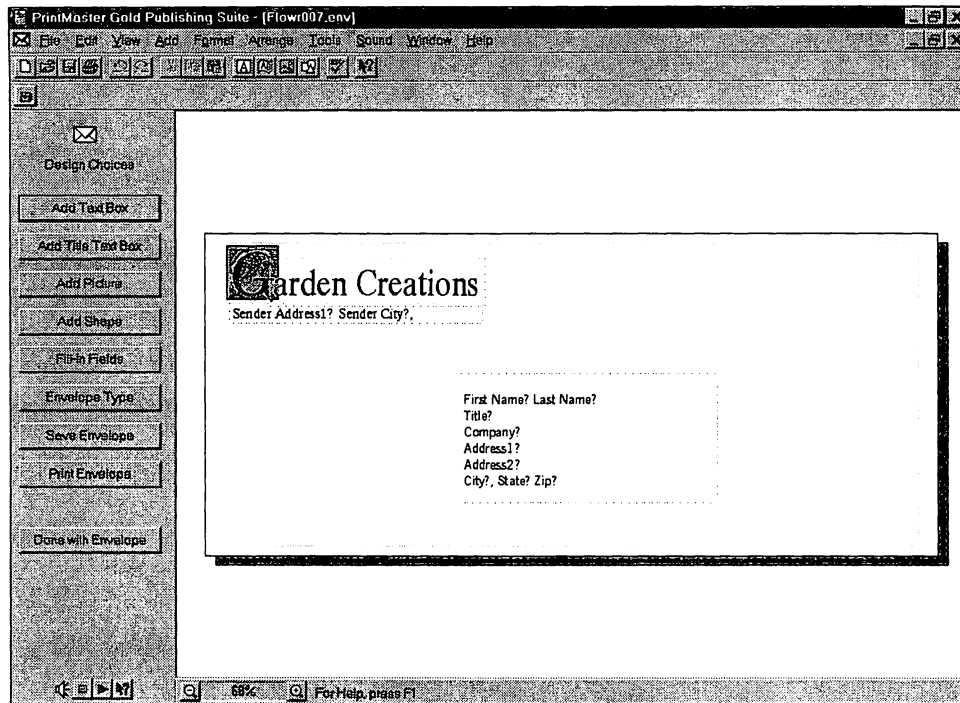

3. Click the **Open** button or press **[ENTER]** to open the selected Envelope project.

## Envelope Design Choices

---

The Design Choices menu provides a list of key design elements and commands you can work with to create, print, and save your own customized Envelope projects. Additional commands and editing features may be accessed from the toolbar or menus at the top of the PrintMaster Gold screen.

Choose a design option by clicking on the corresponding sidebar button.

Click this button to begin working on your Envelope's **Text**.

Click this button to begin working on **Title Text** for your Envelope.

Click this button to begin working on **Pictures** for your Envelope.

Click this button to add **Shapes** to your Envelope.

After confirming your selection, the sidebar will change to display the design elements available for editing your background, text, or pictures.

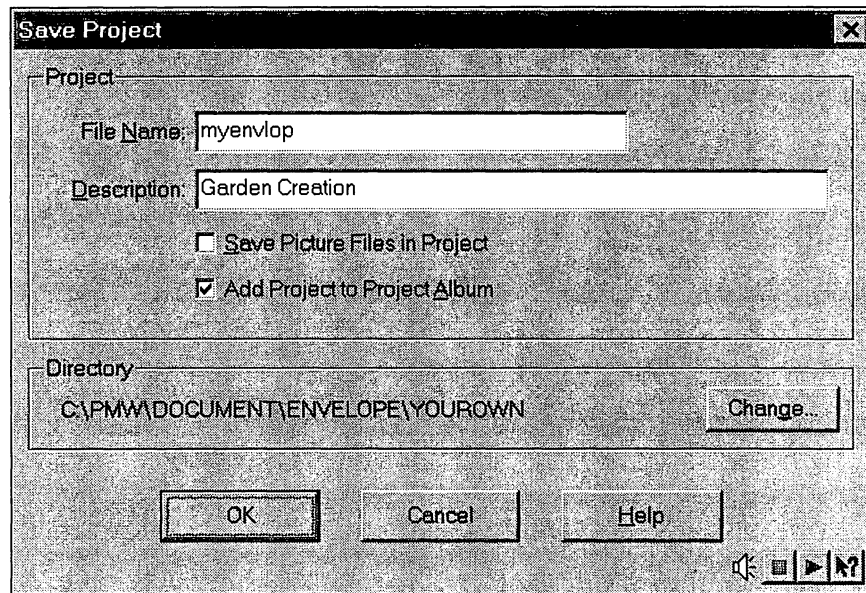

## Save Envelope

---

This command will enable you to save your Envelope project with a unique name and description that you provide.

1. Click the **Save Envelope** button located on the sidebar menu.

To save an existing Envelope project under a new name and description, select **Save As...** from the **File** menu. PrintMaster Gold will then prompt you to type in a new file name and description.

2. If you are saving a new Envelope project, PrintMaster Gold will prompt you for a unique file name. Type in the new **File Name** into the box provided.
3. You may also attach a short description to your Envelope project by typing it into the **Description** box.
4. To change the default drive and/or directory that your project will be saved to click **Change...** and select the new destination.
5. Click **OK** or press **ENTER** to save your Envelope project.

### Save Picture Files in Project

This function embeds a copy of the picture files used in your Envelope within the document itself so that the original picture file is not required the next time you open your Envelope.

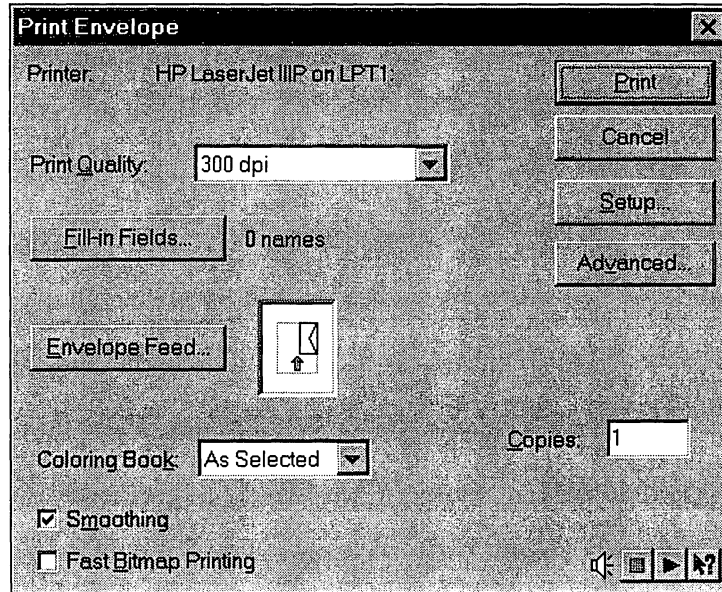

This feature is particularly useful when using pictures that are selected from a floppy disk or CD. When selected PrintMaster Gold will not require you to insert the floppy disk or CD containing the picture(s) used each time you open your project.

## Print Envelope

---

This option brings up the Print dialog enabling you to print your Envelope project. From this dialog you can also choose the number of printed copies, the print quality, and other features. See the chapter entitled: *Printing a Project* for more details.

1. Click the **Print Envelope** button to display the Print dialog box.
2. Click **Print** to begin printing your project.

## Done with Envelope

---

This option closes the Envelope project screen and returns you to the main PrintMaster Gold screen. From the main screen you can select other project types (*i.e., Banner, Calendar, etc.*) or exit the program.

1. Click the **Done with Envelope** button to exit and return to the main menu. If you have not already saved your Envelope, you will be prompted to do so at this point.

## Creating a Note Card

---

Use PrintMaster Gold to create your own business Note Cards to give out to work associates, friends, or family members.

---

*All PrintMaster Gold projects are arranged in an on screen album for easy access. Click the project tab located on the right side of the album to select a project category.*

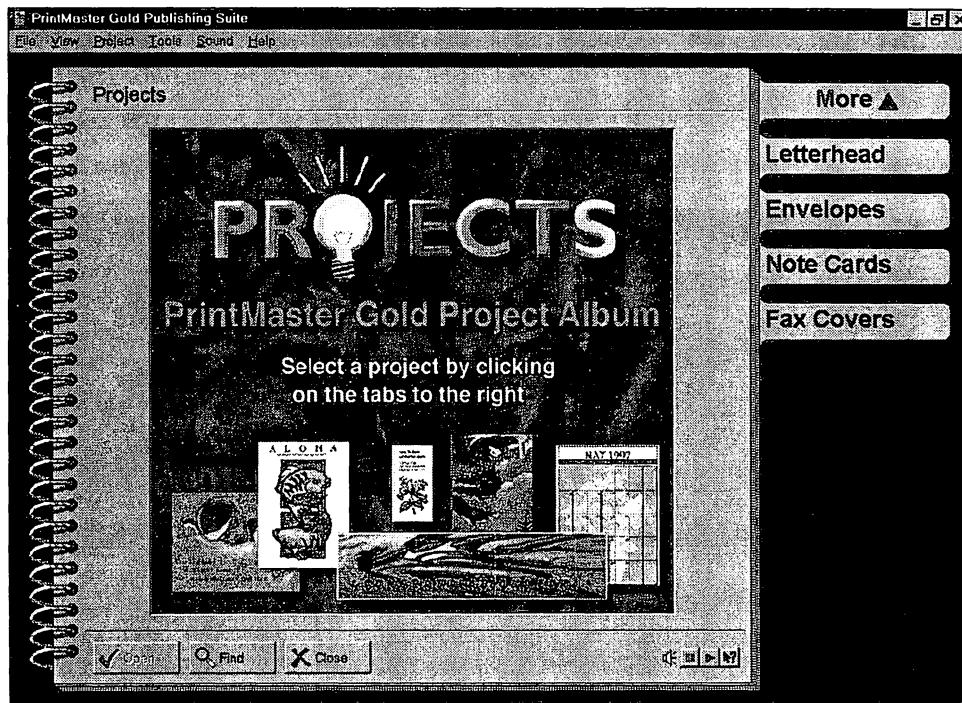

---

### Beginning a Note Card

---

The following instructions describe how to create a new Note Card project, open an existing Note Card project, save a Note Card project, and print a Note Card project.

1. Click on the **Note Cards** tab located on the PrintMaster Gold project album to:
  - a. Start a *new* Note Card project.
  - b. Open an *existing* Note Card project (or template).

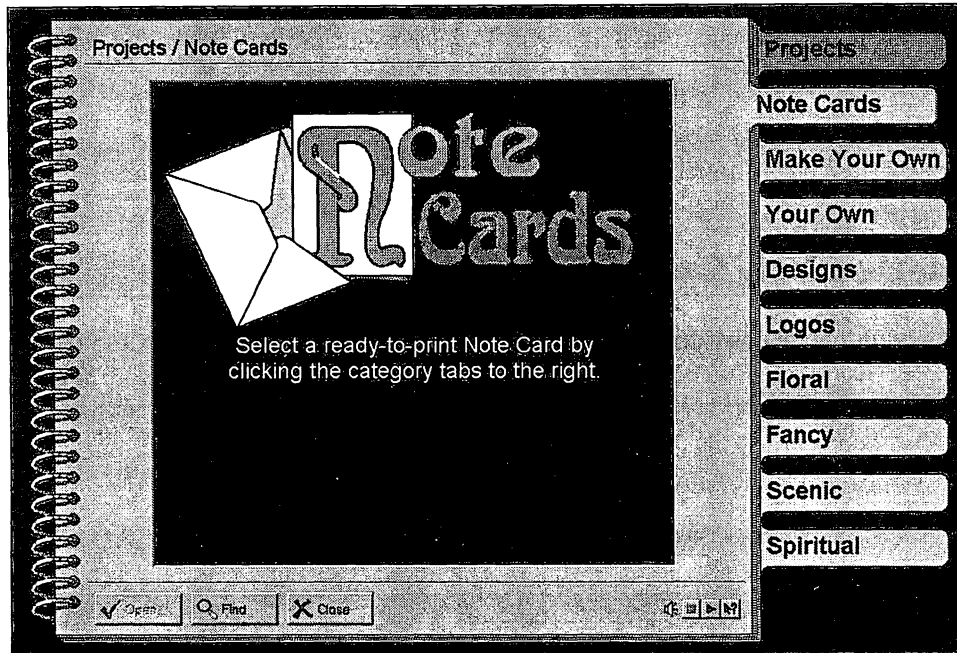

PrintMaster Gold provides many different categories of Note Cards from which you may choose from. To browse a category, simply click on its tab located on the project album.

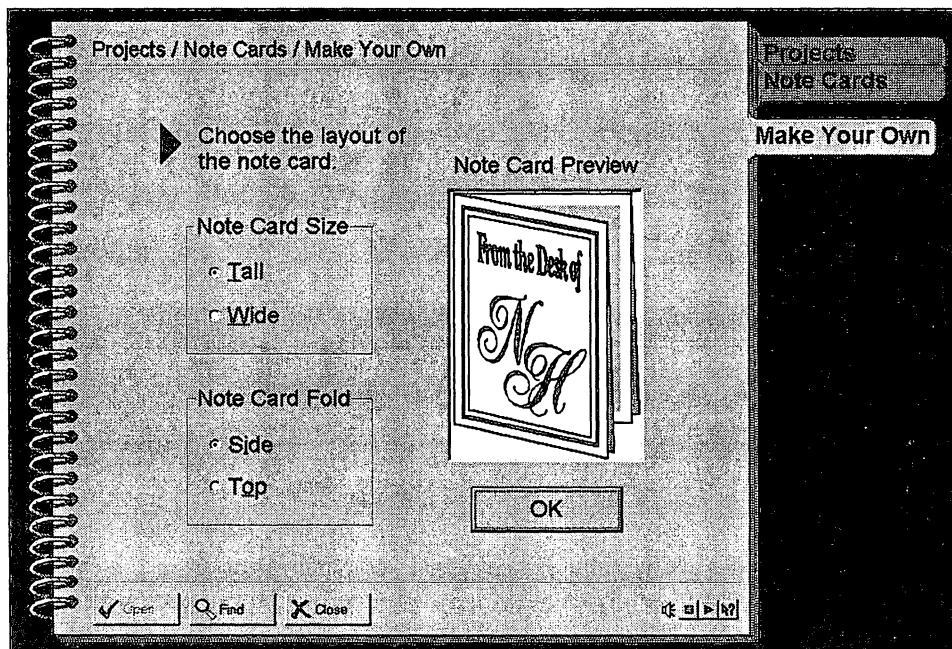

## To create a new Note Card:

---

1. Click the **Make Your Own** tab to start a new Note Card project.

2. When creating a new Note Card, you will be prompted to select a page layout for your new project. Use your mouse to select the **Note Card Size**.

- The Size option **Tall** (or Portrait) prints text across the short width of the paper.
- The Size option **Wide** (or Landscape) prints text across the long width of the paper.

3. Select the location of the **Note Card Fold**.
  - The Fold option **Side** places the Note Card fold on the left side of the Note Card.
  - The Fold option **Top** places the Note Card fold at the top of the Note Card.
4. Click **OK** or press **ENTER** to begin editing your Note Card project.

## To open an existing Note Card:

---

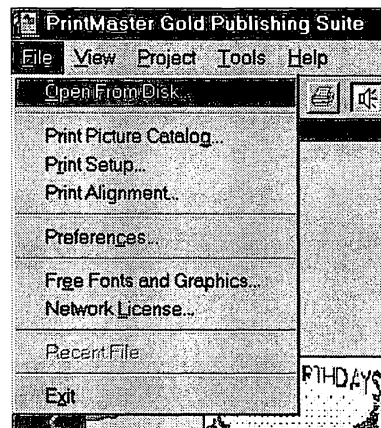

1. Choose the category to open by clicking on its tab. To open your own saved Note Card projects, click the **More** tab and choose the tab labeled: **Your Own**.
2. Highlight a Note Card project by clicking on its preview. To see other Note Card projects within the same category click the **More** arrow button on the bottom right section of the album.

A larger sample can be viewed by opening the **View** menu and selecting the **Full-sized Projects** option. To return to the standard preview open the View menu again and select **Thumbnails**.

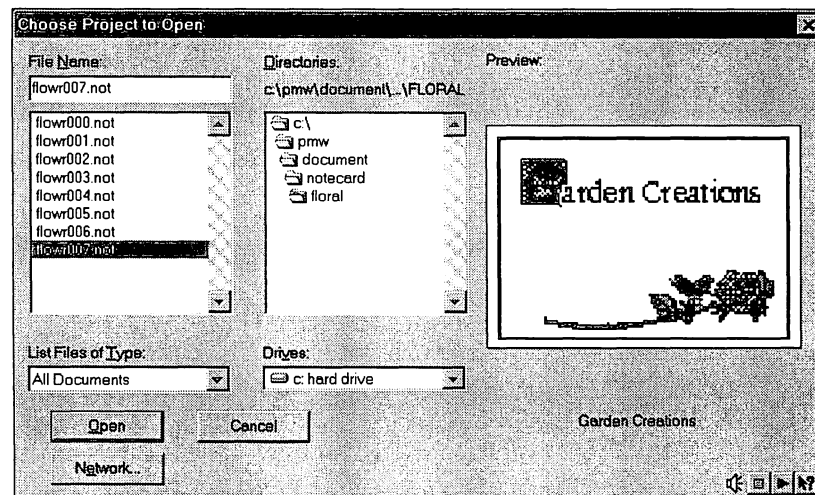

3. Click the **Open** button or press **[ENTER]** to open the selected Note Card project.

### Opening projects from another disk

1. To open a project from a floppy disk, pull down the **File** menu and select the **Open From Disk...** item.

2. Select a Note Card by clicking on its name in the File Name list—a preview of the highlighted Note Card will appear to the right.

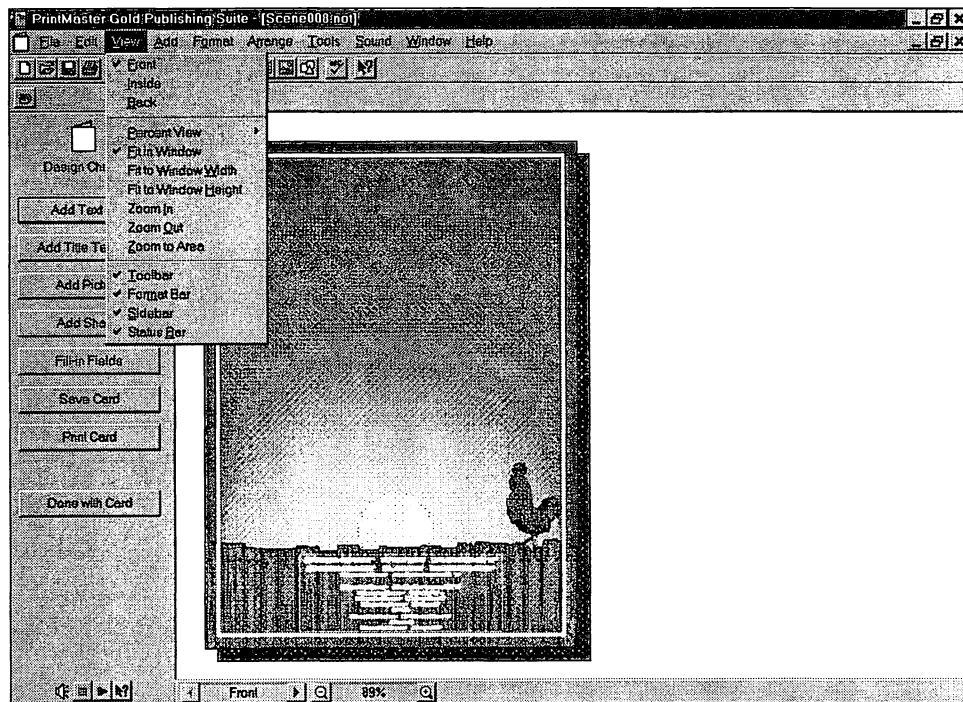

3. Click the **Open** button or press **[ENTER]** to open the selected Note Card project.

## Select the Panel to Edit

---

Note Cards are made up of four separate panels comprising the front, back, and inside surfaces of the Note Card. Each panel can have its own background, text, and picture elements. You select the Note Card panel you want to work on by pulling down the **View** menu.

You can also select a Note Card panel to work on by clicking on the corresponding arrow button located on the bottom of the screen.

**Front** — Select this option to edit the **Front** panel of your Note Card.

**Inside** — Select this option to edit the two **Inside** panels of your Note Card.

**Back** — Select this option to edit the **Back** panel of your Note Card.

Once you have selected a Note Card panel to work on the sidebar will display options for editing the background, text, and pictures in that panel.

## Note Card Design Choices

---

The Design Choices menu provides a list of key design elements and commands you can work with to create, print, and save your own customized Note Card projects. Additional commands and editing features may be accessed from the toolbar or menus at the top of the PrintMaster Gold screen.

Choose a design option by clicking on the corresponding sidebar button.

Add Text Box

Click this button to begin working on your Note Card's **Text**.

Add Title Text Box

Click this button to begin working on **Title Text** for your Note Card.

Add Picture

Click this button to begin working on **Pictures** for your Note Card.

Add Shape

Click this button to add **Shapes** to your Note Card.

After confirming your selection, the sidebar will change to display the design elements available for editing your background, text, or pictures.

See the command reference sections later on in this guide for a complete description of working with backgrounds, text and pictures.

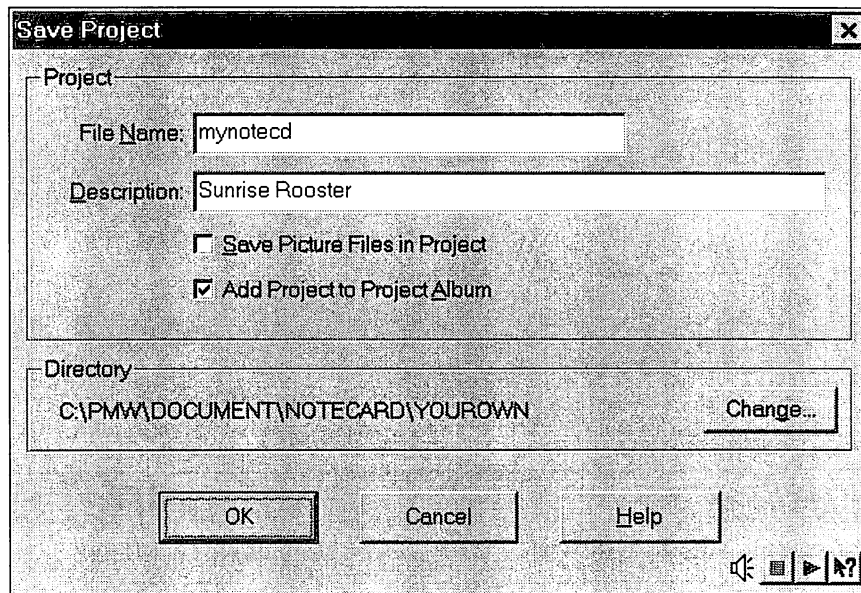

## Save Note Card

---

This command will enable you to save your Note Card project with a unique name and description that you provide.

1. Click the **Save Card** button located on the sidebar menu.

To save an existing Note Card project under a new name and description, select **Save As...** from the **File** menu. PrintMaster Gold will then prompt you to type in a new file name and description.

2. If you are saving a new Note Card project, PrintMaster Gold will prompt you for a unique file name. Type in the new **File Name** into the box provided.
3. You may also attach a short description to your Note Card project by typing it into the **Description** box.
4. To change the default drive and/or directory that your project will be saved to click **Change...** and select the new destination.
5. Click **OK** or press **[ENTER]** to save your Note Card project.

### Save Picture Files in Project

This function embeds a copy of the picture files used in your Note Card within the document itself so that the original picture file is not required the next time you open your Note Card.

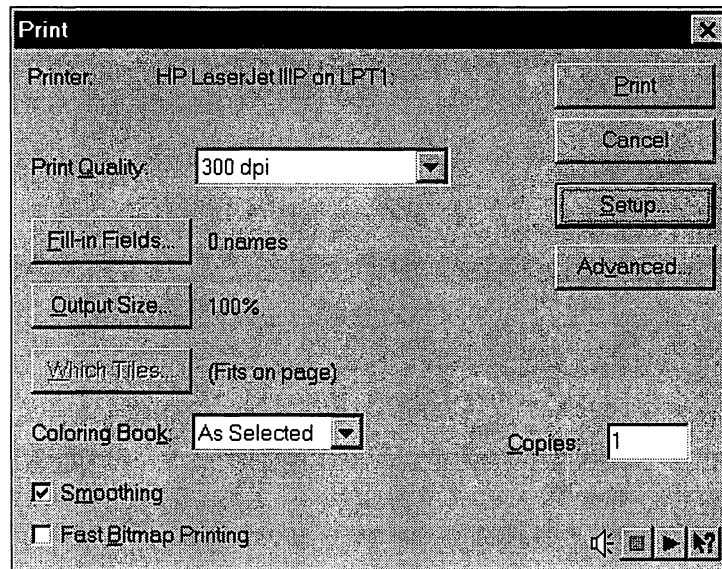

This feature is particularly useful when using pictures that are selected from a floppy disk or CD. When selected PrintMaster Gold will not require you to insert the floppy disk or CD containing the picture(s) used each time you open your project.

## Print Note Card

---

This option brings up the Print dialog enabling you to print your Note Card project. From this dialog you can also choose the number of printed copies, the print quality, and other features. See the chapter entitled: *Printing a Project* for more details.

1. Click the **Print Card** button to display the Print dialog box.
2. Click **Print** to begin printing your project.

## Done with Note Card

---

This option closes the Note Card project screen and returns you to the main PrintMaster Gold screen. From the main screen you can select other project types (*i.e.*, *Banner*, *Calendar*, *etc.*) or exit the program.

1. Click the **Done with Card** button to exit and return to the main menu. If you have not already saved your Note Card, you will be prompted to do so at this point.

## How To Fold A Note Card

---

With the printed side facing down, bring the top and bottom edges together and crease the fold. With the inside of the Note Card facing you, bring the left edge to the right edge (so that the Note Card front is now on top) and crease the fold.

### Tall

### Wide

This page intentionally left blank.

# Creating a Fax Cover

The Fax Cover project can be used to produce your choice of attractive Fax Covers.

*All PrintMaster Gold projects are arranged in an on screen album for easy access. Click the project tab located on the right side of the album to select a project category.*

## Beginning a Fax Cover

The following instructions describe how to create a new Fax Cover project, open an existing Fax Cover project, save a Fax Cover project, and print a Fax Cover project.

1. Click on the **Fax Covers** tab located on the PrintMaster Gold project album to:
  - a. Start a *new* Fax Cover project.
  - b. Open an *existing* Fax Cover project (or template).

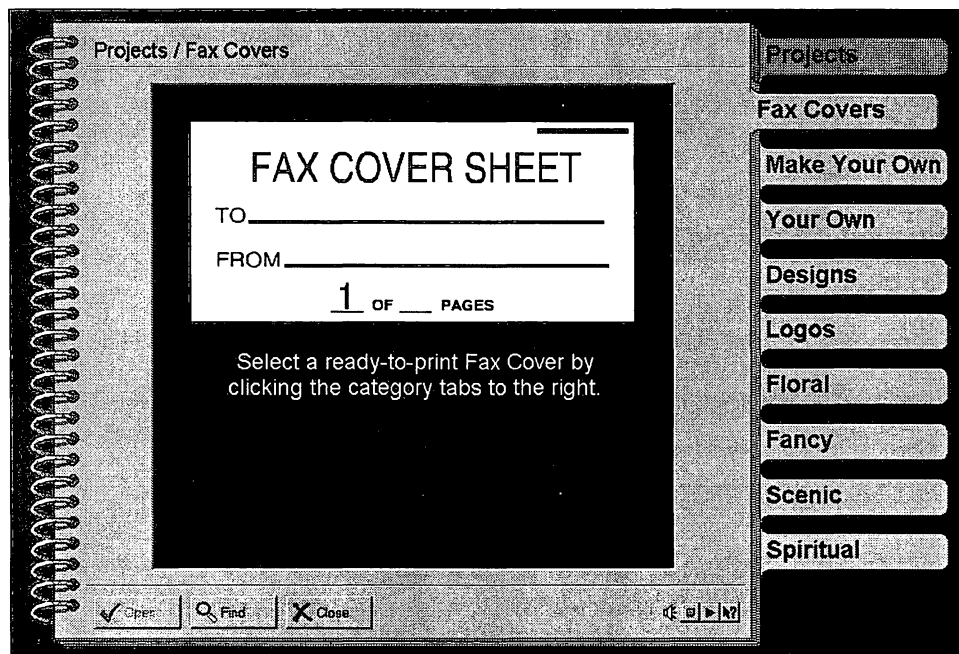

PrintMaster Gold provides many different categories of Fax Covers from which you may choose from. To browse a category, simply click on its tab located on the project album.

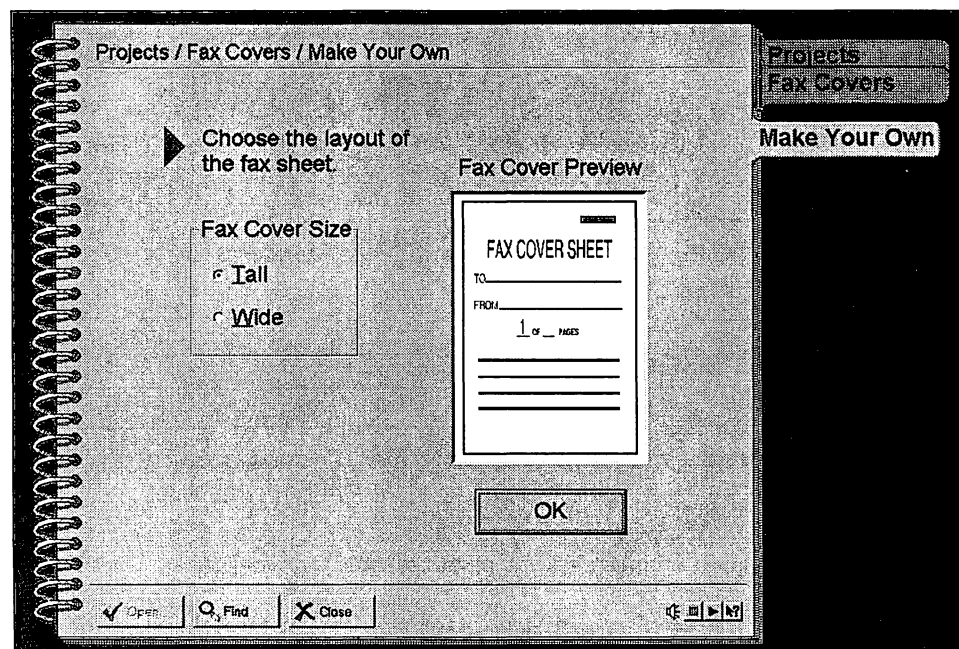

## To create a new Fax Cover:

---

1. Click the **Make Your Own** tab to start a new Fax Cover project.

2. When creating a new Fax Cover, you will be prompted to select a page layout for your new project. Use your mouse to select the **Fax Cover Size**.

- The Size option **Tall** (or Portrait) prints text across the short width of the paper.
- The Size option **Wide** (or Landscape) prints text across the long width of the paper.

## To open an existing Fax Cover:

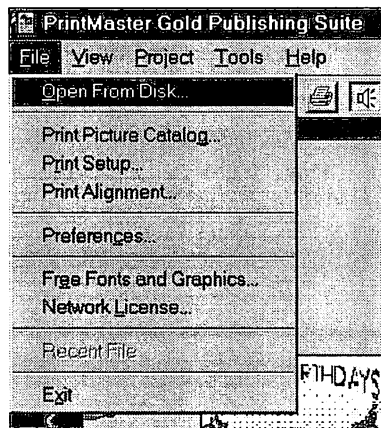

1. Choose the category to open by clicking on its tab. To open your own saved Fax Cover projects, click the **More** tab and choose the tab labeled: **Your Own**.
2. Highlight a Fax Cover project by clicking on its preview. To see other Fax Cover projects within the same category click the **More** arrow button on the bottom right section of the album.

A larger sample can be viewed by opening the **View** menu and selecting the **Full-sized Projects** option. To return to the standard preview open the View menu again and select **Thumbnails**.

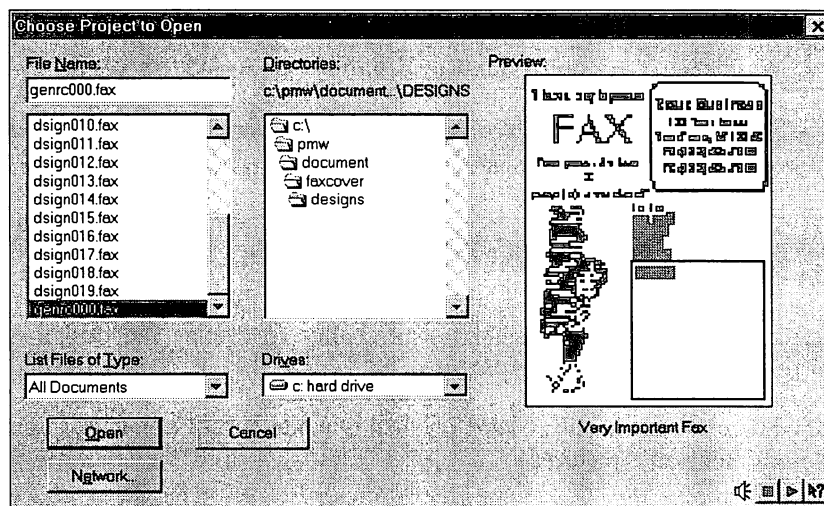

3. Click the **Open** button or press **[ENTER]** to open the selected Fax Cover project.

### Opening projects from another disk

1. To open a project from a floppy disk, pull down the **File** menu and select the **Open From Disk...** item.

2. Select a Fax Cover by clicking on its name in the File Name list—a preview of the highlighted Fax Cover will appear to the right.

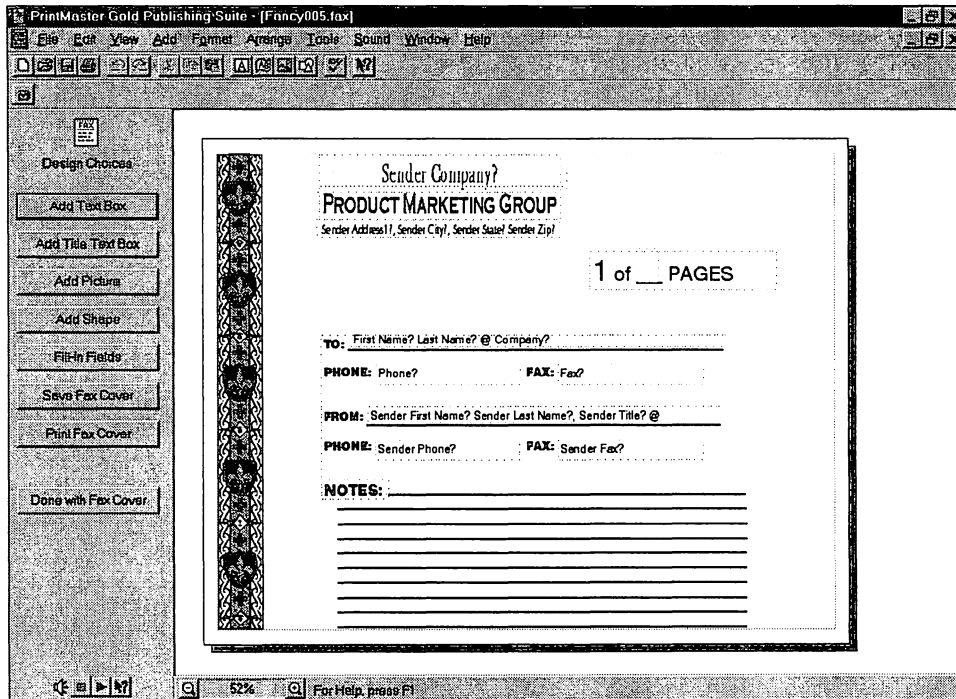

3. Click the **Open** button or press **[ENTER]** to open the selected Fax Cover project.

## Fax Cover Design Choices

---

The Design Choices menu provides a list of key design elements and commands you can work with to create, print, and save your own customized Fax Cover projects. Additional commands and editing features may be accessed from the toolbar or menus at the top of the PrintMaster Gold screen.

Choose a design option by clicking on the corresponding sidebar button.

Click this button to begin working on your Fax Cover's **Text**.

Click this button to begin working on **Title Text** for your Fax Cover.

Click this button to begin working on **Pictures** for your Fax Cover.

Click this button to add **Shapes** to your Fax Cover.

After confirming your selection, the sidebar will change to display the design elements available for editing your background, text, or pictures.

See the command reference sections later on in this guide for a complete description of working with backgrounds, text and pictures.

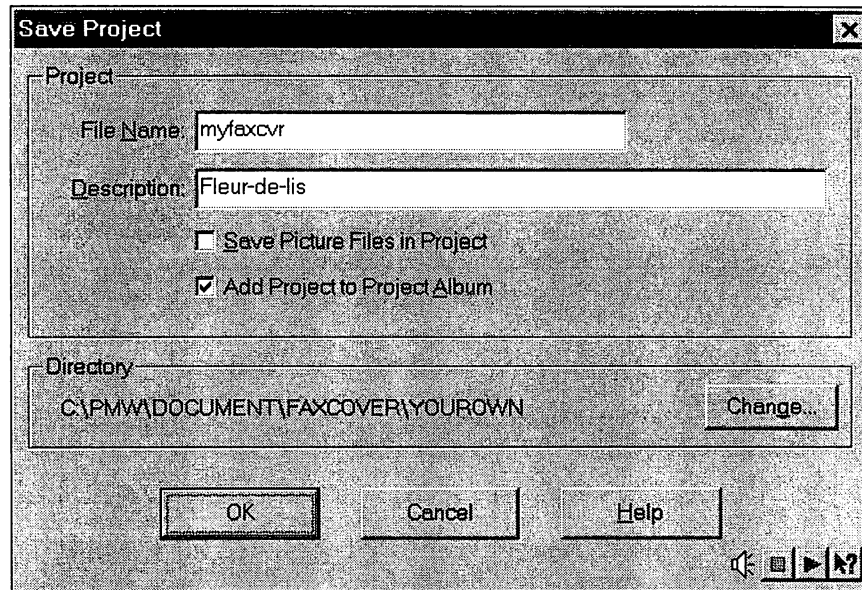

## Save Fax Cover

---

This command will enable you to save your Fax Cover project with a unique name and description that you provide.

1. Click the **Save Fax Cover** button located on the sidebar menu.

To save an existing Fax Cover project under a new name and description, select **Save As...** from the **File** menu. PrintMaster Gold will then prompt you to type in a new file name and description.

2. If you are saving a new Fax Cover project, PrintMaster Gold will prompt you for a unique file name. Type in the new **File Name** into the box provided.
3. You may also attach a short description to your Fax Cover project by typing it into the **Description** box.
4. To change the default drive and/or directory that your project will be saved to click **Change...** and select the new destination.
5. Click **OK** or press **ENTER** to save your Fax Cover project.

### Save Picture Files in Project

This function embeds a copy of the picture files used in your Fax Cover within the document itself so that the original picture file is not required the next time you open your Fax Cover.

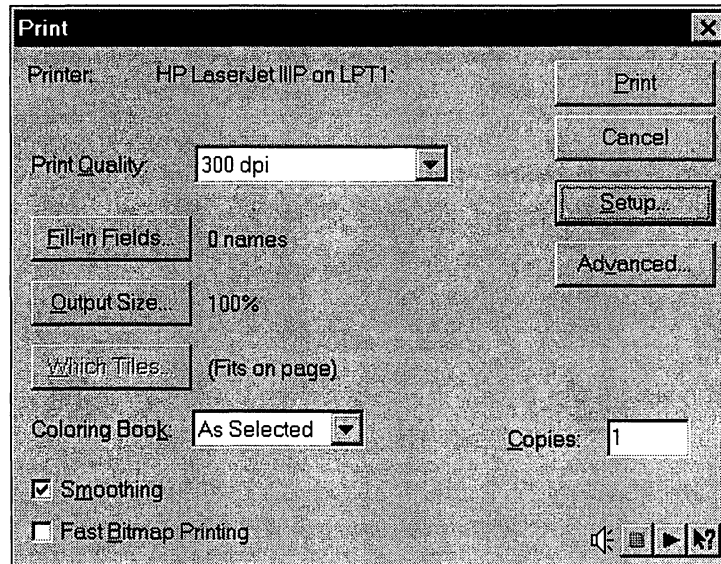

This feature is particularly useful when using pictures that are selected from a floppy disk or CD. When selected PrintMaster Gold will not require you to insert the floppy disk or CD containing the picture(s) used each time you open your project.

## Print Fax Cover

---

This option brings up the Print dialog enabling you to print your Fax Cover project. From this dialog you can also choose the number of printed copies, the print quality, and other features. See the chapter entitled: *Printing a Project* for more details.

1. Click the **Print Fax Cover** button to display the Print dialog box.
2. Click **Print** to begin printing your project.

## Done with Fax Cover

---

This option closes the Fax Cover project screen and returns you to the main PrintMaster Gold screen. From the main screen you can select other project types (*i.e.*, *Banner*, *Calendar*, *etc.*) or exit the program.

1. Click the **Done with Fax Cover** button to exit and return to the main menu. If you have not already saved your Fax Cover, you will be prompted to do so at this point.

Great-looking text can make the difference between getting read or being ignored. With PrintMaster Gold you can choose from a rich palette of text editing commands that let you modify any selected text with your choice of fonts, sizes, styles, colors, and exciting effects that are guaranteed to get your projects noticed!

This chapter provides step-by-step instructions that describe all aspects of working with text in PrintMaster Gold: adding text to your projects, editing text, changing text size and appearance, positioning and stretching text, and even combining separate text elements into groups.

### Text Boxes

---

First, it is helpful to understand all text in PrintMaster Gold projects is contained in text boxes. You can have as many text boxes as you like and they can be re-sized or arranged anywhere you want on the page. In addition to standard text boxes, PrintMaster Gold provides Title text boxes that can be shaped and rotated. PrintMaster Gold outlines a text box to indicate its size and that it is *selected*.

Text Box Handles

The dots located at the corners and in the middle of each edge of the text box outline are called *handles*. They are used to re-size, position, and rotate a text box by clicking and dragging with your mouse.

In the following sections, you'll see how text boxes make it extremely easy for you to change the size and position of various text elements in your projects—until you get everything looking just right!

## Selecting, Adding, and Removing Text

You'll often want to change the appearance, size, or position of some existing text. Normally, the easiest way to select the text you want to change is to simply click on it with your left mouse button. The selected text will be outlined within its text box and the Text Box sidebar will be activated with options for editing and positioning.

1. Clicking **Add Text Box** on the Design Choices sidebar will create and select an empty text box that will be placed in the middle of your project layout area.

*or*

Clicking **Add Title Text Box** on the Design Choices sidebar will create and select an empty title text box that will be placed in the middle of your project layout area. Title text boxes are text boxes that can be shaped or rotated.

2. Clicking the **Remove Text Box** button in the Select Text dialog will remove the text box (from your project) associated with the currently highlighted sample text.

Once you have selected a text box, the Text Box sidebar will be activated. Use the Text Box sidebar options to edit and position the selected text box.

## Editing Text

The fastest way to edit a specific section of text is to simply double-click on it. A cursor will appear within the selected text at the position indicated by your mouse and the Edit Text sidebar will be activated with a variety of options for changing the font attributes and text formatting. You can also select the Type and Edit Text option from the Text Box sidebar.

1. Click the **Type and Edit Text** button in the Text Box sidebar to begin editing text.

A cursor will appear in the text box that has been selected for editing and the Edit Text sidebar will be displayed with options for changing the font attributes and text formatting of the selected text box.

### Typing text in a new text box

As you type, the letters will appear in the upper left corner of the selected text box at the position indicated by the cursor.

- Press **ENTER** to move the cursor to the next line.
- Press the **Spacebar** to move the cursor one space to the right.

## Typing text in an existing text box

Move the mouse pointer to where you want the text to appear, click once, and then start typing. The letters will appear at the position indicated by the cursor.

- Press **[DEL]** to delete the character to the right of the cursor.
- Press **[BACKSPACE]** to delete the character to the left of the cursor.

## Selecting a section of text

You can delete, copy, or make font changes to a specific section of text within a text box by selecting the section of text you want to change.

1. Position the cursor to one side of the desired section of text using the mouse or the navigation keys (**[↑]**, **[←]**, **[→]**, **[↓]**, **[HOME]**, **[END]**).
2. Drag the cursor across the section of the text you want to select using the mouse or by holding down the **[SHIFT]** key and extending the highlight using the navigation keys (**[↑]**, **[←]**, **[→]**, **[↓]**, **[HOME]**, **[END]**).

## Deleting, copying, and inserting selected text

1. Select (highlight) a section of text within a text box as described above.
  - Press **[DEL]** to delete the currently selected (highlighted) text.
  - Press **[CTRL]+[INS]** to copy the selected text to the Windows clipboard.
  - Press **[SHIFT]+[DEL]** to delete and copy the selected text to the Windows clipboard.
  - Press **[SHIFT]+[INS]** to insert the copied clipboard text at the current cursor position.

For more detailed information regarding the standard Windows navigation and editing commands please see your Windows User's Guide.

## Changing Text Attributes

---

PrintMaster Gold lets you change the attributes on a character-by-character basis of any selected text with your choice of fonts, sizes, styles, colors, and special effects.

1. Select (highlight) the section of text you want to change.

---

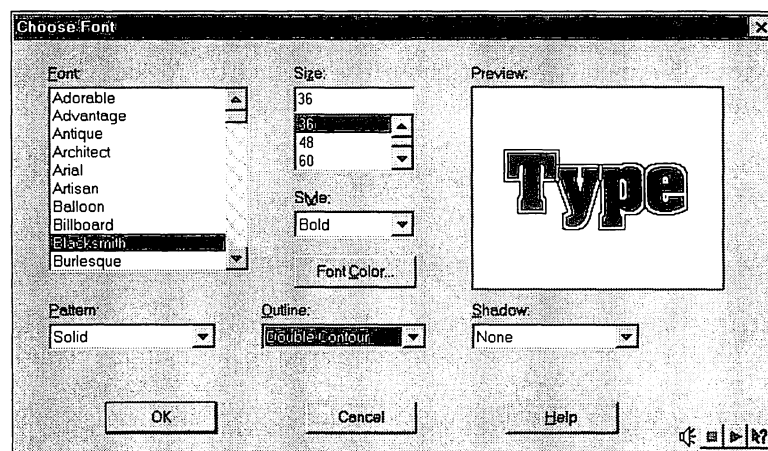

*All font changes are applied only to the currently selected section of text.*

---

2. Click the **Font** button in the Edit Text menu to bring up the Choose Font dialog.

3. Choose any of the text attribute options (e.g., Font, Size, Style, Pattern, etc.).

**Font**—Use this option to choose the font you want applied to the currently selected text.

1. Use the scroll bars or the **↑** or **↓** keys to scroll through the list of available fonts. A sample of the highlighted font will be displayed on the right side of the menu.
2. Highlight the font you want and click **OK** or press **ENTER**.

**Size** — Use this option to choose the size you want applied to the currently selected text.

1. Use the scroll bars or the  or  keys to scroll through the list of available sizes, or type in any size up to 1000 points.
2. Click **OK** or press  to confirm your selection.

**Style** — Use this option to choose the style you want applied to the currently selected text.

1. Pull down the Style menu with your mouse. Click on either the **Normal**, **Bold**, **Italic**, or **Bold Italic** font style. A sample of the highlighted style will be displayed on the right side of the font menu.
2. Click **OK** or press  to confirm your selection.

---

*Some decorative fonts (e.g. Burlesque, Opera, Showtime, etc.) do not have a Bold or Italic variation and cannot be altered.*

---

**Pattern** — Use this option to choose the pattern you want applied to the currently selected text.

1. Pull down the Pattern menu with your mouse. Use the scroll bars or the  or  keys to scroll through the list. A sample of each selected pattern is displayed on the right side of the font menu.
2. Click **OK** or press  to confirm your selection.

---

*Some Patterns (e.g., White, 2% Gray, etc.) are more effective when accompanied by an Outline or a Shadow.*

---

**Outline** — Use this option to choose the outline you want applied to the currently selected text.

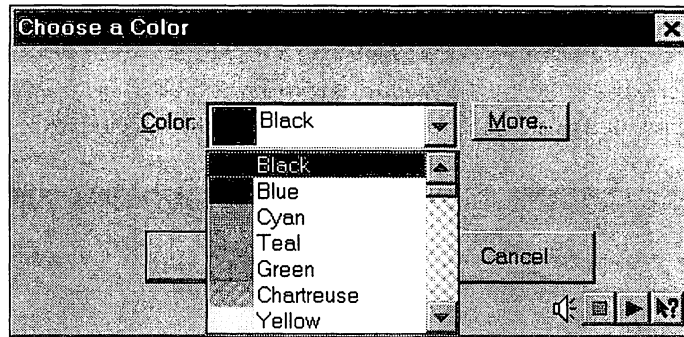

1. Pull down the Outline menu with your mouse. Use the scroll bars or the  or  keys to scroll through the list. A sample of each selected outline is displayed on the right side of the font menu.
2. Click **OK** or press  to confirm your selection.

**Shadow** — Use this option to choose the shadow you want applied to the currently selected text.

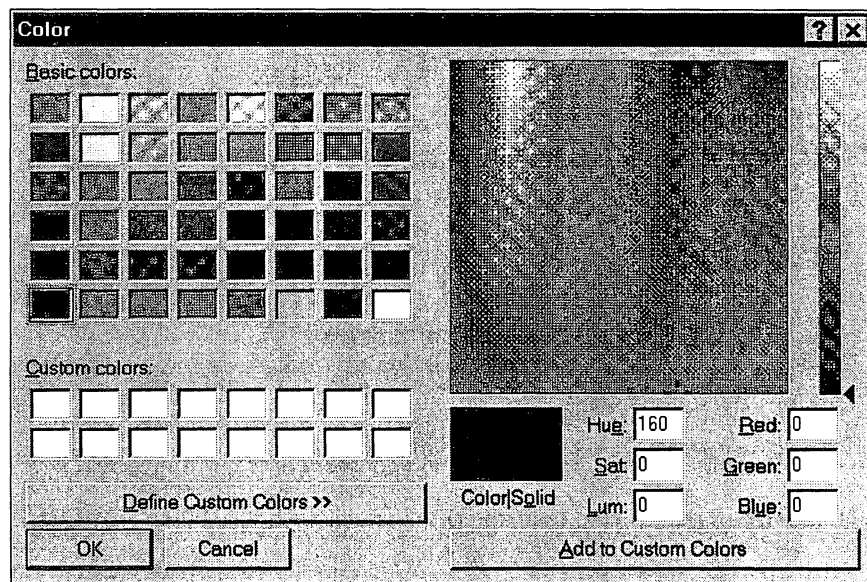

1. Pull down the Shadow menu with your mouse. Use the scroll bars or the  or  keys to scroll through the list. A sample of each selected shadow is displayed on the right side of the font menu.
2. Click **OK** or press  to confirm your selection.

**Color** — Use this option to choose the color you want applied to the currently selected text.

1. Click the **Font Color** button or press + to bring up the Choose Color dialog. (*This option can also be selected from the Edit Text sidebar.*)

2. Pull down the Color menu with your mouse. Use the scroll bars or the ↑ or ↓ keys to scroll through the list of available colors, or click **More...** to select a custom color.

3. Select the color you want and click **OK** or press ENTER.

## Formatting Text within a Text Box

---

In addition to the extensive text attribute options, the Edit Text sidebar also provides a variety of formatting options that can be applied to all of the text contained within the selected text box.

**Horizontal** — Use this option to control horizontal alignment of text within a text box.

1. Click the **Horizontal** list box to open the Horizontal list. Choose **Left**, **Centered**, or **Right Aligned**.

**Vertical** — Use this option to control vertical alignment of text within a text box.

1. Click the **Vertical** list box to open the Vertical list. Choose **Top**, **Middle**, or **Bottom Aligned**.

**Stretching** — This option is great for headline text! Turn Stretching on to have PrintMaster Gold automatically adjust the text size to fill the limits of a text box.

1. Click the **Stretching** item to either select or deselect the Stretching effect.

**Select All Text** — Click on this button when you want a text attribute (fonts, size, etc.) to be applied to *all* of the text within the currently active text box.

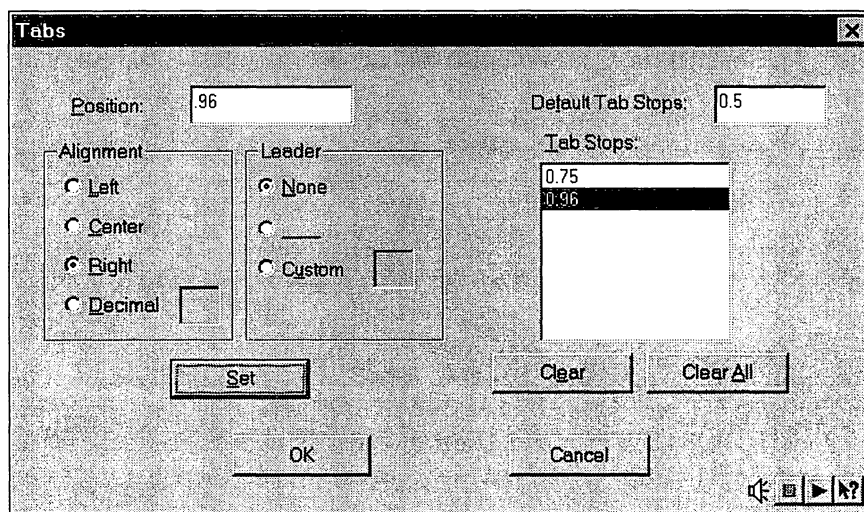

**Fill-in Fields** — The Fill-in Fields menu lets you merge information—from your Address Book or directly from your keyboard—into any project that has Inserted Fields.

**Insert Fields** — This feature is used to insert “placeholders” in your projects that are easily updated with information you provide from the Fill-in Fields menu. *See the section entitled: Address Book for detailed information.*

**Done Editing Text** — Click on this button when your done editing text.

## Setting Tabs

PrintMaster Gold enables you to control the positioning and alignment of tabs stops and determine the type of leader characters used. To access the tab control dialog, pull down the **Format** menu and click on **Tabs**. *Note that this menu item is only available while you are editing text.*

**Position** — Use this option to create a new tab stops by entering a numeric value (in inches) in the space provided and clicking **OK**.

- To set a tab stop for the selected text at the position you type in, click **Set**.
- To clear a tab stop at a position you have typed in, highlight the value as shown on the Tab Stops list and click **Clear**.
- To clear all custom tab stops in the selected text, click **Clear All**.

**Default Tab Stops** — Use this option to set the default spacing between tab stops by entering a numeric value in the space provided and clicking **OK**.

**Alignment** — Use this option to create left- and right-aligned tabs, center tabs, which center text around the tab, and decimal tabs, which align characters at a value you provide.

**Leader** — A leader is a repeated pattern, such as a series of dots or dashes, between the tab and the preceding text. Use this option to fill the empty space to the left of a tab stop with a leader character. Click either the solid line item, or choose Custom and type in a series of characters (examples: ... , \_ \_ \_ , >>> , etc.).

## Title Text Boxes

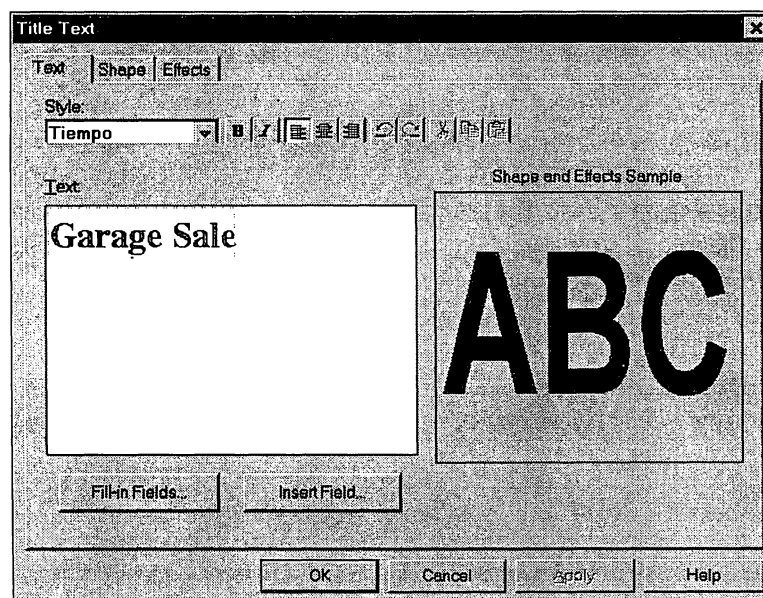

---

Another text feature of PrintMaster Gold is the *Title Text Box*. These specialized text boxes enable you to create lines of text that can be “poured” into your choice of shapes, rotated by 360 degrees, stretched and sized, or customized with a wide variety of colors and outlines. Use Title text boxes in your projects when you need attention-getting headlines.

1. Clicking **Add Title Text Box** on the Design Choices sidebar will create and select an empty text box that will be placed in the middle of your project layout area.

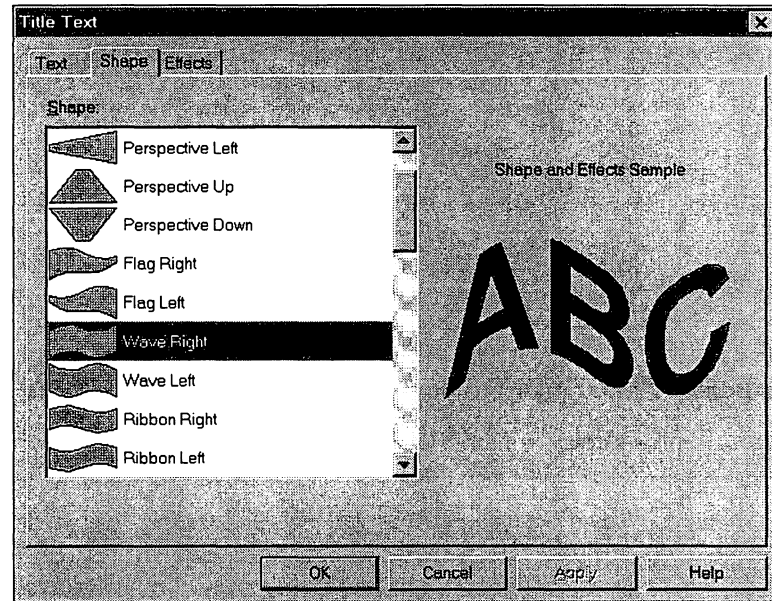

2. Type in your text in the box provided. Use the toolbar located just above the text area to change the font type and style (i.e., Bold, Italic, etc.), or to adjust text alignment (i.e., Left, Centered, etc.).

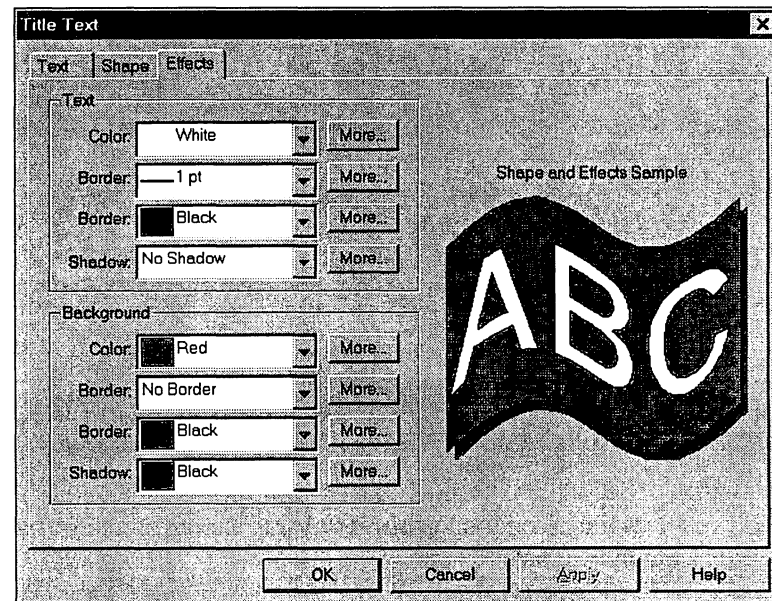

3. To select a shape for your text click the tab labeled: **Shape** located at the top of the Title Text dialog.

4. Choose a shape from the provided list. A sample of each selected shape will appear on the right side of the Title Text dialog.

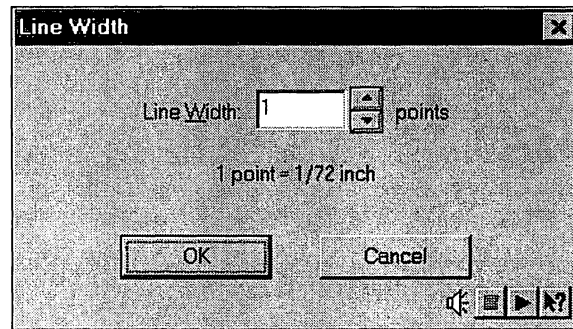

5. To apply text and background effects to your Title text, click the tab labeled: **Effects** located at the top of the dialog box.

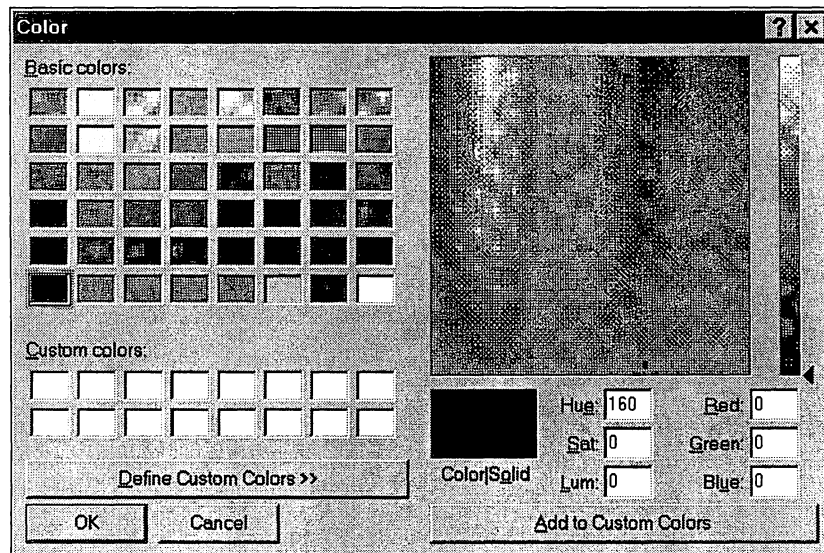

- Click the down arrow button on **Text Color** to choose a color to apply to your text from a predefined palette.  
Click **More...** to pick a color from the Windows Color dialog or define your own custom colors.
- Click the down arrow button on **Text Border** to modify the outline thickness of the selected text.

Click **More...** to create your own custom line width. The up and down arrows on the **Line Width** dialog will allow you to adjust the custom border width.

- The **Text Border Color** option enables you to change the outline color of the current text.  
Click **More...** to pick a color from the Windows Color dialog or define your own custom colors.

- The **Text Shadow** feature lets you apply a colored shadow to your text.  
Click **More...** to pick a color from the Windows Color dialog or define your own custom colors.
- Click the down arrow button on **Background Color** to choose a colored background to apply to your text from a predefined palette.  
Click **More...** to pick a color from the Windows Color dialog or define your own custom colors.
- Click the down arrow button on **Background Border** to modify the outline thickness of your text.  
Click **More...** to create your own custom line width. The up and down arrows on the **Line Width** dialog will allow you to adjust the custom border width (*See picture above*).

- The **Background Border Color** option enables you to change the outline color of your text.  
Click **More...** to pick a color from the Windows Color dialog or define a custom color.
  - The **Background Shadow** feature lets you apply a colored shadow to your text.  
Click **More...** to pick a color from the Windows Color dialog or define your own custom colors.
7. Click **OK** to confirm the changes to your title text.

### Rotating a Title Text Box

You can quickly rotate a title box by clicking on its rotation handle with the left mouse and, while holding the button down, drag the handle to the desired location. Release the mouse button when the picture is in the proper orientation. The mouse arrow pointer will change to a curved arrow when you are rotating a picture. *Note that this feature is only available to title text boxes.*

**Rotation Tip #1:** Hold down the **[SHIFT]** key while dragging to restrict the rotation to increments of 45°.

## Edit Text Commands

---

PrintMaster makes it easy to reposition a text box, change its size, or edit its appearance. Simply select the text box you want to edit (usually by clicking on it) and then choose the appropriate edit command or option. The following sections provide easy step-by-step instructions for using each of the text box editing commands.

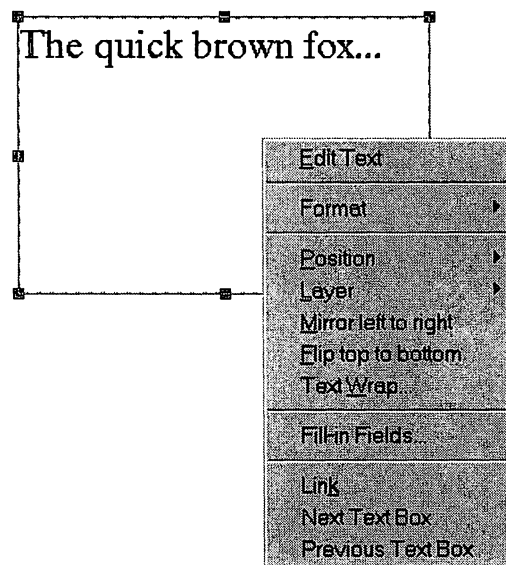

### Edit Text Box sidebar

One of the easiest ways to edit a selected Text or Title Text is to use the options located on the sidebar as shown below. Simply choose an option by clicking on the appropriate button.

### Pop-up menu

The quickest way to edit a text box is to click on it using the *right* mouse button. The text box will be selected and a small menu will pop up containing the available editing commands. Select the command you want by clicking on the appropriate line in the pop-up menu.

## Positioning & Sizing a Text Box

The most natural way to position (and size) a text box is to click on the picture with the left mouse button and, while holding the button down, drag the text box to the desired location. Release the mouse button when the text box has been properly positioned.

You can also move (and size) a text box to a standard position by clicking the **Position** button on the sidebar.

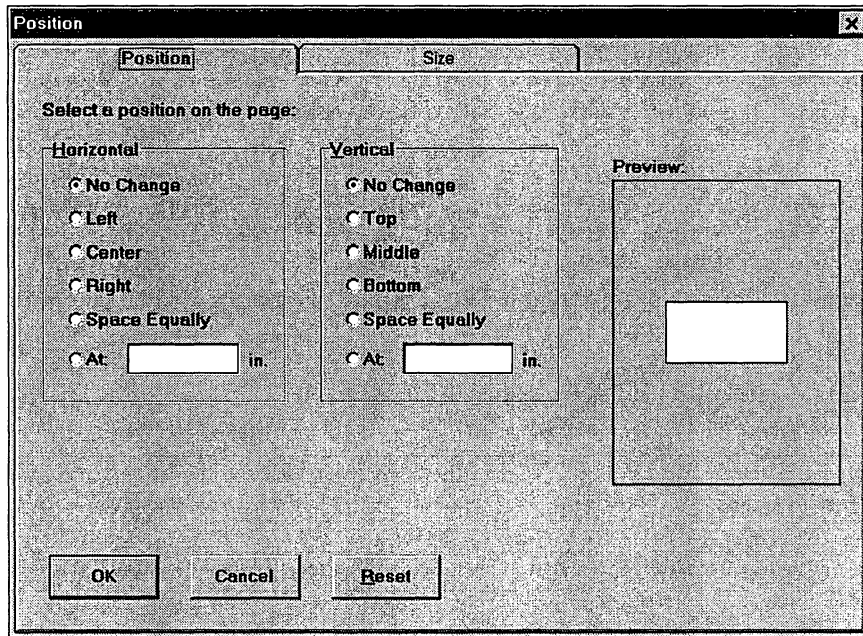

This command will bring up the Position menu containing options for placing the currently selected text box in predefined locations.

The following positioning (and sizing) options are available:

- **Center on Page** allows you to center the selected text box both horizontally and vertically on your project page.
- **Center Horizontally** allows you to center the selected text box width (left to right) of the project page.
- **Center Vertically** allows you to center the selected text box to height (top to bottom) of the project page.
- **Full Page** allows you to re-size the selected text box to the full height and width of the project page.
- **Done with Position** — click this button when you are done positioning your text box.

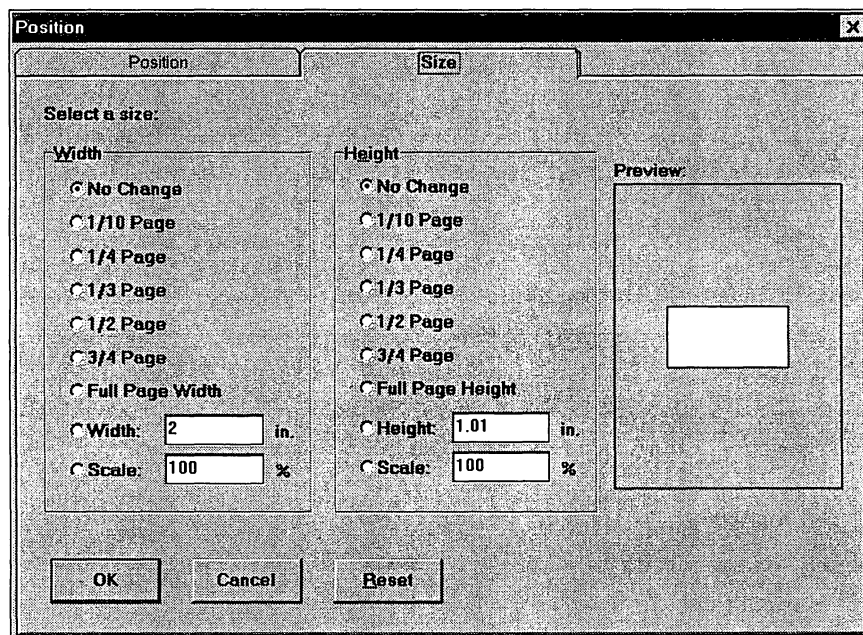

- **Position** lets you set the horizontal and vertical positioning independent of each other. Choose a standard horizontal or vertical position, or type in a specific position. Click **OK** to confirm.

Click **Reset** to return a modified text box to its last position and size on your project page.

- **Size** lets you set the horizontal and vertical size independent of each other. Choose a standard horizontal or vertical size, or type in a specific size. Click **OK** to confirm.

Click **Reset** to return a modified text box to its last position and size on your project page.

## Text Box Layer

---

Text box and picture elements in a PrintMaster project are like a deck of playing cards, each element has its own position or layer in the deck and each element can hide the elements under it, or be hidden by the elements above. PrintMaster allows you to “shuffle” the layering order of your text boxes and pictures to move selected elements in front of or behind others. Individual text boxes can be placed in front, back, or anywhere in between.

White Text in Front

White Text in Back

---

*The background, if any, is always in the backmost layer. Text boxes and pictures cannot be moved behind the background.*

---

To change the layer of the selected text box, click **Layer** in the Text Box sidebar. The Layer sidebar menu will appear with the following options:

- **Bring to Front** moves the selected text box to the first layer, in front of all other text boxes and pictures.
- **Forward One Layer** moves the selected text box forward a layer.
- **Back One Layer** moves the selected text box back a layer.
- **Send to Back** moves the selected text box to the last layer, in back of all other text boxes and pictures (except a background).
- **Done with Layer** returns to the Text Box menu.

---

*Any Layer options that do not apply to the selected text box will be disabled. For example, if the selected text box is already at the front, then **Bring to Front** will be “grayed out”.*

---

## Grouping Text Boxes and Pictures

Sometimes you'll have a combination of text boxes and pictures that need to remain positioned relative to each other. The Grouping option makes it easy for you to manage multiple text boxes and pictures that are related by combining them in a single group. In this way, you can flip, duplicate, and move all of them at the same time.

1. Use your mouse to select the text boxes and pictures you want to group together while holding down the **SHIFT** key.
2. Click the **Group** button in the Multiple sidebar.
3. To ungroup, simply select any member of the group and click the **Ungroup** button in the Multiple sidebar.

## Flipping Text Boxes

Select the **Mirror Left to Right** command to flip the selected text box horizontally as shown below.

Select the **Flip Top to Bottom** command to flip the selected picture vertically as shown below.

## Duplicating Text Boxes

The **Duplicate** option is a quick and easy way to make a copy of an existing text box. To make a duplicate of an existing text box, proceed as follows:

1. With your mouse, select the text box to be duplicated by simply clicking on it.
2. Click the **Duplicate** button in the Text Box sidebar.

The duplicate text box will appear shifted down and to the right of the original text box. It can be manually repositioned and used to create a variety of interesting three dimensional effects.

## Linking Text Box

PrintMaster Gold provides you with the ability to connect or “link” multiple text boxes of varying sizes and shapes together any where on your project page. This feature enables your text to flow from one text box to another as you type.

---

*The ability to “link” text boxes together does not apply to title text boxes.*

---

1. Click the **Add Text Box** button located on the Design Choices sidebar to place a new text box on your project. Repeat this step to as many times as necessary to add the desired number of text boxes to your page.
2. Use your mouse to click on the link button located on the bottom-right of your text (as shown below).

Note that your mouse pointer no longer appears as the standard arrow pointer.

3. Next, move your mouse pointer over to the second text box and click with the right mouse button.

Once you have linked the first two text boxes together, you can then add a third by clicking the link button located at the bottom of the **second** text box and clicking in the center of the next text box. Repeat these steps for adding a fourth text box and so forth.

4. Return to the first text box in the link and begin editing your text. As your text fills the first text box, it will then “flow” over to the second. This “flowing” of text will continue on to any other text boxes in the link.

## Remove Text Box

Click on the **Remove Text Box** button to remove the currently selected text box.

## Done with Text Box

Click on the **Done with Text Box** button to exit the Text Box sidebar and return to the Design Choices sidebar.

# Working with Pictures

---

Nothing attracts a reader's attention like a great picture. You can use pictures in your PrintMaster Gold documents to draw the reader's attention to your messages. PrintMaster Gold comes with hundreds of gorgeous clip-art images and dozens of unique shapes, perfect for every occasion.

PLUS, PrintMaster Gold works with all popular graphic formats: PCX, TIF, GIF, JPG, CGM, WMF, BMP, DIB, and Kodak Photo CD. PrintMaster Gold even lets you use your own scanned images!

This chapter provides detailed step-by-step instructions for working with pictures and shapes in PrintMaster Gold: adding them to your projects, positioning and sizing them, rotating them, layering them, changing their color, and even combining separate pictures into groups.

## Pictures & Shapes

---

PrintMaster Gold makes it extremely easy to add pictures and shapes to your projects. You can have as many pictures or shapes as you like, and they can be resized or arranged anywhere you want on the page. The pictures and shapes included with PrintMaster can be stretched, rotated, and scaled up to 6 feet with no loss of detail.

PrintMaster displays your pictures and shapes on screen so you can easily tell what your page will look like when printed. When you select a picture or shape to work on, PrintMaster places a frame around it to indicate its exact position and size.

---

*A picture or shape **must** be selected before it can be resized, positioned, or otherwise edited.*

---

The dots located at the corners and in the middle of each frame are called *handles*. Handles are used to resize, position, and rotate a picture by clicking and dragging with your mouse.

In the following sections, you'll see how easy it is to size, position, and customize the picture elements in your projects—until you get everything looking just right!

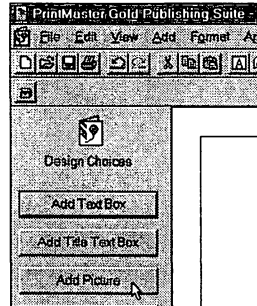

## Selecting, Adding, Removing Pictures & Shapes

---

You'll often want to change the appearance, size, or position of an existing picture or shape. The easiest way is to select the item you want to change by simply clicking on it with your left mouse button. The selected picture or shape will be highlighted with a frame and the Edit sidebar will activate with options for editing and positioning.

### Adding a New Picture

1. To begin working with Pictures, click the **Add Picture** button located on the *Sidebar*.

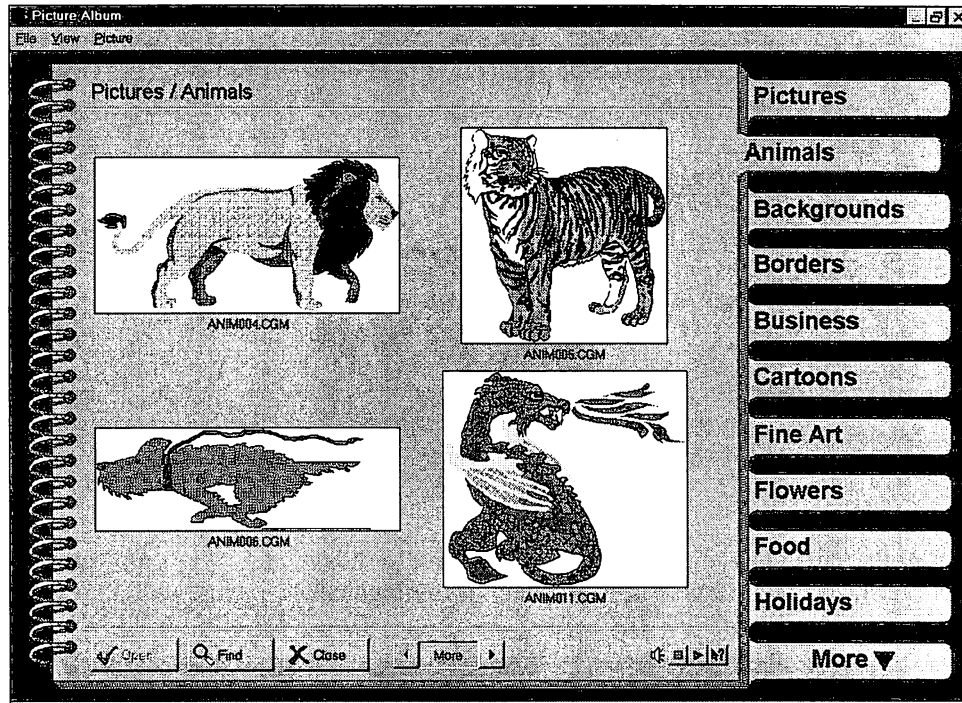

You can also add a new Picture to your project by pulling down the **Add** menu with your mouse and clicking **Picture...**, or by pressing **[ALT]+[A]**, **[P]** on your keyboard.

2. Choose a picture category from the **Picture Album** by clicking on its tab. To view additional categories, click the tab labeled: **More**.

3. Highlight a picture by clicking on its preview. To see other pictures within the same category click the **More** arrow button on the bottom of the album.

3. Select a picture by clicking on its name. Confirm your choice by clicking **Close**.

A larger sample of a highlighted picture can be seen by selecting the **Full-sized Pictures** from the **View** menu, or by pressing **[ALT]+[V]**, **[F]** on your keyboard.

To return to the standard preview click the **Thumbnails** item, or press **[ALT]+[V]**, **[U]**.

**Selection Tip:** If the item you want to select is covered by other pictures, shapes, or text boxes, hold down the **[SHIFT]** key as you click with the left mouse button and PrintMaster will select successively "deeper" items until you reach the one you want.

4. Clicking **Remove Picture** in the Edit Picture sidebar will remove the currently highlighted pictures or from your project.

---

*You can also remove a picture from your project by selecting it in the project layout with your left mouse button, pressing **[DELETE]**, and then clicking **Yes**.*

---

## Find Picture

This feature of PrintMaster Gold enable you to quickly locate specific pictures contained in the Picture Album by simply typing in keywords that describe the pictures you wish to find.

After type in the keywords, click the **Find Now** button to start the search.

## Opening pictures from another location

Besides providing a large collection of pictures from which to choose from PrintMaster Gold allows you to select pictures from another drive or directory.

1. To open a picture from another location pull down the **File** menu and select the **Open From Disk...** item.

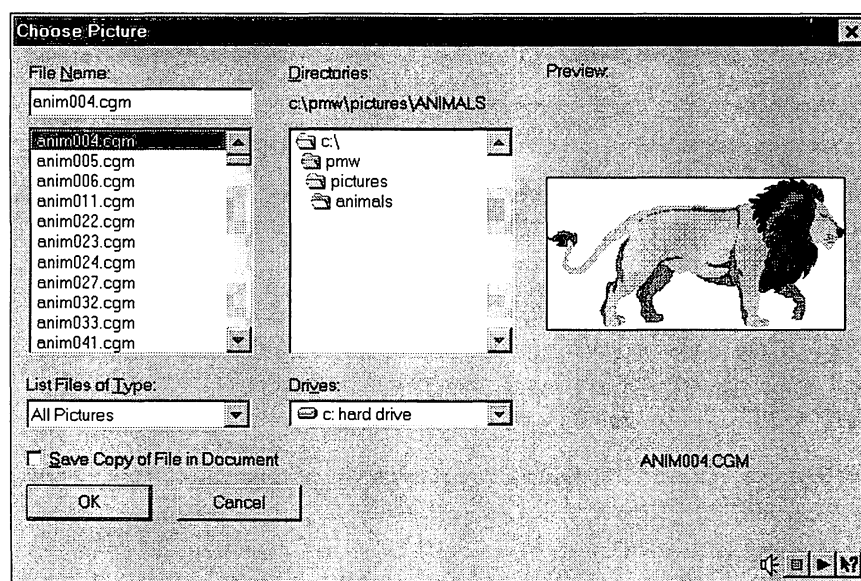

---

*If you wish to add photographs from a Kodak Photo CD, click the **Photo CD...** menu item.*

---

2. Choose the picture location by selecting the drive and directory. Select a picture by clicking on its name in the File Name list—a preview of the highlighted picture will appear to the right.

3. Click the **OK** button or press **ENTER** to open the selected picture.

## Save Copy of File in Document

This function embeds a copy of the picture files used in your project within the document itself so that the original picture file is not required the next time you open your project.

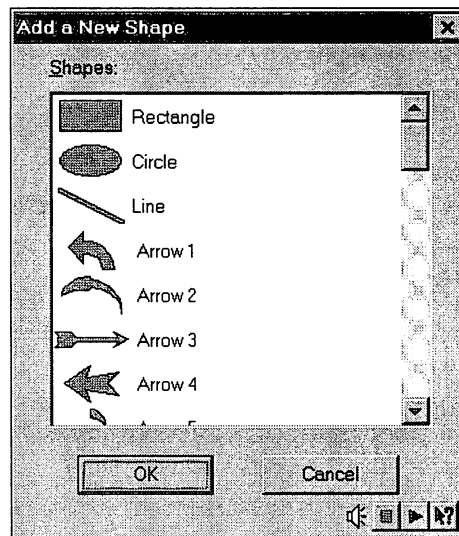

This feature is particularly useful when using pictures that are selected from a floppy disk or CD. When selected PrintMaster Gold will not require you to insert the floppy disk or CD containing the picture(s) used each time you open your project.

## Adding a New Shape

1. To begin working with Shapes, click the **Add Shape** button located on the *Sidebar*.

2. Use your mouse to highlight a desired shape on the provided list. Click **OK** to begin editing your shape.

You can also add a new Shape to your project by pulling down the **Add** menu with your mouse and clicking **Shape...**, or by pressing **[ALT]+[A], [S]** on your keyboard.

**Selection Tip:** If the item you want to select is covered by other pictures, shapes, or text boxes, hold down the **[SHIFT]** key as you click with the left mouse button and PrintMaster will select successively “deeper” items until you reach the one you want.

3. Clicking **Remove Shape** in the Edit Shape sidebar will remove the currently highlighted pictures or from your project.

---

*You can also remove a shape from your project by selecting it in the project layout with your left mouse button, pressing **[DELETE]**, and then clicking **Yes**.*

---

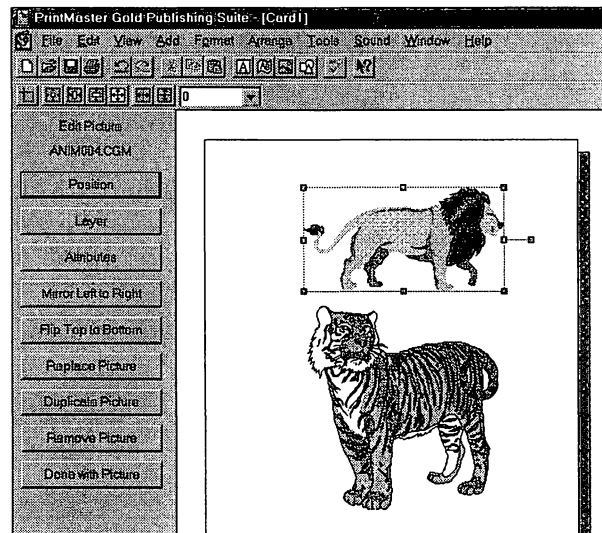

## Editing Pictures & Shapes

---

PrintMaster makes it easy to reposition a picture or shape, change its size or edit its appearance. Simply select the picture or shape you want to edit (usually by clicking on it) and then choose the appropriate edit command or option. For your convenience, picture and shape edit commands are available in two places: the Edit sidebar and in a pop-up menu.

### Edit Picture and Edit Shape sidebars

One of the easiest ways to edit a selected picture or shape is to use the options located in the Edit Picture or Edit Shape sidebar as shown below. Simply choose an option by clicking on the appropriate button.

### Pop-up menu

The quickest way to edit a picture or shape is to click on it using the *right* mouse button. The picture will be selected and a small menu will pop up containing the available editing commands. Select the command you want by clicking on the appropriate line in the pop-up menu.

## Editing Picture and Shape Commands

---

PrintMaster makes it easy to reposition a picture, change its size, or edit its appearance. Simply select the picture you want to edit (usually by clicking on it) and then choose the appropriate edit command or option. The following sections provide easy step-by-step instructions for using each of the picture editing commands.

### Positioning & Sizing a Picture or Shape

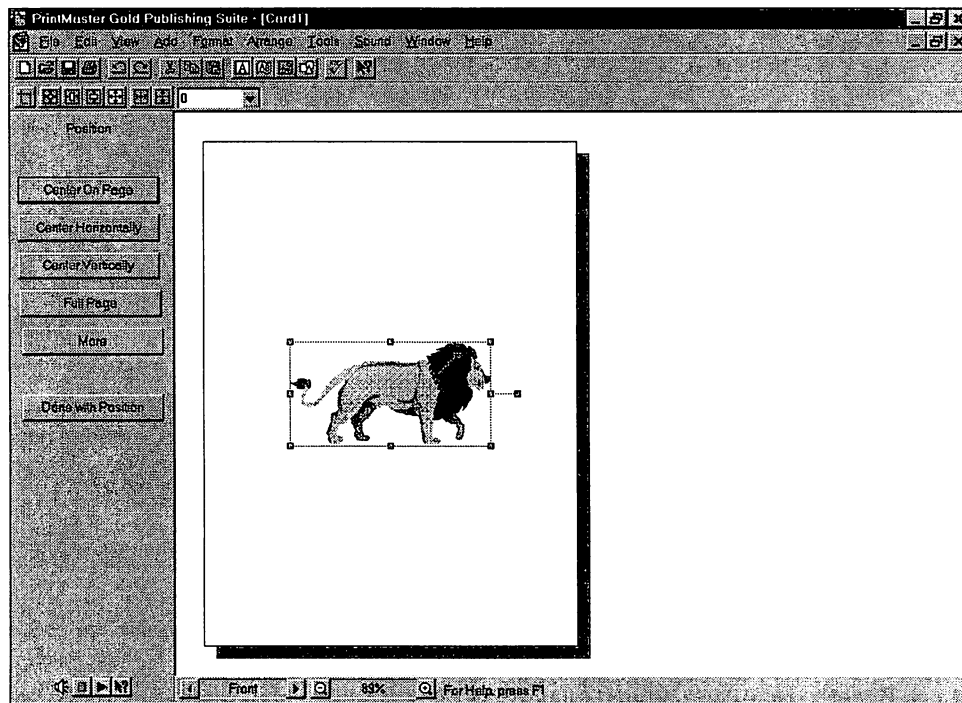

The most natural way to position (and size) a picture is to click on the picture with the left mouse button and, while holding the button down, drag the picture to the desired location. Release the mouse button when the picture has been properly positioned.

You can also move and size a picture to a standard position by clicking the **Position** button on the sidebar.

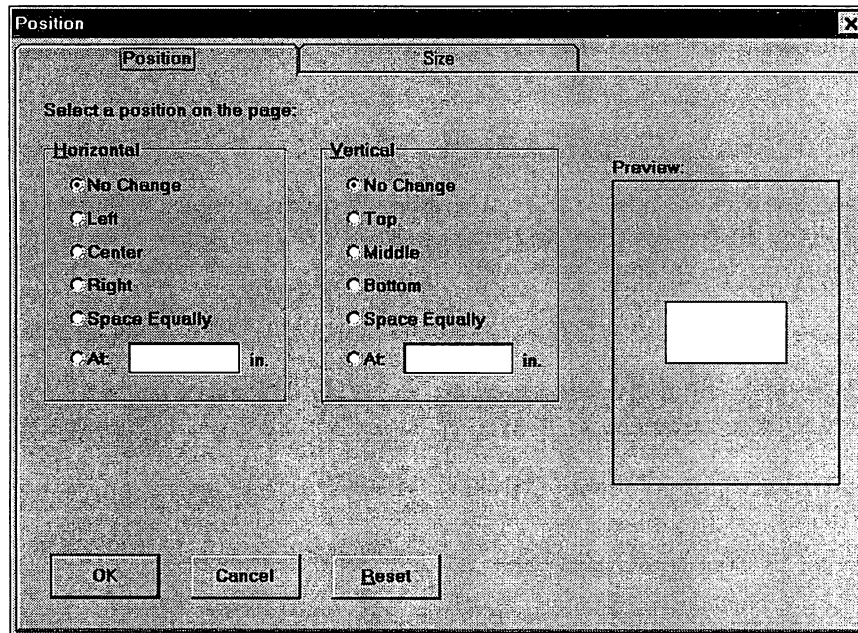

This command will bring up the Position menu containing options for placing the currently selected picture in predefined locations.

The following positioning (and sizing) options are available:

- **Center on Page** allows you to center the selected picture both horizontally and vertically on your project page.
- **Center Horizontally** allows you to center the selected picture width (left to right) of the project page.
- **Center Vertically** allows you to center the selected picture to height (top to bottom) of the project page.
- **Full Page** allows you to resize the selected picture to the full height and width of the project page.

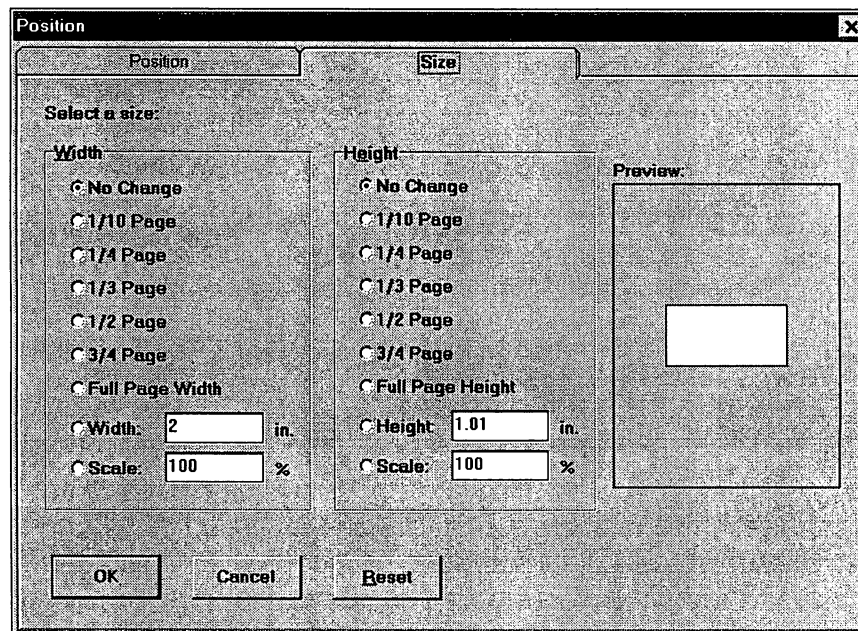

- **Position** lets you set the horizontal and vertical positioning independent of each other. Choose a standard horizontal or vertical position, or type in a specific position. Click **OK** to confirm.

Click **Reset** to return a modified picture to its last position and size on your project page.

- **Size** lets you set the horizontal and vertical size independent of each other. Choose a standard horizontal or vertical size, or type in a specific size. Click **OK** to confirm.

Click **Reset** to return a modified picture to its last position and size on your project page.

You can quickly size a picture by clicking on one of its frame handles with the left mouse and, while holding the button down, drag the handle to the desired location. The mouse arrow pointer will change to a double arrow when you are resizing a picture. Release the mouse button when the picture has the proper size and shape. The picture will expand or shrink to fit the new frame size.

**Sizing Tip #1:** Hold down the **[SHIFT]** key while dragging to make the new size proportional to the original picture size. Hold down the **[CTRL]** key while resizing in order to keep the new size proportional to the current picture size.

**Sizing Tip #2:** To cut off part of a picture (this is called *cropping*), use another picture (e.g., a white square) to cover the portion of the picture you want to eliminate. See the next section entitled *Picture Layer* for instructions on placing one picture behind another.

## Rotating a Picture or Shape

You can quickly rotate a picture by clicking on its rotation handle with the left mouse and, while holding the button down, drag the handle to the desired location. Release the mouse button when the picture is in the proper orientation. The mouse arrow pointer will change to a curved arrow when you are rotating a picture. *Note that this feature is only available to certain image types.*

**Rotation Tip #1:** Hold down the **[SHIFT]** key while dragging to limit rotation to increments of 45°.

## Picture / Shape Layer

Text and picture elements in a PrintMaster project are like a deck of playing cards, each element has its own position or *layer* in the deck and each element can hide the elements under it, or be hidden by the elements above.

PrintMaster allows you to “shuffle” the layering order of your text boxes and pictures to move selected elements in front of or behind others. Individual text boxes can be placed in front, back, or anywhere in between.

Use layering to add a 3D feel to your projects and create interesting effects where one picture can “peek through” another.

**Balloons in Front**

**Balloons in Back**

---

*A background, if any, is always in the backmost layer. Text boxes and pictures cannot be moved behind a background.*

---

To change the layer of the selected picture, click **Layer** in the Edit Picture / Shape sidebar.

- **Bring to Front** moves the selected picture or shape to the first layer, in front of all other text boxes and pictures.
- **Forward One Layer** moves the selected picture or shape forward a layer.
- **Back One Layer** moves the selected picture or shape back a layer.
- **Send to Back** moves the selected picture or shape to the last layer, in back of all other text boxes and pictures (except a background).
- **Done with Layer** returns to the Edit Picture / Shape menu.

---

*Any Layer options that do not apply to the selected picture will be disabled. For example, if the selected picture is already at the front, then **Bring to Front** will be “grayed out”.*

---

## Flipping Pictures / Shapes

Select the **Mirror Left to Right** command to flip the selected picture horizontally as shown below.

**Normal**

**Mirror Left to Right**

Select the **Flip Top to Bottom** command to flip the selected picture vertically as shown below.

**Normal**

**Flip Top to Bottom**

## Replace Picture

Click the **Replace Picture** button to change the image of the selected picture. Other properties of the selected picture such as the color, center position, and flipping are not changed.

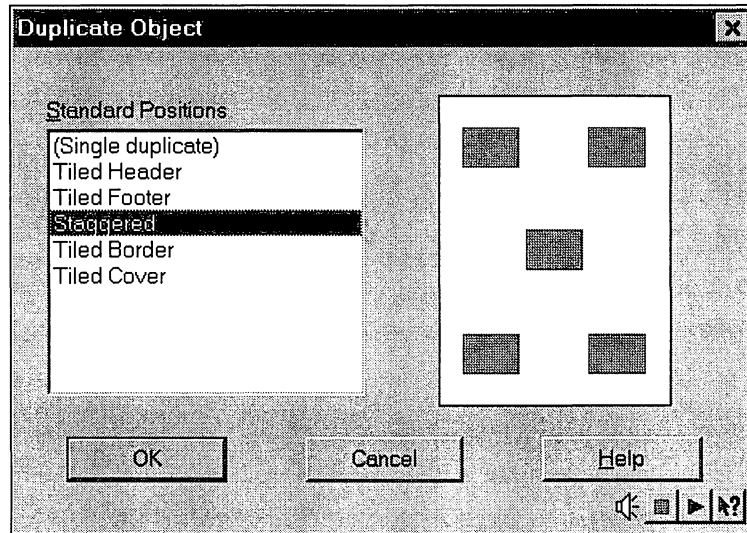

1. Select the picture you want to replace (the baseball player). Click the **Replace Picture** button and the Picture Album will appear.
2. Choose the new picture from the Picture Album and click **Close** or press **[ENTER]**.

PrintMaster will return to the Edit Picture sidebar menu with the new picture on your page.

## Duplicate Picture / Shape

The **Duplicate Picture / Shape** option is a quick and easy way to make a copy of an existing picture or shape. To make a duplicate of an existing picture, proceed as follows:

1. Select the picture or shape you want to duplicate. When the picture is properly selected, the Edit Picture / Shape sidebar menu will be displayed.
2. Click the **Duplicate Picture / Shape** button in the Edit Picture / Shape sidebar. The Duplicate Object dialog will appear listing the standard duplication positions.

3. Select the duplication position you want to use by clicking on its name. A preview of the duplication pattern will appear to the right.

The initial selection, **(Single duplicate)**, will create a single duplicate of the selected picture or shape. Other duplication positions create multiple copies of the selected picture or shape which are collected into a group.

4. Click **OK** or press **[ENTER]** to confirm your selection. PrintMaster returns to the Edit Picture menu with the duplicate picture selected.

## Remove Picture / Shape

Click on the **Remove Picture / Shape** button to remove the currently selected picture.

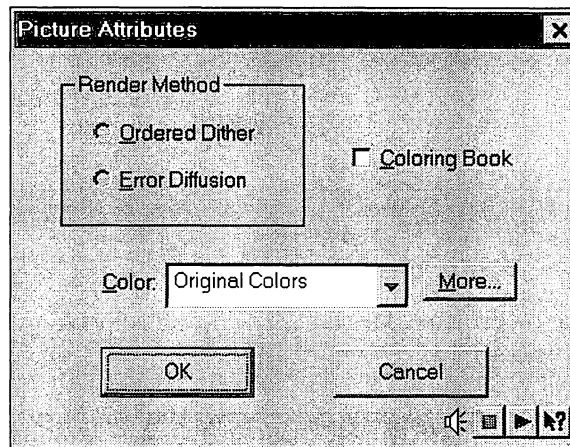

## Done with Picture / Shape

Click on the **Done with Picture / Shape** button to exit the Edit Picture / Shape sidebar and return to the Design Choices sidebar.

## Picture Attributes

The **Attributes** editing command is used to change the printing attributes of the currently selected picture. This option is available on the Edit Picture sidebar, or on the pop up menu which is activated with the right mouse button.

Selecting **Attributes** brings up the Picture Attributes dialog shown below.

The *Render Method* and *Coloring Book* options can be selected in this dialog. Some options may not be available for certain types of pictures in which case they will be “grayed out”. In general, the Render Method option applies to pictures in a bitmapped format such as TIF or PCX. The coloring book option is available for CGM pictures.

Use **Render Method** to adjust the way PrintMaster combines colored dots to simulate color shading and gray tones in bitmapped graphics. Most bitmapped graphics have more colors or grays than the output device (screen or printer) is capable of showing. PrintMaster Gold uses two methods to approximate those colors as well as possible on an output device. For example, consider an image with 256 colors on a printer that supports only 16 colors. PrintMaster makes the 256 colors appear by mixing the 16 colors available.

The general name for processing an image for the screen or printer is “rendering”. The specific rendering methods available in PrintMaster Gold are **Ordered Dither** and **Error Diffusion**.

An **Ordered Dither** uses a fixed set of patterns to blend colors. Each color or gray in the image changes to a pattern of colors on the output device. The appearance of the resulting image is very regular.

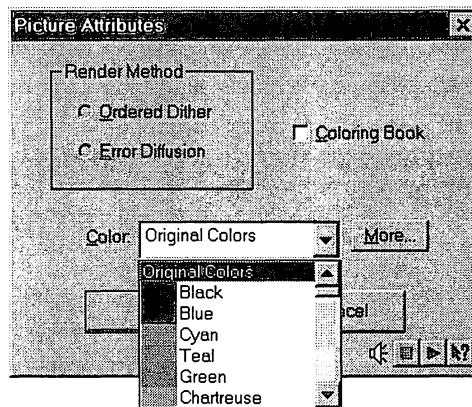

**Error Diffusion** on the other hand, is a dynamic process. It creates patterns “on-the-fly”, and the resulting patterns tend to be more dense and unique. Images often look better with Error Diffusion, though the patterns look very unusual when viewed up close. Also, because Error Diffusion patterns are more dense, the image tends to darken due to bleeding of ink or toner when the image is printed. This means that if you use Error Diffusion, you will probably also need to adjust your printer contrast to lighten the image.

Select **Coloring Book** to print only the outline of the selected picture, with the color fills printed as white. The final printout can be colored using crayons or pens.

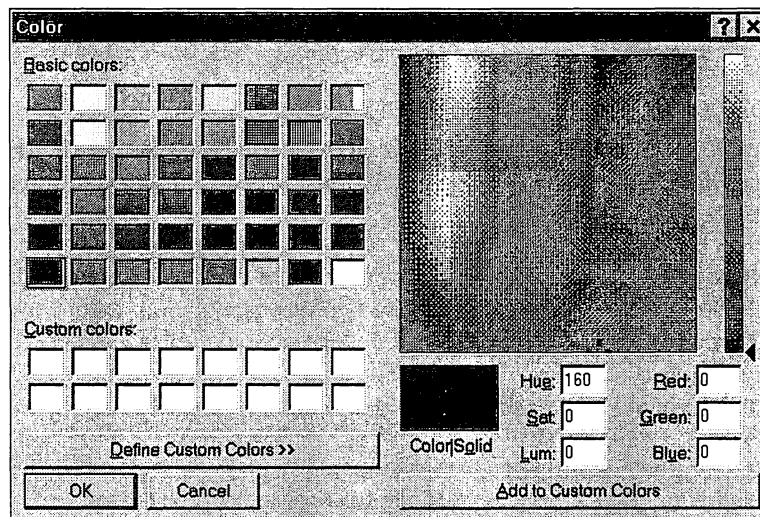

## Picture Color

The color of a selected picture can be changed by clicking **Attributes** in the Edit Picture sidebar.

Select a color by clicking on its name. **More...** lets you pick colors from the Windows Color dialog or define your own custom colors.

Most of the pictures included with PrintMaster Gold contain many different colors. What happens when you change the “color” of these pictures? The answer is that PrintMaster will change all the black parts of the picture to the selected color. The other colors in the picture may get lighter, darker, or change hue depending on the original picture color and the color to which the picture is changing. Only pictures which are all black will completely change to the selected color.

**Color Tip #1:** Selecting the color *black* restores a picture to its original color.

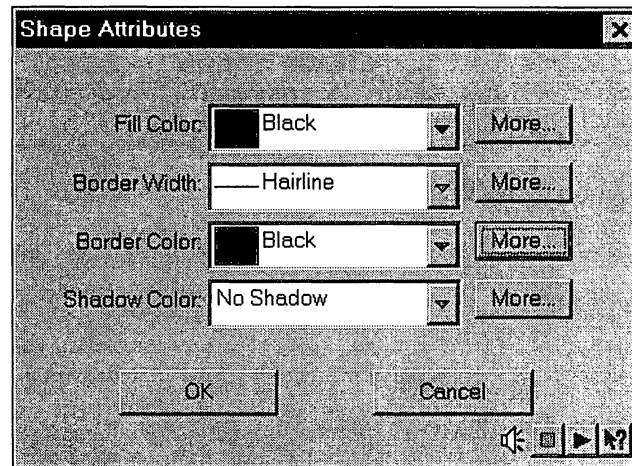

**Color Tip #2:** To “lighten” a picture without changing its original color, select one of the gray scale percentages (colors 65 to 84). This is a good way to reduce the print density when you use a dot matrix printer. It also allows you to lighten any picture for use as a softer background. A picture with fine lines or details may appear less sharp whenever you change its color or lighten it with a gray shade.

**Color Tip #3:** Colors may look different on the screen than they do when printed. Make a Poster project using the colors you’re interested in, then print it out and keep it as a reference chart.

## Shape Attributes

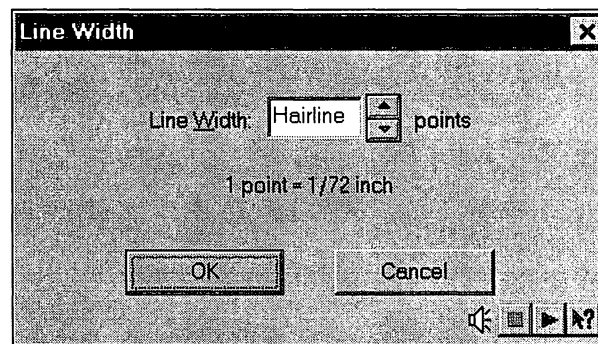

The **Attributes** editing command is used to change the printing attributes of the currently selected picture. This option is available on the Edit Shape sidebar, or on the pop up menu which is activated with the right mouse button.

Selecting **Attributes** brings up the Shape Attributes dialog shown below.

- Click the down arrow button on **Fill Color** to choose a color to apply to the selected shape from a predefined palette. Click **More...** to pick a color from the Windows Color dialog or define your own custom colors.
- Click the down arrow button on **Border Width** to modify the outline thickness of the selected shape. Click **More...** to create your own custom line width.

The up and down arrows on the **Line Width** dialog will allow you to adjust the custom border width.

- The **Border Color** option enables you to change the outline color of the current shape. Click **More...** to pick a color from the Windows Color dialog or define your own custom colors.
- The **Shadow Color** feature lets you apply a colored shadow to your selected shape. Click **More...** to pick a color from the Windows Color dialog or define your own custom colors.

## Grouping Text Boxes and Pictures

---

Sometimes you'll have a combination of pictures and/or text boxes that need to remain positioned relative to each other. The Grouping option makes it easy for you to manage multiple text boxes and pictures that are related by combining them in a single group. In this way, you can flip, duplicate, and move all of them at the *same* time. To make a group containing pictures and/or text boxes, proceed as follows:

1. Use your mouse to select the pictures and text boxes you want to group together while holding down the **[SHIFT]** key. Clicking with the **[SHIFT]** key down allows you to select multiple objects at the same time.

---

*You can also select multiple objects using the Select Pictures and Select Text dialogs by highlighting multiple entries in the list box. Hold down the **[CTRL]** key while clicking in the list box to select or deselect an entry.*

---

2. Click the **Group** button in the Multiple sidebar.
3. To ungroup them, simply select any member of the group and click the **Ungroup** button in the Multiple sidebar.

Use PrintMaster Gold's new Address Book to print personalized holiday cards for all your relatives, invitations for your friends, labels for your customers, or certificates for your students.

The Address Book is an easy and powerful way to merge your choice of friends, family, or other acquaintances into any PrintMaster Gold printing project!

## Creating a New Address Book

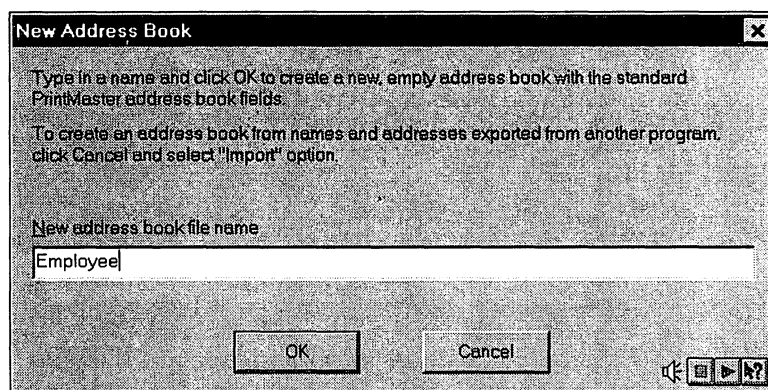

---

The following instructions describe how to create a new Address Book. Proceed as follows:

1. Pull down the **Tools** menu with your mouse and click on **Address Book**, or press **[ALT]+[T]**, **[A]** on your keyboard.

If you have not already created an Address Book, PrintMaster Gold will start you off with a blank address book called: **ADDRESS**. You can edit this starting address book or create your own using a different name.

2. To create a new Address Book using a name you provide, pull down the **File** menu and select **New**, or press **[ALT]+[F]**, **[N]** on your keyboard.
3. Type in a unique name for your Address Book and click **OK** or press **[ENTER]**.

### Name, Address, etc.

Use the displayed fields to begin entering the basic information for each person you're adding to your Address Book. The available fields are:

#### First Name, Last Name

**Relationship** — Use the pull down menu to select one of the predefined values for this field or type in your own. New values typed in will be added to this menu so that you may select them again for use with other Address Book entries.

The Relationship field can also be used to sort records in your Address Book. (*See the section entitled: **Sorting Records** later on in this chapter.*)

**Title, Company, Address1, Address2, City, State, Zip**

**Country** — Use the pull down menu to select one of the predefined values for this field or type in your own. New values typed in will be added to this menu so that you may select them again for use with other Address Book entries.

**Phone, Fax**

**Email** — Use this field to type in an Internet email address.

**Birthday, Anniversary**

**Comments** — Use this field to type in generic data or personal comments.

**Picture** — Use this field to add pictures of friends, family members, or employees to your Address Book.

- Click the **New** button to add a picture to your Address Book.
- Click **Clear** to remove a chosen picture.
- Click **Copy** to place a copy of the current picture on the Clipboard.

**User Defined Info** — Use this field to enter important data not covered by the standard fields listed above.

**User Defined Date** — Use this field to enter dates not covered by the standard fields listed above.

3. Click the **New** button to begin working on a new record for your Address Book.
  - Use **[TAB]** and **[SHIFT] + [TAB]** to navigate to the next field or backup to a prior field.
4. Click the **Save** button to add a completed record or save changes to an existing.
  - To remove an entry click **Delete** button.
  - To reverse changes made to a record click the **Undo** button.

## Viewing Records

Use the **View** menu item, located both at the top and bottom of the Address Book dialog, to change the manner in which records are displayed.

**One at a Time** — Select this option to display one record at a time.

- Use **TAB** and **SHIFT** + **TAB** to navigate to the next field or backup to a prior field.
- Use the vertical scroll bar to view other fields in the current record.

**Receiver** — Use this option to select the address book entries to be printed in your PrintMaster Gold projects.

---

*Note: The Receiver option is only available when editing a project (Poster, Card, Label, etc.) and cannot be accessed from the Project Album screen.*

---

- Select a record by clicking on it with your mouse. To select all records, click the **All** button. To deselect all records, click the **None** button.
- Use the vertical scroll bar to view other records in the list.

## Sorting Records

Use the **Sort** menu located at the top of the Address Book dialog or the **Sort by** menu located at the bottom, to choose the manner in which records are organized.

**First Name, Last Name, etc.** — Select these option to organize your records in a strictly alphabetical format based on the field type chosen (i.e., Last Name, First Name, etc.).

- The tabs displayed at the top of the listing enable you to quickly navigate to specific records.  
For example: Selecting the tab labelled “**T**” will display the first record whose Last Name field begins with “T”.

The screenshot shows the 'Address Book - [ADDRESS]' dialog. At the top, there are tabs labeled 'A', 'B', 'C', 'D', 'E', 'F', 'G', 'H', 'I', 'J', 'K', 'L', 'M', 'N', 'O', 'P', 'Q', 'R', 'S', 'T', 'W'. The 'T' tab is selected. Below the tabs is a form with the following fields: First Name (David), Last Name (Thomas), Relationship (Client), Title (Director of Marketing), Company (RCT Steel and Lumber), Address1 (1501 Alpine Road), Address2 (Suite 10C), City (Berkely), State (CA), Zip (94279), and Country (United States of America). To the right of the form are buttons for 'New', 'Delete', 'Save', and 'Undo'. At the bottom, there are buttons for 'First', 'Back', 'Next', and 'Last', along with a 'View: One at a Time' dropdown and a 'Sort by: Last Name' dropdown. A 'Close' button is also present.

**Relationship** — Select these option to organize your records in an categorical format based on the type of Relationships chosen (i.e., Friends, Family, Client, etc.).

- The tabs displayed at the top of the listing enable you to quickly navigate to specific records.  
For example: Selecting the tab labelled “**Client**” will display records whose Relationship is defined as “Client”.

The screenshot shows the 'Address Book - [ADDRESS]' dialog. At the top, there are tabs labeled 'Client', 'Family', 'Friend', and 'Vendor'. The 'Client' tab is selected. Below the tabs is a form with the following fields: First Name (David), Last Name (Thomas), Relationship (Client), Title (Director of Marketing), Company (RCT Steel and Lumber), Address1 (1501 Alpine Road), Address2 (Suite 10C), City (Berkely), State (CA), Zip (94279), and Country (United States of America). To the right of the form are buttons for 'New', 'Delete', 'Save', and 'Undo'. At the bottom, there are buttons for 'First', 'Back', 'Next', and 'Last', along with a 'View: One at a Time' dropdown and a 'Sort by: Relationship' dropdown. A 'Close' button is also present.

## Importing Addresses

PrintMaster Gold makes it easy to not only create new Address Books, but it also provides you with the ability to import addresses exported as text from other programs.

---

*Text imported into PrintMaster Gold cannot be added to an existing Address Book, but instead will be used to generate a new Address Book.*

---

PrintMaster Gold will only import text in a "Comma" or "Tab" delimited format. These are common formats supported by most applications that are able to export tables as text.

**Comma format:** "John","Smith","145 Main St.,""Treeville","CA.,""98112"

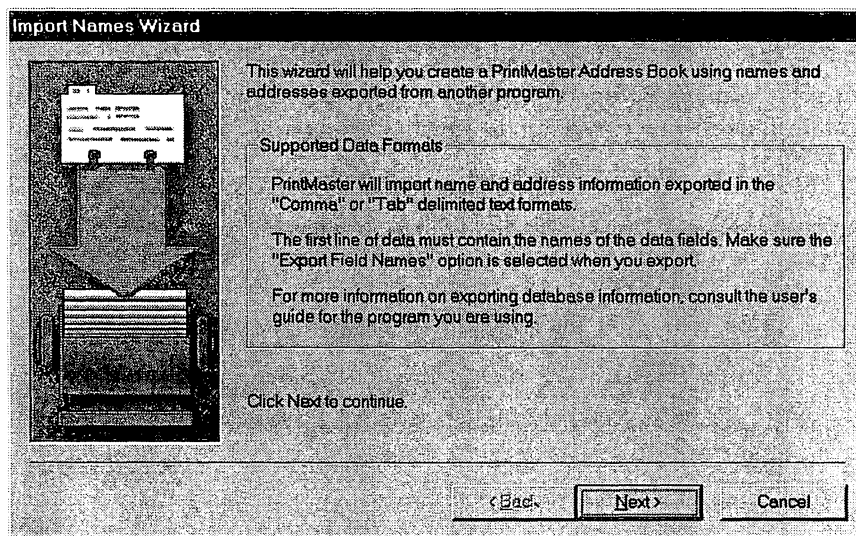

**Tab format:** John      Smith      145 Main St.      Treeville      CA.      98112

The first line of data in your text file must contain that names or titles of each field, since this information will be used later to generate the field headers in your Address Book.

**Comma format:** "First Name","Last Name","Address","City","State","Zip"

**Tab format:** First Name      Last Name      Address      City      State      Zip

1. To import address text, pull down the **File** menu and select **Import**, or press **[ALT]+[F]**, **[I]** on your keyboard. This will bring up the Import Names Wizard.

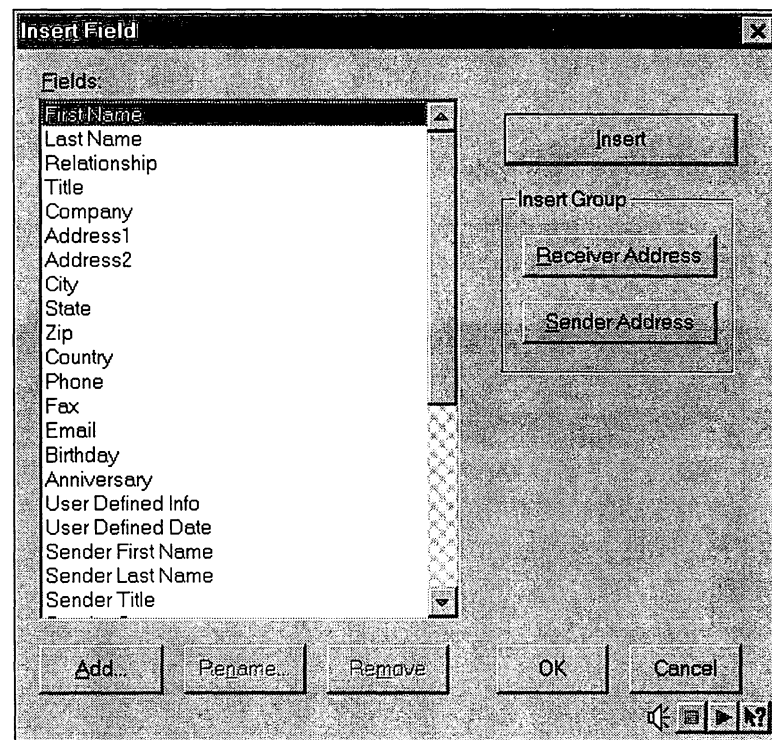

2. Click **Next** to proceed.
3. Type in the path and file name of the text file to be added (ex. **C:\ADDRESS.TXT**) or click **Browse**.
4. Click **Next** to continue.
5. After selecting the appropriate text file, the Import Wizard will automatically generate a new Address Book containing the imported data.

## Adding Fill-in Fields to a Project

---

Fill-in fields are placeholders that can be “filled-in” with personal information from your Address Book or with any information you type-in. To add a fill-in field to your project, proceed as follows:

1. Begin by clicking the **Add Text Box** button located on the Design Choices sidebar to add a new text box to your project page. *Note that fill-in fields can also be added to your Title Text boxes.*
3. Click the **Type and Edit Text** button to begin editing your text.
4. Click the **Add Fill-in Field** button. A list of available fill-in fields will be displayed at this point. Use the scroll bar to the right to move up or down the list of fields.

5. Pick a fill-in field by clicking on its name.
6. Click the **Insert** button to add the selected field to your project page.
  - Click the **Receiver Address** button to automatically insert *Receiver First Name, Last Name, Title, Company, Address1, Address2, City, State, and Zip* fields.
  - Click the **Sender Address** button to automatically insert the *Sender First Name, Last Name, Title, Company, Address1, Address2, City, State, and Zip* fields.
7. To insert additional fields, repeat steps 5 and 6.

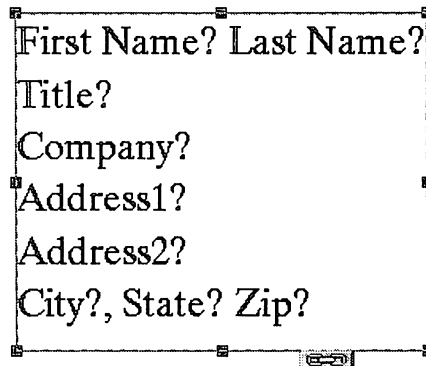

---

*Fill-in fields do not have to be inserted into an empty text box. They can also be added to text boxes that already contain existing text. Fill-in fields are inserted at the text cursor position.*

---

## Applying Values to Fill-in Fields

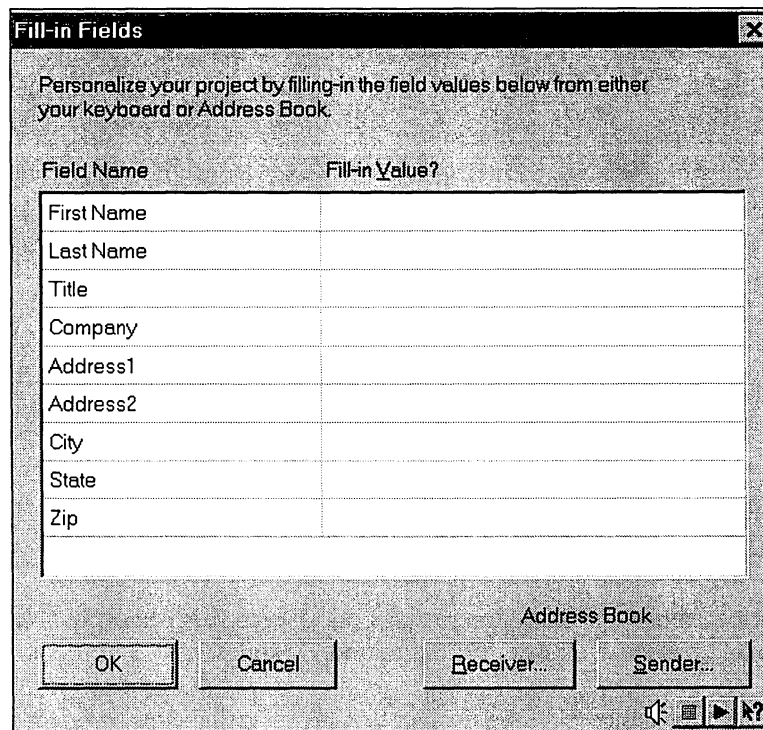

Once you have placed fill-in fields onto your project page you will next need assign values to each of the inserted fields.

First Name? Last Name?  
Title?  
Company?  
Address1?  
Address2?  
City?, State? Zip?

1. To begin, click the **Fill-in Fields** button located on the Edit Text sidebar.

A list of the field names used in your project will appear on the left side of the dialog box. To the right a space will be provided for typing in values for each of the fill-in fields.

Fill-in Fields

Personalize your project by filling-in the field values below from either your keyboard or Address Book.

Field Name	Fill-in Value?
First Name	
Last Name	
Title	
Company	
Address1	
Address2	
City	
State	
Zip	

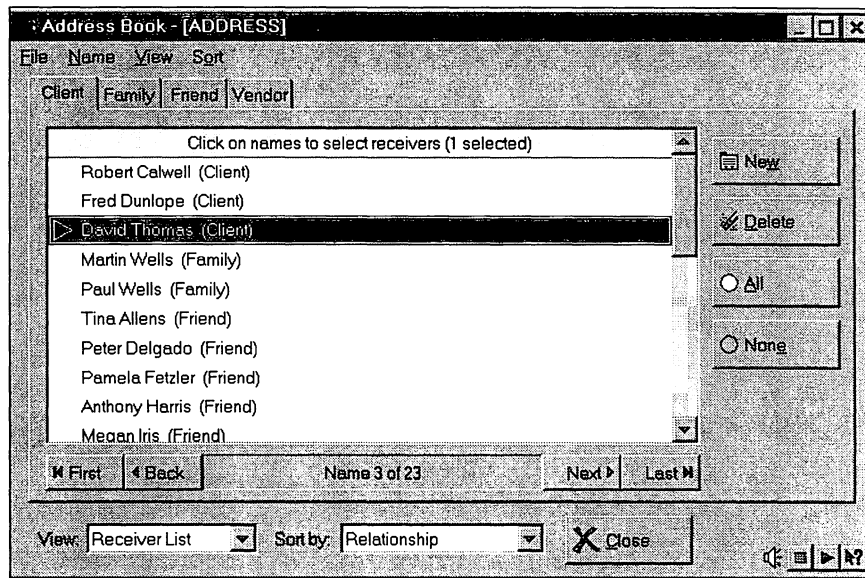

Address Book

OK Cancel Receiver... Sender...

You may enter your own values for each field, or you can select values from the Address Book.

2. To edit a field, simply click on the field with your mouse and then begin typing in the desired data.
  - Use **TAB** and **SHIFT + TAB** to move to the next field or to backup to a prior field.

3. Click the **Receivers...** button to choose values from the Receivers List of your Address Book.

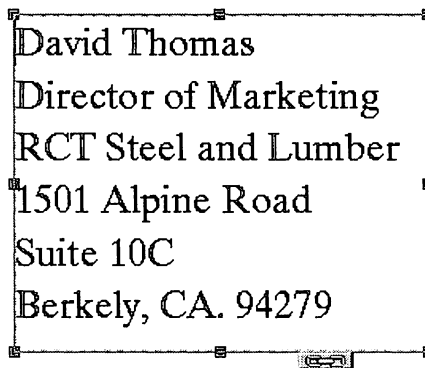

4. Pick the receiver name(s) you wish to use by clicking on them with your mouse. Once you have chosen the desired name(s) click **Close**.

---

*When selecting multiple receiver names note that only one of the chosen names will be displayed on the project page (generally the first one selected). However, upon printing your project each printed page will contain a different receiver name.*

---

5. Click **OK** to return to your project page.

Note that the fill-in fields seen earlier have been replaced by the receiver data you selected. At this point you can now begin editing your text by changing items like font, color, size etc. (See the section entitled, *Working with Text* contained in this user's guide for more detailed information on editing text.)

This page intentionally left blank.

## Printing a Project

---

No matter how good your project looks on the screen, the final printout on paper is what really counts. PrintMaster Gold pulls out all the stops to make sure your printed project will look its best.

Full 24-bit rendering that supports more than 16 million colors or shades of gray means your pictures will look spectacular. And since all text and pictures are fully scalable, you'll always get crisp razor-sharp output. Plus, PrintMaster Gold lets you print your project at any size—from a miniature greeting card to a gigantic garage door poster.

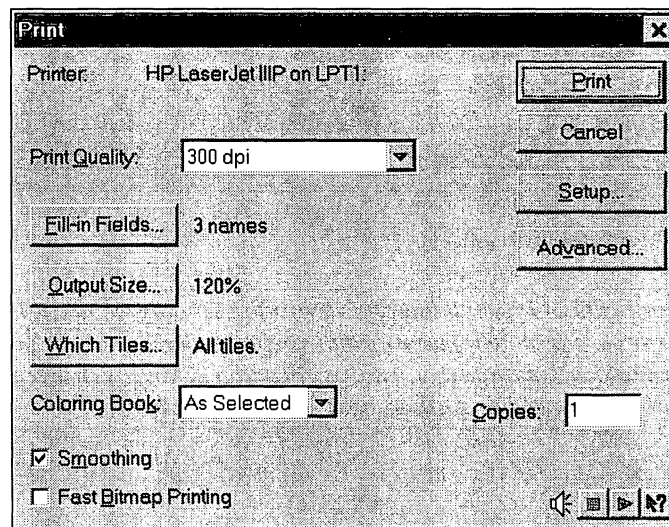

This section provides step-by-step instructions for printing your project and optimizing your printing setup.

### Print Project

---

To print your project, proceed as follows:

1. Click the **Print “project”** (e.g., Print Poster, Print Card, etc.) button on the Design Choices sidebar. The Print dialog will appear as shown below.

2. Confirm that the current settings are correct. For more information, see the next section entitled *Print Settings*.
3. Click **Print** to start the printing process.

## Print Settings

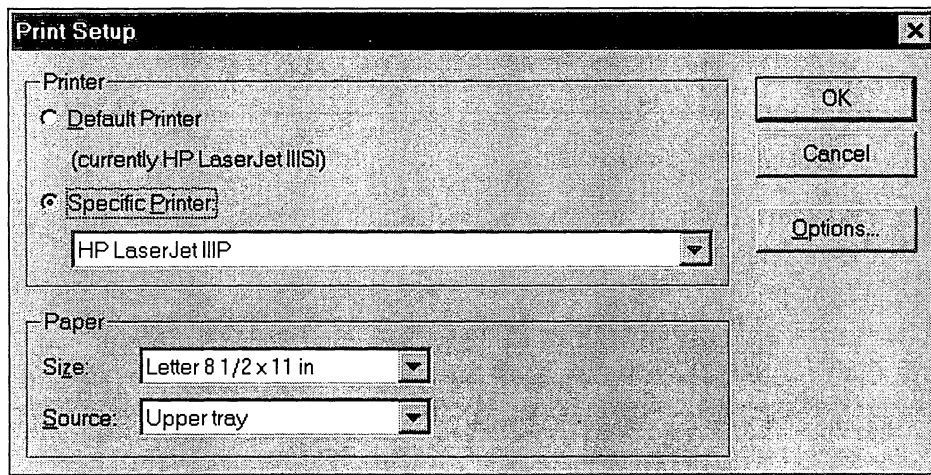

---

The Print dialog allows you to easily choose and configure your Windows printer, select the output size and print options for your project, and set number of copies to print. This section provides detailed instructions for each of the Print dialog options.

### Printer

The name and port of the selected Windows printer is displayed next to this item. To change printer, proceed as follows:

1. Click the **Setup** button in the Print Dialog. The standard Windows Print Setup dialog is displayed.

2. Select the desired printer and options.

---

*PrintMaster performs full 24-bit rendering of pictures before sending the data to the printer. If the selected Windows printer driver has its own options for dithering or rendering pictures, pick the option which best describes simple monochrome data (e.g. Line Art). In addition, any intensity controls supported by the driver will probably have no effect on the output from PrintMaster Gold.*

---

### Print Quality

Most printers support a number of different print quality choices. Click on the Print Quality list box to make your selection. Generally, a low resolution or low quality setting will result in faster printing times—useful for printing a quick rough draft or a very large project that will be viewed from a distance. A high resolution or high quality setting will give you the best output, but will probably take longer to print—use high quality for your final printout.

### Copies

Use this item to select the number of copies you want to print. Simply enter the desired number into the box next to the word **Copies**. The number of copies is reset to 1 after each printout.

Check the **Collate Copies** item in order to print one complete group of your project before printing the next copy.

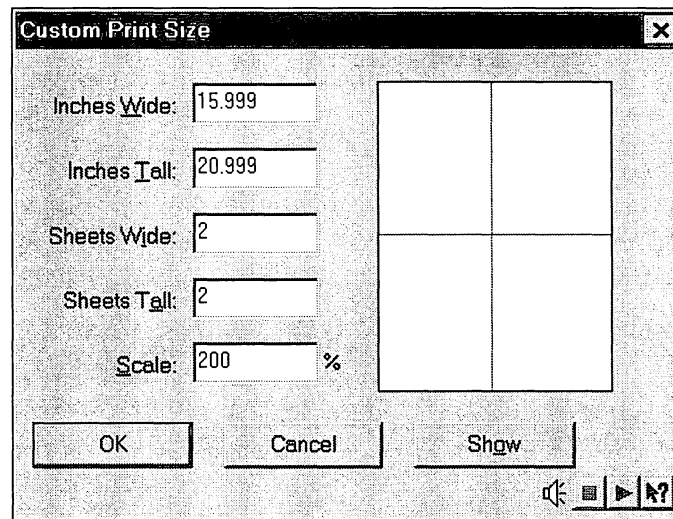

## Fill-in Fields...

Use this option to merge fields from your Address Book onto your printed projects. This time saving features enables you to print out envelopes, labels, invitations or other projects with the names and addresses of family, friends, or business associates. (See the chapter entitled: *Address Book*.)

## Output Size...

PrintMaster Gold lets you take any project and print it at any size, from as small as a postage stamp to as large as a garage door.

1. Click the **Output Size** button. The Custom Print Size dialog will appear as shown.

2. Enter the desired output size into the dialog fields. A project whose output size is larger than a single sheet of paper will be printed on multiple sheets—each sheet is called a *tile*. As you select the output size, click the **Show** button or press **ALT+O** to display a preview of the tile pattern making up the final printout. When your project has finished printing, assemble the tiles to create the final printout.

There are five items you can change in the Custom Print Size dialog. Note that all sizes must be proportional to the printer paper size. If you change the height, then the width is automatically adjusted and vice versa.

- **Inches Wide** specifies the output width in inches.
  - **Inches Tall** specifies the output height in inches.
  - **Sheets Wide** specifies the output width in multiple sheets of paper. (Most commonly used to print posters and banners).
  - **Sheets Tall** specifies the output height in multiple sheets of paper. (Most commonly used to print posters and banners).
3. Click **OK** to confirm your selections, *or* click **Cancel** to return to the Print dialog without changing the output size.

---

*The output size of each printed project is reset to 100% after each printout.*

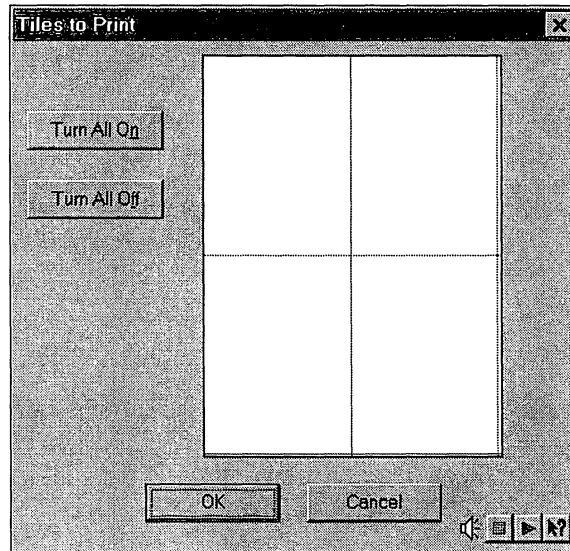

---

## Which Tiles...

For small printouts that fit onto a single tile (sheet of paper), the button is disabled. For large printouts that require multiple tiles, use this option to individually select the tiles to be printed.

1. Click the **Which Tiles...** button. The Tiles to Print dialog will appear as shown below.

2. Select the tiles you want to print from the preview windows. Click on a tile to select it, and click on a selected tile to deselect it.
  - Click **Turn All On** to select all tiles.
  - Click **Turn All Off** to deselect all tiles.
3. Click **OK** to confirm your selections, *or* click **Cancel** to return to the Print dialog without changing the tile selections.

---

*The selected tiles item in each printed project resets to "all tiles" after each printout.*

---

## Coloring Book

PrintMaster lets you print certain types of pictures as they would look in a coloring book: only the picture outline is printed and all color fills are printed as white. The coloring book option can be set on a *per picture* basis. Selecting the Coloring Book option in the Print Dialog overrides these individual settings as follows:

- **None** turns off all coloring book printing regardless of the individual picture settings.
- **As Selected** (the default) performs coloring book printing according to the individual picture settings.
- **All** turns on coloring book printing for all appropriate pictures.

---

*Only certain types of pictures can be printed with the coloring book feature. This includes all the pictures*

---

*provided by PrintMaster and the MicroLogic Clip Art Library, or any other picture in the CGM and WMF graphics formats. For other formats such as TIF or PCX, the coloring book option will have no effect.*

---

## Smoothing

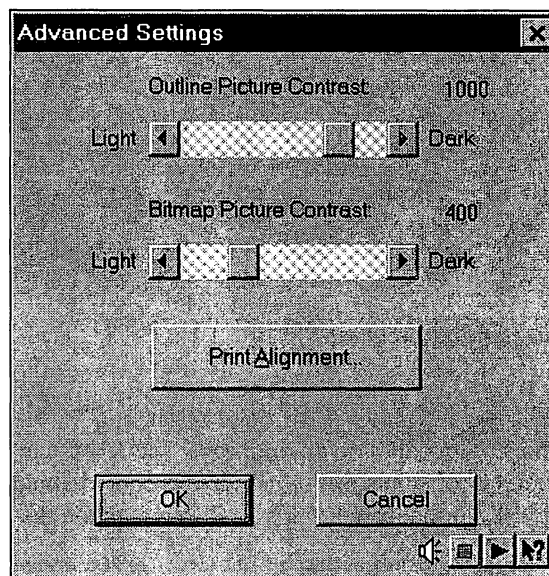

Use the smoothing option to soften the roughness of low resolution bitmapped graphics on your printouts. To turn smoothing on and off, simply click in the checkbox next to the word **Smoothing**.

*In general, only pictures in bitmapped graphics format such as TIF or PCX are effected by the smoothing option. Smoothing has no effect on the pictures provided by PrintMaster, or any other picture in the CGM graphics format.*

---

## Advanced...

Click the **Advanced...** button to display the Advanced Settings dialog.

Use the **Outline Picture Contrast** slider to adjust the lightness or darkness of printed outline pictures such as CGM and WMF graphics. Use the **Bitmap Picture Contrast** slider to adjust the lightness or darkness of printed bitmap pictures such as graphics in the TIF, PCX or BMP formats.

Picture Contrast does not effect text or other items such as Calendar lines. If pictures are printing too dark, adjust the slider to the left, towards the word **Light**. If pictures are printing too light, adjust the slider to the right, towards the word **Dark**. A setting of 1000 will cause PrintMaster to send pictures to the printer without any contrast adjustments.

*Dot matrix and HP DeskJet printers can sometimes print too dark or too light. Use the Picture Contrast controls to lighten or darken the printout.*

---

## Printing Labels

---

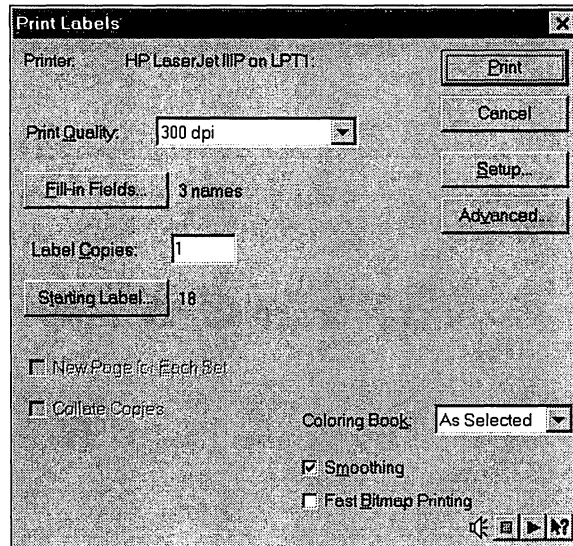

To print your Labels, proceed as follows:

1. Click the **Print Label** button on the Design Choices sidebar.

---

*These instructions may also be applied to the printing of Business Cards.*

---

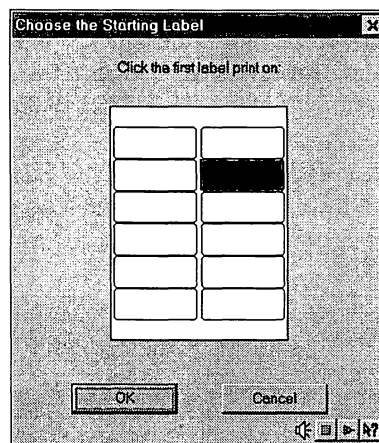

2. Click **Print** to start the printing process.

### Starting Label...

Use this item to specify the starting label on any printout. This feature is useful when printing to a page containing only a partial number of labels. On printouts consisting of multiple pages, this feature will only apply to the first page. Any additional pages will start printing on the first label.

1. Click **Starting Label...** button.

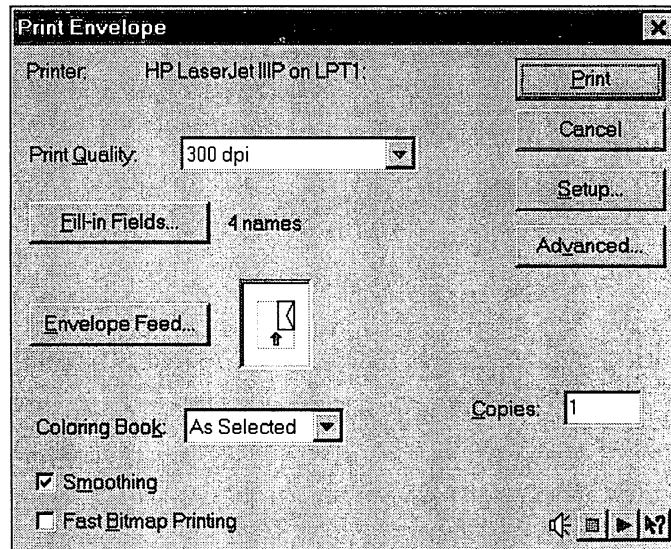

2. Choose the starting label and click **OK**.

## Printing Envelopes

---

To print your Envelope, proceed as follows:

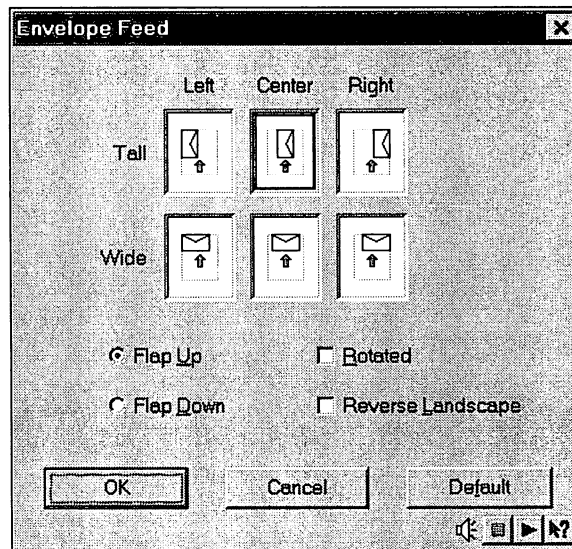

1. Click the **Print Envelope** button on the Design Choices sidebar.

2. Click **Print** to start the printing process.

### Envelope Feed...

Use this item to indicate the position of your envelope as it is inserted into the paper tray..

- **Tall/Wide** indicates which edge of the envelope is fed first into the printer.
- **Left/Center/Right** indicates the positioning of the envelope along the paper feed path.

- **Flap Up/Flap Down** indicates which way the envelope flap faces when it is fed into the printer.
- **Rotated** changes the orientation of the envelope feed by 180 degrees.
- **Reverse Landscape** switches the envelope orientation by rotating the envelope by 180 degrees and switching the envelope feed to the other side of the tray. *Use this option only if your printer seems to be printing opposite of were the envelope is actually being fed.*

# Using Symbol Fonts

Symbol fonts contain pictures and symbols that do not correspond to the normal characters shown on your keyboard. The MicroLogic Typeface Library contains two such fonts, Zbats-PS and Math-PS.

## Accessing Symbols

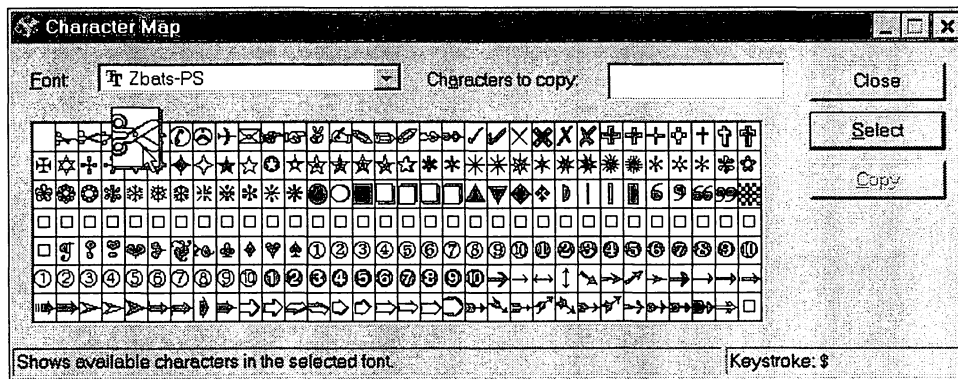

Accessing symbols in symbol fonts can be a problem—what key do you press to get the picture or symbol you want? Fortunately, Windows ships with a utility called **Character Map** which makes it easy to select symbols from symbol fonts. In addition, the following pages contain two tables, one for Zbats-PS and one for Math-PS, showing the keystrokes required to directly access any symbol in those two fonts.

## Using the Character Map Utility

To use the Character Map utility, proceed as follows.

1. Start your application and position the text cursor at the point where you want to insert the symbol.
2. Select the symbol font as the current font for your text.
3. Click the **Start** button of Windows 95 and select **Programs**. Windows 3.1x users should switch to **Program Manager**.
4. Select **Accessories** and click on the Character Map icon.
5. Press **[ALT]+[F]** or click on the **Font** menu to access the list of available fonts.
6. Highlight the name of the symbol font (e.g., Zbats-PS).

The Character Map utility will display a grid showing each of the font symbols:

7. Select the symbol you want to insert by double-clicking on its square. The symbol will be moved into the **Characters to Copy** area. Select additional characters by double-clicking on their squares.
8. Click **Copy** to copy the selected symbols to the Windows clipboard.
9. Return to your application and *paste* the symbols from the Windows clipboard into your

document.

You can leave the Character Map utility open in case you want to insert more symbols at a later time.

# *PrintMaster Graphics*

---

## About this catalog

---

The PrintMaster Graphics catalog contains over 5000 different pieces of clip art arranged in twenty-one different categories for easy selection. To find a piece of clip art, simply browse the appropriate category for the image you want.

### Graphics directories and file names

Each category contained on the PrintMaster Gold CD is located in a different subdirectory below the main **\PICTURES** directory (as shown here).

Category	Page	Directory

# ***Phil Frank Graphics***

---

## **About this catalog**

---

The Phil Frank Graphics catalog contains over 1200 different pieces of clip art created by nationally syndicated cartoonist ***Phil Frank*** arranged in nineteen different categories for easy selection. To find a piece of clip art, simply browse the appropriate category for the image you want.

## **Graphics directories and file names**

Each category contained on the PrintMaster Gold CD is located in the **\PHILFRNK** subdirectory just below the main **\PICTURES** directory (as shown here).

<b>Category</b>	<b>Page</b>	<b>Directory</b>

## The sounds don't play or are distorted

---

Then the problem may be related to your sound card setup (i.e., missing drivers, IRQ conflicts, etc.). You should try reinstalling the configuration software for your particular sound card or contact the manufacturer of the sound card for assistance.

You can also try disabling the sounds played in PrintMaster Gold by going to the File menu and choosing **Preferences**.

If your system is experiencing Sound related problems during installation (i.e., distorted sounds, system lockups, etc.) try running: **INSTALL /S-** or **/S8**.

The **/S8** option forces PrintMaster Gold to play only 8-bit sounds instead of the default 16-bit sounds. The **/S-** completely disables sounds.

## The program is running slow

---

*Windows 3.1x users:* To enhance the performance of Windows we highly recommend that you use a *permanent* swap file instead of a *temporary* one.

To change your current *swap file* settings, click the **386 Enhanced** icon located in Control Panel. Click the **Virtual Memory** button. The current Virtual Memory settings will now be displayed. To adjust the Virtual Memory settings, click on **Change**. Under *New Settings*, change the type to Permanent and click **OK**. It will be necessary for you to restart Windows at this point.

Performance of the PrintMaster Gold CD-ROM can be enhanced by increasing the *workspace* size. (See the section entitled: *Workspace for more information on this feature*).

*Windows 95 users:* To enhance performance, try shutting down other open applications. Performance of the PrintMaster Gold CD-ROM can be enhanced by increasing the *workspace* size. (See the section entitled: *Workspace for more information on this feature*).

## Printing seems to take a long time

---

If you are not using a laserjet printer (i.e., dot matrix, inkjet, DeskJet, etc.) you can greatly decrease printing time by turning "off" the Windows *Print Manager*.

*Windows 3.1x users:* To turn off Print Manager, double-click the **Printers** icon in Control Panel. On the bottom left of the Printers dialog box will be the item "Use Print Manager". Click on the check box to the left of that item and click **OK**.

*Windows 95 users:* Click the Start button and select Settings. Click on the Printers icon. In the displayed dialog box, use your mouse to right-click on your particular printer name. From the displayed menu select Properties.

Click the Details tab at the top of the dialog. On the next screen click the **Spool Settings** button and choose the "Print directly to the printer" item. Click **OK** to confirm.

## **I get “application errors” or lockups when accessing graphics**

---

This error message can indicate that your display driver is unable to properly display the selected graphic. It may be necessary for you to either obtain the latest version of your display driver from the manufacturer, or change your Windows display settings in order to correct this.

When selecting an alternate display driver, we recommend the selection of either the *Standard VGA* or *Standard Super VGA* which ship with your version of Windows. These “generic” display drivers tend to be compatible to most video cards.

## **Answers to Common Questions:**

### **How do I import graphics into PrintMaster Gold?**

---

PrintMaster Gold provides support for graphics in either .TIF, .GIF, .PCX, .WMF, .BMP, .CGM, .JPG, .DIB, or Kodak Photo CD format.

Simply open the PrintMaster Gold Picture Album, pull down the File menu and select Open from Disk.

Select the drive and directory containing your graphic files and select the graphic you wish to use in your project. (*See the section entitled: Selecting Pictures for more information on this feature.*)

### **How do I use PrintMaster graphics in other applications?**

---

PrintMaster Gold graphics are shipped in an industry standard .CGM and .TIF formats. Any application that supports the importation of .CGM and .TIF graphic files can support PrintMaster Gold graphics. Please consult your applications user's guide for instructions on importing graphics.
